

Dowel Cradle Fabricator | SAFE WORK METHOD STATEMENT (SWMS)

TASK OR ACTIVITY: Dowel Cradle Fabricator

| | | | |
|-------------------------------------|----------------|------------|-------|
| Business Name: [Company Name] | | ABN: [ABN] | SWMS# |
| Business Address: [Company Address] | | | |
| Contact Person: | Phone: [Phone] | Email: | |

THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE PROJECT MANAGER OF THE PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a safe work method statement (SWMS) is prepared before the proposed work starts.

Full Name:

Signature: _____ Title: _____ Date: _____

Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS, as well as reviews and modifications of the SWMS.

Full Name: _____ Title: _____ Phone: _____

ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS SWMS MUST HAVE THE FOLLOWING COMMUNICATED | **NAME AND DATED SIGNATURE OF ALL RELEVANT PERSONNEL WHO HAVE BEEN CONSULTED AND COMMUNICATED TO IN THE DEVELOPMENT AND APPROVAL OF THIS SWMS**

| | NAME | SIGNATURE | DATE |
|--|------|-----------|------|
| Safety meetings or toolbox talks will be scheduled in accordance with legislative requirements to first identify any site hazards, to conduct and communicate those hazards and then to further take steps to either eliminate or control each hazard. | | | |
| If an incident or a near miss occurs, all work must stop immediately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity. | | | |
| Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel. | | | |
| The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident. | | | |

CLIENT OR PRINCIPAL CONTRACTOR DETAILS

| | |
|--|--|
| Client: | SCOPE OF WORKS Provide a detailed description of the specific work being carried out (otherwise known as scope of works). |
| Project Name: | |
| Project Address: | |
| Project Manager: | |
| Contact Phone: | |
| Project Manager Signature: | |
| Date SWMS supplied to Project Manager: | |

ANY HIGH-RISK CONSTRUCTION WORK BEING CARRIED OUT

| | |
|---|---|
| <input type="checkbox"/> involves a risk of a person falling more than 2 meters. | <input type="checkbox"/> is carried out on or near pressurised gas mains or piping. |
| <input type="checkbox"/> is carried out on a telecommunication tower. | <input type="checkbox"/> is carried out on or near chemical, fuel or refrigerant lines. |
| <input type="checkbox"/> involves demolition of an element of a structure that is load-bearing. | <input type="checkbox"/> is carried out on or near energised electrical installations or services. |
| <input type="checkbox"/> involves demolition of an element related to the physical integrity of a structure. | <input type="checkbox"/> is carried out in an area that may have a contaminated or flammable atmosphere. |
| <input type="checkbox"/> involves, or is likely to involve, disturbing asbestos. | <input type="checkbox"/> involves tilt-up or precast concrete. |
| <input type="checkbox"/> involves structural alteration or repair that requires temporary supports to prevent collapse. | <input type="checkbox"/> is carried out on, in or adjacent to a road, railway, shipping lane or other traffic corridor. |
| <input type="checkbox"/> is carried out in or near a confined space. | <input type="checkbox"/> is carried out in an area of a workplace where there is any movement of powered mobile plant. |
| <input type="checkbox"/> is carried out in/near a shaft or trench deeper than 1.5m or tunnel involving use of explosives. | <input type="checkbox"/> is carried out in areas with artificial extremes of temperature. |
| <input type="checkbox"/> is carried out in or near water or other liquid that involves a risk of drowning. | <input type="checkbox"/> involves diving work. |

ANY HIGH-RISK MACHINERY OR EQUIPMENT NEARBY

| | | | | | | | |
|---------------------------------------|---------------------------------------|---|------------------------------------|---|--|----------------------------------|-------------------------------------|
| <input type="checkbox"/> Forklift | <input type="checkbox"/> Crane/s | <input type="checkbox"/> Hoist/s | <input type="checkbox"/> Excavator | <input type="checkbox"/> Backhoe/Loader | <input type="checkbox"/> Boom Lift | <input type="checkbox"/> EWP | <input type="checkbox"/> Genie Lift |
| <input type="checkbox"/> Trencher | <input type="checkbox"/> Drilling Rig | <input type="checkbox"/> Trucks | <input type="checkbox"/> Formwork | <input type="checkbox"/> Bobcat | <input type="checkbox"/> Flammable Gas | <input type="checkbox"/> Fuel | <input type="checkbox"/> Dozer |
| <input type="checkbox"/> High Voltage | <input type="checkbox"/> Mulcher | <input type="checkbox"/> Tilt-up Panels | <input type="checkbox"/> Roller | <input type="checkbox"/> Scissor Lift | <input type="checkbox"/> Tractor | <input type="checkbox"/> Other - | |

