THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE PCBU OF THE PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a safe work method statement (SWMS) is prepared before the proposed work starts.

Full Name:

Signature:

Title:

Date:

Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS as well as reviews and modifications of the SWMS.

Full Name:

Title:

Phone:

ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS SWMS MUST HAVE THE FOLLOWING COMMUNICATED

NAME OF ALL RELEVANT PERSONNEL WHO HAVE BEEN CONSULTED AND COMMUNICATED TO IN THE DEVELOPMENT AND APPROVAL OF THIS SWMS

Safety meetings or toolbox talks will be scheduled in accordance with legislative requirements to first identify any site hazards, then to communicate those hazards and then to further take steps to either eliminate or control each hazard.

If an incident or a near miss occurs, all work must stop immediately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.

Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.

The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

SCOPE OF WORKS

ANY HIGH-RISK CONSTRUCTION WORK BEING CARRIED OUT

- | | |
|--|--|
| <input type="checkbox"/> involves a risk of a person falling more than 2 meters | <input type="checkbox"/> is carried out on or near pressurised gas mains or piping |
| <input type="checkbox"/> is carried out on a telecommunication tower | <input type="checkbox"/> is carried out on or near chemical, fuel or refrigerant lines |
| <input type="checkbox"/> involves demolition of an element of a structure that is load-bearing | <input type="checkbox"/> is carried out on or near energised electrical installations or services |
| <input type="checkbox"/> involves demolition of an element related to the physical integrity of a structure | <input type="checkbox"/> is carried out in an area that may have a contaminated or flammable atmosphere |
| <input type="checkbox"/> involves, or is likely to involve, disturbing asbestos | <input type="checkbox"/> involves tilt-up or precast concrete |
| <input type="checkbox"/> involves structural alteration or repair that requires temporary support to prevent collapse | <input type="checkbox"/> is carried out on, in or adjacent to a road, railway, shipping lane or other traffic corridor |
| <input type="checkbox"/> is carried out in or near a confined space | <input type="checkbox"/> is carried out in an area of a workplace where there is any movement of powered mobile plant |
| <input type="checkbox"/> is carried out in/near a shaft or trench deeper than 2m or tunnel involving use of explosives | <input type="checkbox"/> is carried out in areas with artificial extremes of temperature. |
| <input type="checkbox"/> is carried out in or near water or other liquid that involves a risk of drowning. | <input type="checkbox"/> involves diving work. |

ANY HIGH-RISK MACHINERY OR EQUIPMENT NEARBY

RISK MATRIX

| LIKELIHOOD | INSIGNIFICANT | MINOR | MODERATE | MAJOR | CATASTROPHIC | SCORE | ACTION | HEIRARCHY OF CONTROLS |
|---|---------------|---------------|---------------|------------|--------------|----------------|-----------------------------------|--|
| ALMOST CERTAIN | 3 HIGH | 3 HIGH | 4 ACUTE | 4 ACUTE | 4 ACUTE | | | Elimination Remove the hazard. |
| LIKELY | 2 MODERATE | 3 HIGH | 3 HIGH | 4 ACUTE | 4 ACUTE | 4A ACUTE | DO NOT PROCEED | Substitution Replace the hazard. |
| POSSIBLE | 1 LOW | 2 MODERATE | 3 HIGH | 4 ACUTE | 4 ACUTE | 3H HIGH | Review before work starts. | Isolation Isolate People from the hazard |
| UNLIKELY | 1 LOW | 1 LOW | 2 MODERATE | 3 HIGH | 4 ACUTE | 2M MODERATE | Ensure control measures in place. | Engineering Isolate the hazard. |
| RARE | 1 LOW | 1 LOW | 2 MODERATE | 3 HIGH | 3 HIGH | 1L LOW | Monitor and keep records | Administrative Change the work. |
| Notes on Hierarchy of Controls: Elimination methods are the most effective and preferred when controlling a hazard. Substitution is the second most effective method of controlling a hazard. Engineering by isolation is the third most effective, while Administrative Controls by changing the work is the fourth most effective method. PPE (Personal Protective Equipment) is the least effective method. | | | | | | | | PPE |

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Select the appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

| FOOT PROTECTION | HAND PROTECTION | HEAD PROTECTION | HEARING PROTECTION | EYE PROTECTION | RESPIRATORY PROTECTION | FACE PROTECTION | HIGH-VIS CLOTHING | PROTECTIVE CLOTHING | FALL PROTECTION | SUN PROTECTION | HAIR/JEWELLERY SECURED |
|--|--|--|--|--|---|--|--|--|--|--|--|
|  |  |  |  |  |  |  |  |  |  |  |  |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

Other PPE Required:

