Fit Architrave Around Doorway | SAFE WORK METHOD STATEMENT (SWMS)

TASK OR ACTIVITY: Fit Architrave Around Doorway

Business Name:	ABN:	SWMS#
Business Address:		
Contact Person:	Phone:	Email:

THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE PCBU OF THIS PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a safe work method statement (SWMS) is prepared before the proposed work starts.

Full Name:		
Signature:	Title:	Date:

Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS as well as reviews and modifications of the SWMS.

Full Name:	Title:	Phone:

ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS SWMS MUST HAVE THE FOLLOWING COMMUNICATED	NAME OF ALL RELEVANT PERSONNEL WHO HAVE BEEN CONSULTED AND COMMUNICATED TO IN THE DEVELOPMENT AND APPROVAL OF THIS SWMS
Safety meetings or toolbox talks will be scheduled in accordance with legislative requirements to first identify any site hazards, assess risk to communicate those hazards and then to further take steps to either eliminate or control each hazard.	
If an incident or a near miss occurs, all work must stop immediately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.	
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.	
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

ANY HIGH-RISK CONSTRUCTION WORK BEING CARRIED OUT	
☐ involves a risk of a person falling more than 2 meters	☐ is carried out on or near pressurised gas mains or piping
☐ is carried out on a telecommunication tower	☐ is carried out on or near chemical, fuel or refrigerant lines
☐ involves demolition of an element of a structure that is load-bearing	☐ is carried out on or near energised electrical installations or services
☐ involves demolition of an element related to the physical integrity of structures	☐ is carried out in an area that may have a contaminated or flammable atmosphere
☐ involves, or is likely to involve, disturbing asbestos	☐ involves tilt-up or precast concrete
☐ involves structural alteration or repair that requires temporary support to prevent collapse	☐ is carried out on, in or adjacent to a road, railway, shipping lane or other traffic corridor
☐ is carried out in or near a confined space	☐ is carried out in an area of a workplace where there is any movement of powered mobile plant
☐ is carried out in/near a shaft or trench deeper than 1.5 m or tunnel involving use of explosives	☐ is carried out in areas with artificial extremes of temperature.
☐ is carried out in or near water or other liquid that involves a risk of drowning.	☐ involves diving work.

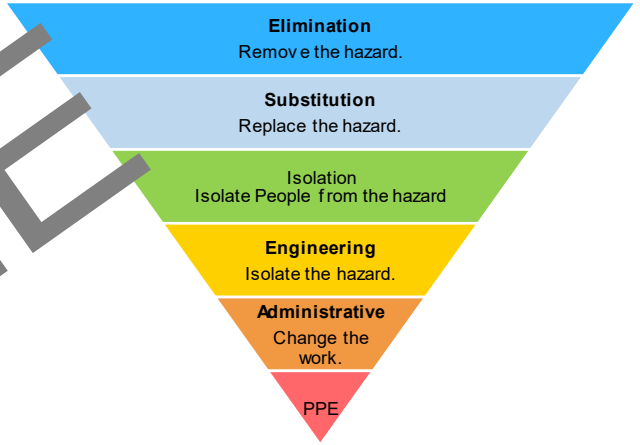
ANY HIGH-RISK MACHINERY OR EQUIPMENT NEARBY

RISK MATRIX

LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE		
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEE
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review befo work starts.
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	2M MODERATE	Ensure control measures in place.
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH	1L LOW	nitor and ke records

Notes on Hierarchy of Controls: Elimination methods are the most effective and preferr en co lling a hazard. Substitution is the second most effective method of controlling a hazard. Engineering by isolation is the most e tive, while Administrative Controls by changing the work is the fourth most effective method. PPE (Personal Prote ve quipm) is the least effective method.

HEIRARCHY OF CONTROLS



PERS NAL P TECTIVE EQUIPMENT (PPE)

Select the appropriate PPE abo suitable for the equipment used or the job task being performed (if applicable).

FOOT PROTECTION	HAND PROTECTION	HEAD PROTECTION	HEARING PROTECTION	EY PROTECTION	RESPIRATORY PROTECTION	FACE PROTECTION	HIGH-VIS CLOTHING	PROTECTIVE CLOTHING	FALL PROTECTION	SUN PROTECTION	HAIR/JEWELLERY SECURED
											
☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐

Other PPE Required:

Permit or Licenses Requirements	Mandatory Qualifications and Training

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Trip hazards, Falls from heights, Electrical hazards	3H, 2M 3H	- Conduct a site inspection to identify and m any trip hazards present, such as loose cords or debris, and ensure they are removed or secured - Use appropriate signage and barriers to hig ht tential trip hazards and guide safe pathways around the work area. - Ensure all workers wear suit le personal protec e equ ment (PPE), including safety boots with non-slip soles, to prevent slips and s. - Utilize step lad s or sc olding th secure f ting and handrails when working at heights to minimise the risk of fa - Inspe t ladde and sca olding before se to ensure they are in good condition and correctly positioned on st groun - Assig a otter o fety observer when working at height to provide assistance and monitor for unsafe condit s. - Make s e all ctrical tools and equipment are inspected for visible damage and tagged as tested and in acte according to Australian standards. - Use p r tools equipped with Residual Current Devices (RCDs) to reduce the risk of electrical shock ile performing trim installation near electrical outlets. - E sure all electric cords are routed away from walkways and work zones to prevent tripping or accidental disconnection during work tasks. - Provide training for workers on electrical safety and proper handling of tools around live circuits to promote awareness and accountability. - Allow only qualified personnel to perform tasks involving electrical connections and modifications to prevent hazardous exposure to electricity. - Review and revise Safe Work Method Statement (SWMS) regularly to incorporate new safety practices and maintain compliance with regulatory standards.	1L, 1L, 2M
2. Measure and Mark	Eye injuries, Cuts or abrasions	3H, 3H	- Provide and wear appropriate personal protective equipment, including safety glasses, to protect against dust and debris. - Ensure measuring tools are in good condition and free from defects to avoid inaccuracies that could lead to improper cuts or adjustments. - Use a sharp pencil rather than a pen or marker for precise marking, reducing the need for repetitive motions that could cause strain. - Keep fingers clear of the tape measure's recoil mechanism to prevent injuries when retracting. - Maintain proper body posture and ergonomic positioning while measuring and marking to reduce the risk of muscular strain.	1L, 2M

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			- Ensure adequate lighting in the workspace to improve visibility and accuracy when marking measurements. - Temporarily cover or remove sharp edges or obi[illegible] in the work area to prevent accidental cuts or abrasions during marking. - Conduct regular tool inspections and ma[illegible]enance chec[illegible] to ensure all devices are functioning correctly and safely. - Use measuring tapes and straightedges with [illegible]ure grips or n[illegible]-slip surfaces to maintain control over the tools. - Before commencing, verify tha[illegible]he workspace aro[illegible]oorways is clear of obstacles to prevent trips or falls. - Train worke[illegible]n the corre[illegible]use of [illegible]ls and [illegible]uipment used for measuring and marking to ensure safe and efficient [illegible]ctice. - Esta[illegible]h a cle[illegible] co[illegible]unication channel among team members to coordinate signals or instructions when [illegible]ting wi[illegible]onger measurements.	
3. Cutting Architrave	Dust inhalation, Noise exposure, Machinery accidents	3H, 4A, 4A	- Ensur[illegible]all w[illegible]kers ha[illegible] been trained in safe use of machinery and personal protective equipment PE). - Pro[illegible]a[illegible]ppropriate respiratory protection masks that meet Australian standards for dust control. [illegible]mplement a regular maintenance schedule for all cutting equipment to ensure it is in proper working o[illegible]r. - Utilize saws with built-in dust extraction systems or attach portable vacuums to collect dust at the source. - Limit exposure time by rotating tasks among workers and scheduling regular breaks. - Require mandatory hearing protection, such as earplugs or earmuffs, when using loud equipment. - Securely fasten architraves in place before cutting to prevent kickback or accidents involving loose materials. - Barricade or rope off work areas where machinery is in operation to restrict access to authorized personnel only. - Inspect PPE regularly for wear and tear, replacing items as necessary to maintain effectiveness. - Establish clear communication signals between team members during machinery operation. - Keep an organised workspace to minimise tripping hazards and ensure clear access to emergency stop controls on machines. - Post signage to remind workers of PPE requirements and machine safety protocols around the work area.	2M, 1L, 2M
4. Sanding and Finishing	Dust inhalation, Skin irritation, Eye injuries	3H, 2M, 3H	[redacted]	1L, 1L, 2M

EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

SAFE WORK METHOD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remains effective and must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and sub-contractors who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

1. Spot Checks.
2. Consultation with workers, contractors and sub-contractors.
3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.	☒	
All relevant personnel consulted during the development of the SWMS.	☒	
Name, signature, position and date signed of the person approving the SWMS.	☐	
Specific personnel and qualifications, experience is noted in the SWMS.	☒	
Provides a step-by-step process of tasks required to carry out the activity or task.	☒	
Adequate risk assessment of any identified hazards has been completed.	☒	
Foreseeable hazards are identified and documented for each step.	☒	
Any hazards listed in any site risk assessments have been added to the SWMS.	☒	
SWMS initial risk (IR) column as well as residual risk (RR) column completed.	☒	
Check control measures added to the SWMS are the most effective solutions.	☒	
Responsible person is assigned and listed on the SWMS for the implementation of control measures.	☒	
Permit or licenses requirements specified, such as Hot Work, Electrical Work, Work at Heights etc.	☒	
SWMS identifies plant and equipment to be used	☒	
Details of inspection checks required for any equipment listed are noted on the SWMS.	☒	
Describes any mandatory qualifications, experience, training or skills required to perform the work.	☒	
Applicable personal protective equipment is selected on the SWMS.	☒	
Reflects and documents any legislative references and/or Australian Standards.	☒	
Identifies any hazardous substances used with specific control measures in line with any SDS.	☒