| RISK MATRIX | | | | | | | | | | |
|----------------|---------------|------------|------------|---------|--------------|-------------|-----------------------------------|--|--|--|
| LIKELIHOOD | INSIGNIFICANT | MINOR | MODERATE | MAJOR | CATASTROPHIC | SCORE | ACTION | HEIRARCHY OF CONTROLS | | |
| ALMOST CERTAIN | 3 HIGH | 3 HIGH | 4 ACUTE | 4 ACUTE | 4 ACUTE | | | Elimination Remove the hazard. | | |
| LIKELY | 2 MODERATE | 3 HIGH | 3 HIGH | 4 ACUTE | 4 ACUTE | 4A ACUTE | DO NOT PROCEED | Substitution Replace the hazard. | | |
| POSSIBLE | 1 LOW | 2 MODERATE | 3 HIGH | 4 ACUTE | 4 ACUTE | 3H HIGH | Review before work starts. | Isolation Isolate People from the hazard | | |
| UNLIKELY | 1 LOW | 1 LOW | 2 MODERATE | 3 HIGH | 4 ACUTE | 2M MODERATE | Ensure control measures in place. | Engineering Isolate the hazard. | | |
| RARE | 1 LOW | 1 LOW | 2 MODERATE | 3 HIGH | 3 HIGH | 1L LOW | Monitor and keep records | Administrative Change the work. | | |
| | | | | | | | | PPE | | |

Notes on Hierarchy of Controls: Elimination methods are the most effective and preferred when controlling a hazard. Substitution is the second most effective method of controlling a hazard. Engineering by isolation is the third most effective, while Administrative Controls by changing the work is the fourth most effective method. PPE (Personal Protective Equipment) is the least effective method.

| PERSONAL PROTECTIVE EQUIPMENT (PPE) | | | | | | | | | | | |
|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| FOOT PROTECTION | HAND PROTECTION | HEAD PROTECTION | HEARING PROTECTION | EYE/FACE PROTECTION | RESPIRATORY PROTECTION | FACE PROTECTION | HIGH-VIS CLOTHING | PROTECTIVE CLOTHING | FALL PROTECTION | SUN PROTECTION | HAIR/JEWELLERY SECURED |
| | | | | | | | | | | | |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

Select the appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS; and,
3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

| JOB STEP | POTENTIAL HAZARDS | IR | CONTROL MEASURES | RR | RESPONSIBLE PERSON |
|-----------------------|---|--------------|--|---------------|--------------------|
| SPECIFIC WORK STEPS | HAZARDS THAT MAY ARISE | INITIAL RISK | SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS | RESIDUAL RISK | NAME OF PERSON |
| 1. Preparation | Slips, trips, and falls, Manual handling injuries | 2M | <ul style="list-style-type: none"> - Ensure proper housekeeping is maintained at the work site to prevent slips, trips, and falls. This includes regular cleaning of the work area and removal of debris, waste materials, and tools that are not in use. - Provide adequate lighting in the work area to ensure clear visibility during the preparation process, helping to minimise the risk of slips, trips, and falls. - Ensure all access paths and walkways within the work area are clear from obstructions, providing safe passage for workers and material transport. - Implement a preventative maintenance programme for the equipment used during the preparatory stage, which includes inspecting and repairing any faulty or damaged machinery to reduce the risk of manual handling injuries. - Utilise mechanical aids, such as trolleys, pallet jacks, or hoists, wherever possible, to minimise the need for workers to perform manual lifting tasks, thus reducing the risk of manual handling injuries. - Provide appropriate personal protective equipment (PPE) for workers during the preparation process, such as non-slip footwear, gloves, and back support belts, as needed. - Implement and enforce proper lifting techniques and ergonomic practices among workers, including bending at the knees, keeping loads close to their bodies, and avoiding twisting while lifting. - Consider task rotation, job sharing, or adjusting the duration of repetitive tasks to minimise the risk of manual handling injuries related to overwork or fatigue. - Conduct regular safety meetings and toolbox talks to reinforce safe work practices with employees, emphasising the importance of workplace safety and hazard prevention. - Assess each worker's physical capabilities to perform their assigned tasks during the preparation process, ensuring they do not exceed their limitations and increase the risk of injury. - Develop an emergency response plan detailing steps to be taken in case of accidents or emergencies. Ensure employees are aware of the location of first-aid kits, fire extinguishers, and evacuation routes. - Continuously monitor, evaluate, and review the implemented control measures during the work step, adjusting them as necessary to ensure optimal safety and hazard prevention. | 1L | |
| 2. Materials Handling | Forklift accidents, Falling objects | 3H | <ul style="list-style-type: none"> - Ensure all workers have a valid forklift license and are competent in operating the equipment. - Conduct pre-operation checks on the forklift to verify that it is functioning correctly and safely before use. | 1L | |