Permit or Licenses Requirements

Mandatory Qualifications and Training

| JOB STEP | POTENTIAL HAZARDS | IR | CONTROL MEASURES | RR |
|-------------------------------------|--|--------------|--|---------------|
| SPECIFIC WORK STEPS | HAZARDS THAT MAY ARISE | INITIAL RISK | SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS | RESIDUAL RISK |
| 1. Preparation | Mechanical injury, Tripping over tools/equipment | 3H | <ul style="list-style-type: none"> - Conduct a toolbox talk before commencing work to discuss potential hazards and control measures. - Ensure all tools and equipment are inspected for defects prior to use. - Store tools and materials in a designated area to prevent tripping hazards. - Use barriers or cones to cordon off the work area and prevent unauthorised access. - Wear appropriate personal protective equipment such as gloves and safety shoes. - Keep the workspace organised and clear of unnecessary items to minimise trip hazards. - Implement housekeeping practices and promptly clean up any spills or debris. - Ensure adequate lighting is available in the work area to improve visibility. - Use warning labels to clearly identify areas where work is being conducted. - Maintain clear communication among team members using a two-way radio or other devices. - Follow manufacturer's instructions for the safe use and handling of tools and equipment. | 2M |
| 2. Manual Handling and Transport | Back injuries, Foot injuries | 3H | <ul style="list-style-type: none"> - Conduct a manual handling risk assessment before beginning work to identify potential hazards and implement control measures. - Use appropriate lifting techniques, such as bending at the knees and keeping the load close to the body, to minimise strain on the back. - Utilise mechanical aids like trolleys or dollies to transport heavy items whenever possible. - Ensure two-person lifts for heavier loads to distribute weight evenly between workers. - Perform regular stretching exercises to prepare and maintain muscles for manual handling tasks. - Use appropriate personal protective equipment (PPE) such as safety shoes to protect against foot injuries from dropped objects. - Keep the work area tidy and free of trip hazards that could result in slips, trips, or falls during manual handling. - Plan the transportation route for moving materials in advance to avoid obstacles and uneven surfaces. - Limit the amount of twisting, reaching, or excessive bending when handling or transporting materials. - Take regular breaks to prevent fatigue during extended periods of manual handling or transportation tasks. - Provide training sessions for employees on safe manual handling practices to raise awareness and ensure compliance with safety protocols. | 1L |
| 3. Unloading and stacking materials | Falling objects, Slipping/tripping | 3H | | 1L |

- Use appropriate personal protective equipment including hard hats and safety harnesses to prevent falling objects.
- Ensure the unloading area is well-lit and free of obstructions to movement.
- Establish a designated drop zone for materials, clearly marked and restricted access during unloading.
- Utilise mechanical aids such as forklifts or pallet jacks to reduce manual handling.
- Assign experienced personnel to operate lifting and unloading equipment, ensuring proper training and certification.
- Stack materials securely on stable surfaces, using chocks or bracing to prevent shifting.
- Regularly inspect stacked materials, making adjustments to maintain stability.
- Develop an emergency response plan in case of incidents involving falling materials.
- Keep walkways and work areas clear of unnecessary materials to minimise tripping hazards.
- Clean spills promptly and use warning signs or cones to alert personnel.
- Conduct regular inspections of tools and equipment to ensure proper use.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK METHOD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remains effective and must be reviewed (and revised if necessary) if relevant control measures are revised. The review must be carried out in consultation with workers (including contractors and sub-contractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

1. Spot Checks.
2. Consultation with workers, contractors and sub-contractors.
3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

| ITEMS WHICH MUST BE INCLUDED IN THE SWMS | COMPLETED | COMMENTS |
|--|-------------------------------------|----------|
| The company details have been entered, including the project name and address. | <input checked="" type="checkbox"/> | |
| All relevant personnel consulted during the development of the SWMS. | <input checked="" type="checkbox"/> | |
| Name, signature, position and date signed of the person approving the SWMS. | <input type="checkbox"/> | |
| Specific personnel and qualifications, experience is noted in the SWMS. | <input checked="" type="checkbox"/> | |
| Provides a step-by-step process of tasks required to carry out the activity or task. | <input checked="" type="checkbox"/> | |
| Adequate risk assessment of any identified hazards has been completed. | <input checked="" type="checkbox"/> | |
| Foreseeable hazards are identified and documented for each step. | <input checked="" type="checkbox"/> | |
| Any hazards listed in any site risk assessments have been added to the SWMS. | <input checked="" type="checkbox"/> | |
| SWMS initial risk (IR) column as well as residual risk (RR) column completed. | <input checked="" type="checkbox"/> | |
| Check control measures added to the SWMS are the most effective solutions. | <input checked="" type="checkbox"/> | |
| Responsible person is assigned and listed on the SWMS for the implementation of control measures. | <input checked="" type="checkbox"/> | |
| Permit or licenses requirements specified, such as Hot Work, Electrical Work, Work at Heights etc. | <input checked="" type="checkbox"/> | |
| SWMS identifies plant and equipment to be used. | <input checked="" type="checkbox"/> | |
| Details of inspection checks required for any equipment listed are noted on the SWMS. | <input checked="" type="checkbox"/> | |
| Describes any mandatory qualifications, experience, training or skills required to perform the work. | <input checked="" type="checkbox"/> | |
| Applicable personal protective equipment is selected on the SWMS. | <input checked="" type="checkbox"/> | |
| Reflects and documents any legislative references and/or Australian Standards. | <input checked="" type="checkbox"/> | |
| Identifies any hazardous substances used with specific control measures in line with any SDS. | <input checked="" type="checkbox"/> | |
