| THIS SAFE WORK METHOD | | THE PC. OF THE ROJECT | |
| Under the Work Health and Safety Regulation (WHS Regulation), a person condu the proposed work starts. | icting a business or under thing (Pu-U) is | required to entry that a safe work method | statement (SWMS) is prepared before |
| Full Name: | | | |
| Signature: | | Title: | Date: |
| Details of the person(s) responsible for ensuring implementation, monitorin | compliance of the SWI, was well as re | eviews and modifications of the SWMS. | |
| Full Name: | | Title: | Phone: |
| ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS | NATE OF ALL RELEVANT PERSONNEL OF ALL RELEVANT PERSONNEL OF | NEL WHO HAVE BEEN CONSULTED AND THIS SWMS | COMMUNICATED TO IN THE |
| Safety meetings or toolbox talks will be schedued in according e with egislative requirements to first identify any site hazards, and the to control to those hazards and then to further take steps to either eliminate or control leach hazard. | | | |
| If an incident or a near miss occurs, all work must store a diately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity. | | | |
| Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel. | | | |
| The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident. | | | |

|------------------------------|--|-----------------|--|------------------|
| SPECIFIC WORK STEPS | HAZARDS THAT MAY ARISE | INITIAL RISK | SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS | RESIDUAL RISK |
| 1. Preparation | Slips, trips, falls, manual handling injuries | ЗН | Use appropriate PPE (Personal Protective equipment), including gloves, safety boots, and high-visibility clothing. Conduct a site risk assessment to identify a thermate potential tripping hazards. Ensure walkways are cleared debris and obstances. Keep tools and materials organised and stored standard not in use. Implement promounting exhibiting and use machanical aids where possible. Train work to on correct burnual her dling toocedures. Provide adequate liciting in the workarea to enhance visibility. Instant to porary entries or warning signs around hazardous areas. Ensulu ally affaces are free from oil, water, or other slippery substances. Inspecting the staffolding before use to ensure they are safe and stable. Develop is site-specific safety plan outlining potential risks and control measures. Encourse regular breaks to prevent fatigue during manual handling tasks. Ne anti-slip mats or coverings in areas prone to becoming wet or slippery. Provide first aid facilities and ensure there are trained first aid personnel on -site. | 2М |
| 2. Transporting Materials | Vehicle accidents, manual handling injuries | ЗН | Conduct a pre-start vehicle inspection to ensure the vehicle is in good working condition. Use proper lifting techniques and team lifting for heavy loads to prevent manual handling injuries. Secure all materials firmly within the vehicle to prevent shifting during transport. Ensure that the vehicle load does not exceed the manufacturer's recommended weight limits. Plan the transportation route to avoid high traffic areas and roadworks where possible. Wear appropriate personal protective equipment (PPE), such as gloves and steel-capped boots, during loading and unloading. Train workers on safe lifting techniques and proper use of trolleys or other lifting aids. Ensure adequate rest breaks for drivers to prevent fatigue-related accidents. Use red flags or indicator tapes to mark lengths of copper pipes extending beyond the vehicle's body. Establish a communication plan for the transport team to stay in contact, especially in remote areas. Check weather conditions before transport and avoid driving in hazardous conditions if possible. Display visible signage indicating 'long load' or other relevant warnings when transporting cumbersome materials. | 2М |

EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

| ITEMS WHICH MUST BE INCLUDED IN THE SWMS | COMPLETED | COMMENTS |
|---|-------------|----------|
| | | |
| The company details have been entered, including the project name and address. | | |
| All relevant personnel consulted during the development of the SWMS. | \boxtimes | |
| Name, signature, position and date signed of the person approving the SWMS. | | |
| Specific personnel and qualifications, experience is noted in the SWMS. | 7 | |
| Provides a step-by-step process of tasks required to carry out the activity or task. | | |
| Adequate risk assessment of any identified hazards has been completed. | | |
| Foreseeable hazards are identified and documented for each step. | \boxtimes | |
| Any hazards listed in any site risk assessments have been added to the Sλ. S. | \boxtimes | |
| SWMS initial risk (IR) column as well as residual risk (RR) column completed. | \boxtimes | |
| Check control measures added to the SWMS are the most effective sections. | \boxtimes | |
| Responsible person is assigned and listed on the spiral of the spiral entry of control measures. | \boxtimes | |
| Permit or licenses requirements specified, so in as Hot Work, Electrical Work, Work at Heights etc. | \boxtimes | |
| SWMS identifies plant and equipment to be | \boxtimes | |
| Details of inspection checks required for any equipment lister are noted on the SWMS. | \boxtimes | |
| Describes any mandatory qualifications, experience, ang or skills required to perform the work. | \boxtimes | |
| Applicable personal protective equipment is selected on the SWMS. | \square | |
| Reflects and documents any legislative references and/or Australian Standards. | \boxtimes | |
| Identifies any hazardous substances used with specific control measures in line with any SDS. | \boxtimes | |
