Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS	NALE OF ALL RELEVANT PERSONN EVELOPMENT AND APPROVAL OF	NEL WHO HAVE BEEN CONSULTED AND THIS SWMS	COMMUNICATED TO IN THE
Safety meetings or toolbox talks will be scheduled in according e with egislative requirements to first identify any site hazards, and the to contain the those hazards and then to further take steps to either eliminate or contail each hazard.			
If an incident or a near miss occurs, all work must store and ately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			- Conduct comprehensive training sessions an all personnel involved in fire damage clean-up, focusing on safety procedures and hazard identifice on.	
			- Establish a clear communication plan outlining or a responsibilities, and reporting channels for effective coordination during the clean-up process.	
			- Develop and distribute stand of operating proced as (2 - s) to all workers, ensuring they understand the tasks and associated haza is	
			- Provide adequate personal protective equipment (PPE) such as gloves, masks, eye protection, and flame-resister clothing, subjict to a risk contribution.	
	Inadequate training, Poor		- Ensight that $h \in F$ is requarly inspect, maintained, and in good condition before each use.	
1. Preparation	communication, Lack of personal protective equipment	ЗН	- Assign a rained pervisor or team leader to oversee compliance with safety measures and address any energy a issue immediately.	2M
			- Use signs, but iers, a warnings to mark out designated work areas and potential danger zones within e site.	
			- Implement a buddy system where workers are paired to monitor each other's adherence to safety ractice and provide mutual support.	
			- hedule regular briefings to reinforce safety procedures and update workers on any changes in conditions or new hazards identified.	
			- Conduct pre-work inspections to assess the work environment, identify new hazards not initially considered, and adjust plans accordingly.	
			- Encourage a culture of safety by promoting prompt reporting of hazards or incidents without fear of reprisal, facilitating continuous improvement in safety standards.	
			- Conduct regular maintenance and servicing of all equipment as per manufacturer guidelines to ensure functionality and safety.	
			- Implement a pre-operational equipment check procedure for workers to identify any faults or defects prior to use.	
2. Equipment Check	Faulty equipment, Incorrect use of equipment	ЗН	- Train all workers thoroughly on the correct use of each piece of equipment, including hands-on demonstrations and competency assessments.	2M
			- Use only certified personnel to operate specialised equipment, ensuring that they hold necessary qualifications and experience.	
			- Provide clear operating instructions and safety procedures for each type of equipment in use on-site.	
			- Supply appropriate personal protective equipment (PPE), such as gloves and eye protection, to safeguard against equipment malfunctions.

#### **EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES**

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.

#### SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

#### SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.		
All relevant personnel consulted during the development of the SWMS.	$\boxtimes$	
Name, signature, position and date signed of the person approving the SWMS.		
Specific personnel and qualifications, experience is noted in the SWMS.	7	
Provides a step-by-step process of tasks required to carry out the activity or task.		
Adequate risk assessment of any identified hazards has been completed.		
Foreseeable hazards are identified and documented for each step.	$\boxtimes$	
Any hazards listed in any site risk assessments have been added to the Sλ. S.	$\boxtimes$	
SWMS initial risk (IR) column as well as residual risk (RR) column completed.	$\boxtimes$	
Check control measures added to the SWMS are the most effective sections.	$\boxtimes$	
Responsible person is assigned and listed on the spiral of the spiral entry of control measures.	$\boxtimes$	
Permit or licenses requirements specified, so in as Hot Work, Electrical Work, Work at Heights etc.	$\boxtimes$	
SWMS identifies plant and equipment to be	$\boxtimes$	
Details of inspection checks required for any equipment lister are noted on the SWMS.	$\boxtimes$	
Describes any mandatory qualifications, experience, ang or skills required to perform the work.	$\boxtimes$	
Applicable personal protective equipment is selected on the SWMS.	$\square$	
Reflects and documents any legislative references and/or Australian Standards.	$\boxtimes$	
Identifies any hazardous substances used with specific control measures in line with any SDS.	$\boxtimes$
