THIS SAFE WORK METHOD	STATEMENT IS APPROV D BY	THE PC. OF THE ROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or und	required to en that a safe work method	statement (SWMS) is prepared before
Full Name:			
Signature:	NY	Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring	compliant e of the SWIL as well as re	eviews and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS VMS HAVE THE FOLLOWING COMMUNICATED	NA. 2 OF ALL RELEVANT PERSONN EVELOPMENT AND APPROVAL OF	IEL WHO HAVE BEEN CONSULTED AND ( THIS SWMS	COMMUNICATED TO IN THE
Safety meetings or toolbox talks will be sched ed in accorde with regislative requirements to first identify any site hazards, to construct the those hazards and then to further take steps to either eliminate or conclude ach hazard.			
If an incident or a near miss occurs, all work must stead dately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Improper handling of tools, failure to wear appropriate personal protective equipment	2M	<ul> <li>Ensure all personnel have received compounds ensive training on the proper handling and use of tools prior to commencing the burning off procedure.</li> <li>Conduct a pre-start safety briefing to highligh and wild hazards and emphasize the importance of using safety equipment and following safety protoco.</li> <li>Verify that all tools and equipment are in good wearing or aution before use, inspecting for any damage or wear which could once may actions.</li> <li>Provide adea of experson protective equipment (PPE) such as fire-resistant clothing, gloves, helmets, and face shows to all workers involved in Molouring off process.</li> <li>Enforce stricts there is no wearing how at all times during the preparation and execution of burning off tasks or event or our to heat, flames, and debris.</li> <li>Estal, shortesign and tool storage and maintenance area where tools can be safely stored when not in use, minimize trip hourds and ensuring quick access in emergencies.</li> <li>Develorand to lement a clear communication plan allowing team members to instantly alert others of an insulation or has indo occurring during operations.</li> <li>Assess or vironmental conditions including wind speed and direction, temperature, and humidity before unting to ensure safe and effective burning off with minimal risks.</li> <li>Sor up physical barriers around the worksite to demarcate safe zones from hazardous areas, thus protecting unauthorized personnel from accidental entry.</li> <li>Arrange for appropriate firefighting equipment such as extinguishers, hoses, and water sources to be readily available and fully operational on-site.</li> <li>Assign experienced supervisors to oversee the burning off operation, ensuring compliance with safety guidelines and providing immediate corrective action if needed.</li> <li>Implement a buddy system where workers partner up, monitoring each other's safety practices and providing assistance if one experiences trouble.</li> </ul>	1L
2. Site Selection	Location near flammable materials, area not secured from unauthorized access	зн	<ul> <li>Conduct a thorough site inspection and identify any flammable materials within the designated area. Remove or adequately shield these materials to minimise risk.</li> <li>Establish a clear, marked perimeter around the burn-off area to restrict access by unauthorised individuals or wildlife.</li> <li>Post warning signage at strategic points around the site to inform personnel and the public of burning activities.</li> <li>Implement a system to monitor weather conditions, particularly wind direction and speed, to prevent uncontrolled spread of fire and smoke.</li> <li>Ensure all personnel involved in the operation are trained in emergency response procedures and have clear communication channels for coordination.</li> </ul>	2M

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			- Have adequate firefighting equipment readily available at the site, including extinguishers, water supplies, and fire blankets.	
			- Assign a dedicated fire warden or safety officer oversee compliance with safety protocols and intervene promptly if hazards are identified.	
			- Include spotters during the operation to tech for up ected changes in fire behaviour and prompt immediate corrective action.	
			- Develop and maintain a log of all burning access, noting dates, times, and conditions, to assist with ongoing risk assessment and control.	
			- Liaise with local emergency's vices prior to come and operations to inform them of the burn-off schedule and gain to a neigh a on minimizing risk.	
			- Ensure all purponnel are rained in the operation of hand tools and equipment before use.	
			- Cor a pre reck to ensure all tools and equipment are in good working condition.	
			- Use are all providive equipment (PPE) such as gloves, long sleeves, and sturdy boots to protect against suts and but	
			Implement a relidy system where workers operate in pairs to monitor each other's safety and provide a stand if nearly.	
2 = 4 + 1 + 1 + 1		3h.	Established communication protocols using radios or mobile phones for emergency contact and ordination.	
3. Establishing Firebreaks	Risk of injury from using hand tools/equipment, smoke inhalation		- In htify and clearly mark the boundaries of the firebreak area to prevent unauthorised entry.	2M
			Ensure that local wind conditions are favourable and will not drive smoke towards populated areas.	
			- Equip personnel with dust masks or respiratory protection to guard against smoke inhalation.	
			- Ensure there is access to water sources or fire extinguishers nearby in case immediate fire suppression is necessary.	
			- Limit the size of burn piles to minimize excessive smoke production and maintain control over the burn area.	
			- Monitor weather conditions continuously and halt operations if adverse changes occur, such as increased wind speed.	
4. Fuel Collection	Risk of manual handling injuries, slips	2M		1L
4. I del Collection	and falls	ZIVI		I L

#### SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

#### SAFE WORK IN 'THIS 'S' ITEM ON MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remain effect, and must be reviewed (and revised if necessary) if relevant control measures are revised. The view as should be carried out in consultation with workers (including contractors as unputractors of the SWMS and their health and safety registeratives who represented that work group at the workplace.

When the SWMS has been revised the PCBD mest ensure the advised that a revision has been made and how they can accept the revised SWMS, including all persons who will need to change a work procedure or system as a rest of the review are advised of the changes in a way that will enable them to implement their duties the theoretical with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- Spot Checks.
- Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

### SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS	
The company details have been entered, including the project name and address.			
All relevant personnel consulted during the development of the SWMS.			
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	7		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.	$\boxtimes$		
Any hazards listed in any site risk assessments have been added to the SW. S.			
SWMS initial risk (IR) column as well as residual risk (RR) column sympleted.			
Check control measures added to the SWMS are the most effective sections.			
Responsible person is assigned and listed on the placenta. Of control measures.			
Permit or licenses requirements specified, so in as Hot Work, Electrical Work, Work at Heights etc.			
SWMS identifies plant and equipment to be			
Details of inspection checks required for any equipment lister are noted on the SWMS.			
Describes any mandatory qualifications, experience, ang or skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