| JOB STEP | POTENTIAL HAZARDS | IR | CONTROL MEASURES | RR | RESPONSIBLE PERSON |
|-----------------------|----------------------------|--------------|---|---------------|--------------------|
| SPECIFIC WORK STEPS | HAZARDS THAT MAY ARISE | INITIAL RISK | SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS | RESIDUAL RISK | NAME OF PERSON |
| | | | <ul style="list-style-type: none"> - Establish exclusion zones around the working area to minimise the risk of collision with people or other vehicles. - Utilise proper signage to warn pedestrians and other traffic about ongoing forklift operations. - Implement a traffic management plan outlining procedures for handling high-risk areas, such as intersections, blind spots, or congested areas. - Stack and store materials properly to ensure stability and prevent them from falling or collapsing during storage or transportation. - Regularly inspect and maintain dowel cradle fabrication equipment to ensure they are functioning correctly and adhere to safety standards. - Provide appropriate personal protective equipment (PPE) for all workers involved in material handling, including hard hats, safety boots, and high-visibility clothing. - Implement effective communication channels between operators and ground personnel using hand signals, radios, or other established methods. - Ensure materials are secured properly when lifted or transported by forklift, using strapping, netting, or other suitable methods. - Train workers on manual lifting techniques to help reduce the risk of injury while handling materials without equipment. - Enforce strict adherence to authorised-only access to the dowel cradle fabrication work zone, with only workers involved in the process allowed entry. - Regularly review and update the safe work methods statement (SWMS) based on any changes in equipment, procedures, or hazards, ensuring that staff remains informed about best practices. | | |
| 3. Cutting Steel Bars | Sharp edges, Flying debris | 2M | <ul style="list-style-type: none"> - Ensure all workers have completed necessary training and hold relevant qualifications for operating cutting equipment. - Conduct risk assessments before starting the cutting process to identify potential hazards and discuss control measures with the team. - Provide and enforce the use of appropriate personal protective equipment (PPE), including safety glasses, gloves, hearing protection, and steel-toed boots. - Inspect cutting equipment and tools for signs of wear or damage before each use, performing regular maintenance as required. - Keep the work area clean, organised, and free from debris to minimise tripping hazards and prevent contact with sharp edges. - Use proper lifting techniques when handling and moving steel bars, encouraging teamwork for heavier loads. - Apply appropriate cutting methods, such as using a saw, grinder, or shears based on the size and thickness of the steel bars. | 1L | |

| JOB STEP | POTENTIAL HAZARDS | IR | CONTROL MEASURES | RR | RESPONSIBLE PERSON |
|-----------------------|-----------------------------------|--------------|--|---------------|--------------------|
| SPECIFIC WORK STEPS | HAZARDS THAT MAY ARISE | INITIAL RISK | SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS | RESIDUAL RISK | NAME OF PERSON |
| | | | <ul style="list-style-type: none"> - Install adequate guarding on cutting equipment to shield operators from flying debris, sparks, and direct contact with sharp edges. - Secure steel bars in place using suitable clamps and supports during the cutting process to prevent unintended movement and reduce the risk of injury. - Maintain a safe distance between workers and cutting equipment to minimise exposure to flying debris, noise, and vibration. - Implement clear communication protocols with the team, especially during equipment start-up, shutdown, and emergency situations. - Rotate workers involved in the cutting process to prevent breaks and reduce exposure to prolonged periods of noise, vibration, and dust. - Develop an emergency response plan in case of incidents such as injuries, equipment malfunction or fires, providing easy access to first aid supplies and fire-fighting equipment. - Regularly review and update the SWMS based on new information, changes in work processes, or after any safety incidents, ensuring continuous improvement of safety practices in the workplace. | | |

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK METHOD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remains effective and must be reviewed (and revised if necessary) if relevant control measures are needed. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

1. Spot Checks.
2. Consultation with workers, contractors and sub-contractors.
3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

| ITEMS WHICH MUST BE INCLUDED IN THE SWMS | COMPLETED | TO BE DONE | COMMENTS |
|--|--------------------------|--------------------------|----------|
