| THIS SAFE WORK METHOD | | | |
| Under the Work Health and Safety Regulation (WHS Regulation), a person condu the proposed work starts. | cting a business or under thing (Pu-U) is | required to entry that a safe work method | statement (SWMS) is prepared before |
| Full Name: | | | |
| Signature: | | Title: | Date: |
| Details of the person(s) responsible for ensuring implementation, monitoring η_{i} | compliance of the SWI, was well as re | views and modifications of the SWMS. | |
| Full Name: | | Title: | Phone: |
| ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS HAVE THE FOLLOWING COMMUNICATED | NALE OF ALL RELEVANT PERSONN EVELOPMENT AND APPROVAL OF | EL WHO HAVE BEEN CONSULTED AND THIS SWMS | COMMUNICATED TO IN THE |
| Safety meetings or toolbox talks will be schedued in according e with egislative requirements to first identify any site hazards, and the to further take steps to either eliminate or conal leach hazard. | | | |
| If an incident or a near miss occurs, all work must store updately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity. | | | |
| Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel. | | | |
| The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident. | | | |

|---------------------|--|-----------------|---|------------------|
| SPECIFIC WORK STEPS | HAZARDS THAT MAY ARISE | INITIAL RISK | SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS | RESIDUAL RISK |
| 1. Preparation | Trip hazards from tools, Incorrect use of tools, Electrical hazards from power tools | 3Н | Ensure work area is clear of debris and undecessary materials. Provide appropriate storage for tools and unipment or minimize clutter. Train workers in proper tool usage to preven ususe and injury. Inspect all power tools and unachinery regularly or faultation diver. Use residual current functions (mNDs) on all electric unquipment to reduce shock risk. Clearly mark on the hazare, and usure there are visible, even in low light conditions. Wear appropriate personal protection ecopement (PPE) such as gloves and safety glasses. Control a risk of some prior to starting work to identify potential hazards. Ensure of ds and unbles are managed property to avoid creating trip hazards. Implement robutine cousekeeping schedule to keep the work area tidy and safe. Make site all orkers are familiar with emergency procedures and first aid measures. | 2M |
| 2. Demolition | Risk of falling debris, Exposure to dust and hazardous substances, Noise pollution | 4A | Conduct detailed site assessment to identify potential hazards before demolition starts. Act physical barriers and signage to keep unauthorised personnel away from the demolition zone. Provide workers with appropriate personal protective equipment (PPE) including hard hats, gloves, safety goggles, dust masks, and hearing protection. Implement an exclusion zone where only trained and authorised personnel are allowed during demolition activities. Use water sprays or other dust suppression techniques to minimise airborne dust particles. Ensure all machinery and equipment are regularly maintained and inspected for safe operation. Secure and brace any structures or walls that may become unstable during demolition work being performed. Utilise spotters and safety observers to monitor demolition activities and alert workers of potential dangers. Ensure proper ventilation is available to reduce exposure to inhalable hazardous substances such as asbestos or silica. Schedule noisy tasks during business hours when adjacent properties are least affected, and utilise noise barriers if necessary. Conduct regular safety meetings and briefings to ensure all workers are aware of the risks and control measures associated with demolition tasks. | ЗН |

| 3. Excavation | Collapse of excavation, Falling into excavation, Contact with underground services | 4A | Conduct a site-specific risk assessment before commencing excavation work. Install appropriate shoring, trench boxes, or bearuing systems to prevent collapse of the excavation. Erect barriers, guardrails, or fencing around the excavation to prevent falls. Provide safe access routes and egress parts into a provide of the excavation area. Inform and train workers on recognising haza to esociated with excavations and how to mitigate them. Mark and locate undergrobe services (gas, was electricly before starting excavation, using service maps and cable locators. Engage competer periods to opervise excavation activities and monitor conditions. Keep hear trachinery al cloads may from we edge of the excavation to avoid collapse due to weight pressure. Estates an excert a zone to keep unauthorised personnel away from the excavation site. Use informer second steps for access rather than climbing on unstable soil or walls. Ensure that recavate material is stored at least one metre away from the edge of the trench or vicavation. Reciptant inspect the excavation for signs of movement or instability, especially after adverse weather. Implement emergency procedures in case of an incident, including rescue plans and first aid provision. Implement clearly with all team members regarding the location of excavation work and potential hazards. | ЗН |

EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

| ITEMS WHICH MUST BE INCLUDED IN THE SWMS | COMPLETED | COMMENTS | |
|---|----------------|----------|--|
| | | | |
| The company details have been entered, including the project name and address. | | | |
| All relevant personnel consulted during the development of the SWMS. | | | |
| Name, signature, position and date signed of the person approving the SWMS. | | | |
| Specific personnel and qualifications, experience is noted in the SWMS. | | | |
| Provides a step-by-step process of tasks required to carry out the activity or task. | | | |
| Adequate risk assessment of any identified hazards has been completed. | \boxtimes | | |
| Foreseeable hazards are identified and documented for each step. | | | |
| Any hazards listed in any site risk assessments have been added to the SN S. | \boxtimes | | |
| SWMS initial risk (IR) column as well as residual risk (RR) column completed. | \square | | |
| Check control measures added to the SWMS are the most effective sour tions. | \boxtimes | | |
| Responsible person is assigned and listed on the spin central procentation of control measures. | \square | | |
| Permit or licenses requirements specified, so in as Hot Work, Electrical Work, Work at Heights etc. | \boxtimes | | |
| SWMS identifies plant and equipment to be | \square | | |
| Details of inspection checks required for any equipment lister are noted on the SWMS. | \square | | |
| Describes any mandatory qualifications, experience, ang or skills required to perform the work. | \boxtimes | | |
| Applicable personal protective equipment is selected on the SWMS. | \square | | |
| Reflects and documents any legislative references and/or Australian Standards. | \square | | |
| Identifies any hazardous substances used with specific control measures in line with any SDS. | | | |
