Contact Person:	Phone:	E ail:	
THIS SAFE WORK METHOD	STATEMENT IS APPROVID BY	THE PC. OF TP' ROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduthe proposed work starts.			statement (SWMS) is prepared before
Full Name:			
Signature:	NY	Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring	compliant e of the SWIL as well as re	eviews and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS VMS HAVE THE FOLLOWING COMMUNICATED	NA. 2 OF ALL RELEVANT PERSONN EVELOPMENT AND APPROVAL OF	IEL WHO HAVE BEEN CONSULTED AND THIS SWMS	COMMUNICATED TO IN THE
Safety meetings or toolbox talks will be sched ed in accorde with regislative requirements to first identify any site hazards, to continue to those hazards and then to further take steps to either eliminate or conditional leach hazard.			
If an incident or a near miss occurs, all work must stead dately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Infected bites, Slips, falls	3H	- Conduct a pre-work site assessment to intendfy potential vermin or pest activity. - Wear appropriate personal protective equament (Fig. 2) such as gloves, long sleeves, and pants to minimise skin exposure. - Use insect repellent on excessed skin to preven hites from preceded pests. - Ensure all personnel have upon-date vaccination of purseases common in the area. - Keep work are palean and free of food debristo avoid attracting pests. - Install appropriate barries or traps a constraind monitor pest activity. - Ensuradequate lighting is available or the work area to help spot potential hazards. - Use ignine to be nother workers of identified vermin or pest hotspots. - Implementant materials may gement procedures that comply with local regulations and guidelines. Train employers on recognising signs of pest infestation and appropriate response actions. - Invertail secure-storage of chemicals and pesticides to prevent accidental exposure. Apply successistant materials on potentially slippery surfaces, particularly in outdoor areas. - angularly monitor and review risk assessments to identify any new hazards or required control measures.	2M
2. Setting traps	Injury from trap setting, Allergic reaction to baits	ЗН	 Provide training for workers on proper trap-setting techniques and the risks involved. Use only traps that are recommended and approved for use in workplaces, ensuring their design reduces potential injury. Wear appropriate personal protective equipment (PPE) such as gloves and safety goggles when setting traps to minimise contact with sharp or hazardous components. Follow manufacturer's guidelines for safe handling and placement of traps to ensure they are secure and pose no risk of accidental activation. Ensure traps are placed in areas that are clearly marked and away from locations where people frequent to reduce the risk of accidental triggering. Supervise inexperienced or new staff when they are setting traps to ensure compliance with safety procedures. Choose non-toxic baits wherever possible, particularly in areas where allergens could cause adverse reactions in sensitive individuals. Conduct a risk assessment to identify any workers who may be susceptible to allergic reactions and provide alternative tasks or additional precautions. 	1L

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS - Clearly label bait containers and storage areas, stressing the importance of handling these substances with care to minimise exposure. - Implement a system for regular inspection and condition and do not pose unexpected hazar.	RESIDUAL RISK
3. Vermin disposal	Disease transmission, Infected bites	ЗН	 Use personal protective equipment (PPE), such are oves and masks to prevent direct contact with vermin. Implement hand hygiene procols, including her twaship to the use of hand sanitiser after handling vermin. Ensure all staff as the process in san disposal methods and the potential hazards associated with vermin. Use sealed containers for ranspoing descreted or captured vermin to minimise exposure and contamination. Follow call regions as and guidelines for the disposal of vermin to ensure compliance and safety. Utilis the ranical cols like tongs or shovels to handle vermin, reducing the risk of bites or scratches. Use in act to ellent ad cover exposed skin to prevent bites from fleas or other parasites carried by armin. Fig. afin aid kits readily available for treating potential bites or injuries sustained during disposal. Establis a clearly defined procedure for reporting and documenting vermin-related incidents to monitor to do and effectiveness of control measures. Schedule regular health checks for personnel frequently involved in vermin disposal to monitor for symptoms of disease transmission. Designate specific areas for the disposal process to contain any contamination. Ensure proper signage is in place to inform and warn others of vermin disposal activities being conducted. Investigate and address potential entry points for vermin in workspaces to minimise future infestation risks. Evaluate and adjust pest management strategies regularly based on incident reports and environmental changes. 	2M
4. Decontaminate Equipment	Chemical hazards, Cross contamination	2M		1L

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

SAFE WORK IN 'THIS 'S' ITEM ON MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remain effect, and must be reviewed (and revised if necessary) if relevant control measures are revised. The view as should be carried out in consultation with workers (including contractors as unputractors of the SWMS and their health and safety registeratives who represented that work group at the workplace.

When the SWMS has been revised the PCBD mest ensure the all persons involved with the work are advised that a revision has been made and how they can accept the revised SWMS, including all persons who will need to change a work procedure or system as a rest of the review are advised of the changes in a way that will enable them to implement their duties the total with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- Spot Checks.
- Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.		
All relevant personnel consulted during the development of the SWMS.		
Name, signature, position and date signed of the person approving the SWMS.		
Specific personnel and qualifications, experience is noted in the SWMS.		
Provides a step-by-step process of tasks required to carry out the activity or task.		
Adequate risk assessment of any identified hazards has been completed.		
Foreseeable hazards are identified and documented for each step.	\boxtimes	
Any hazards listed in any site risk assessments have been added to the SV \$.		
SWMS initial risk (IR) column as well as residual risk (RR) column ampleted.		
Check control measures added to the SWMS are the most effective sections.		
Responsible person is assigned and listed on the place of control measures.		
Permit or licenses requirements specified, so in as Hot Work, Electrical Work, Work at Heights etc.		
SWMS identifies plant and equipment to be		
Details of inspection checks required for any equipment lister are noted on the SWMS.		
Describes any mandatory qualifications, experience, ang or skills required to perform the work.		
Applicable personal protective equipment is selected on the SWMS.		
Reflects and documents any legislative references and/or Australian Standards.	\boxtimes	
Identifies any hazardous substances used with specific control measures in line with any SDS.	\boxtimes
