THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY 1	THE PL J OF THE PROJECT		
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	eting a business or undertaking (N 3U) is	required to ture at a safe work method st	tatement (SWMS) is prepared before	
Full Name:				
Signature:		Title:	Date:	
Details of the person(s) responsible for ensuring implementation, monitoring a	ompliance of the SWMS well as review	s and modifications of the SWMS.		
Full Name:		Title:	Phone:	
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A COMUNICATED TO IN THE DEVELO	LL RELEVANT PERSONNEL WHO HAVE BE PMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND	
Safety meetings or toolbox talks will be sched ed in accordance with egislative requirements to first identify any site hazards, conditions unical those hazards and then to further take steps to either the conditions of the conditions are or conditions.	NAME	SIGNATURE	DATE	
If an incident or a near miss occurs, all work must standardly. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.				
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.				
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

			A								

Select me appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Faulty equipment, Inadequate training	3H	 Regular Inspection: Ensure that all EWP equipment undergoes regular and thorough checks to identify any signs of wear, damagnor malfunctions. Effective Training: Provide comprehensive training to all employees working with the EWP. This education should cover safer perating procedures, risk recognition and response strategies. Proper Maintenance Schedule: Implement a praintenance schedule that identifies and rectifies any potential issues with the EWP to mind see the risk associated with faulty equipment. Pre-operation Check procedures employees to percent routine checks before using the EWP procedure any to ble damage of malfunction signs. Corrective to ions: If a fact is idented date of inspection, ensure that immediate corrective action are taken, such as recording or replacing faulty equipment. Use to resonal prective Equipment: Ensure that personal protective equipment (PPE) to limets, offety harnesses, and safety boots are employed by the team during here ins. Clear to mind sation. Fromote clear communication amongst team members a sufficient in the lay's with plan, potential hazards, and emergency response plans. Documentation: Keep updated records of regular inspections, trainings attended by orkers, equipment faults and repairs, to trace back any issue when required. One Work Procedures: Implement and foster adherence to safe work procedures and guidelines specific to EWPs when working at heights. Emergency Procedure: Establish an easily accessible and understood emergency procedure in case of an incident. This includes clearly signposting emergency exits, first aid kits, and fire extinguishers. 	1L	
2. Ground condition check	Unstable terrain, Buried utilities	ЗН	 Ensure a competent person is appointed to conduct a comprehensive ground inspection prior to any work. To account for unstable terrain, always use stabilisers, outriggers or spreader plates that can distribute the load evenly. Use ground penetrating radar (GPR) and/or seeking advice from utility providers to identify unknown buried utilities. If bad weather conditions or heavy rain that causes unstable conditions, halt operation until condition improves. Provide training and instructions for workers about hazards associated with the unstable ground. Employ the services of professional surveyors when there is doubt about the stability of the ground. 	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Inform all personnel of the location of underground utilities and plans for construction sites.		
			- Prior to commencing work, verify details of both w-ground and above-ground utilities using Dial Before You Dig service.		
			- Cease operations if an unstable or potent or unstable as is encountered, until an alternative solution is devised.		
			- Continuously monitor the platform's level indication during operation so as to ensure stability.		
			- Consider extra support such a limber mats for solution and conditions.		
			- Take into construction partial trenches, evaluations, and slopes while planning the accement of P.		
			- Re-politioning WP if a ground contain changes due to external factors like pollul pills, political on construction traffic.		
			- Developed implement an emergency response plan in case of contact or damage to burie uth. s.		
			- sullai service and maintain the elevating work platform as per manufacturer's instructor		
			mploy a qualified person to conduct regular, detailed inspections for any signs of war, and tear or damage that may have occurred during previous uses.		
			Maintain a thorough record of maintenance and inspection tasks to ensure accountability and history tracking.		
			- Prior to operation, perform a visual check on all aspects of the EWP including hydraulics, fuel levels, emergency stop button, and electrical systems.		
			- Verify brakes, steering mechanisms, warning devices, lights, and tyre condition before starting operation.		
3. Pre-start inspection	Neglected maintenance, issues from previous use	3H	- Check safety devices such as harnesses, guardrails, and safety gates to confirm they are secure and functioning correctly.	2M	
			- If equipment is found faulty during pre-start inspection, tag it 'Out of Service' immediately until repairs can be completed.		
			- Provide comprehensive training to operators on how to conduct a pre-start inspection effectively.		
			- Any identified issues from previous use should be addressed and fixed before usage – never attempt to use defective equipment.		
			- Inspect the work area for potential hazards such as overhead obstructions, ground conditions, and presence of electricity before starting the operation.		
			- Check if the working load limit and rated capacity of the EWP is suitable for the planned task.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P A	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	P		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWI			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting sections.			
Responsible person is assigned and listed on the SWMS for the imperent of contameasures.			
Permit requirements specified, such as Hot Work, Electrical Work, Vorat Heights etc.			
SWMS identifies plant and equipment to be u d.			
Details of inspection checks required for any equipment listed approted on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
