THIS SAFE WORK METHOD	STATEMENT IS APPROV D BY	THE PC. OF THE ROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduthe proposed work starts.	cting a business or und thing (Pu V) is	required to element had a safe work method	statement (SWMS) is prepared before
Full Name:			
Signature:	NY	Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring	compliant e of the SWIL as well as re	eviews and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS VMS HAVE THE FOLLOWING COMMUNICATED	NA. 2 OF ALL RELEVANT PERSONN EVELOPMENT AND APPROVAL OF	IEL WHO HAVE BEEN CONSULTED AND (THIS SWMS	COMMUNICATED TO IN THE
Safety meetings or toolbox talks will be sched ed in accorde with regislative requirements to first identify any site hazards, to construct the those hazards and then to further take steps to either eliminate or conclude ach hazard.			
If an incident or a near miss occurs, all work must stead dately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Slips, trips and falls, Kick back from animals, Exposure to diseases	2M	 Conduct a site inspection to identify potential hazards and implement corrective actions before work begins. Use non-slip footwear and ensure walkways are car of obstacles to reduce the risk of slips, trips, and falls. Provide adequate training to arkers on animal by avior and handling techniques to minimise kickback injuries. Maintain a satisfance om the lear end of lestock to avoid unexpected kicks. Implement to use of batiers or fellored securely contain animals during handling. Ensurall work as your appropriate personal protective equipment such as gloves and long sleeves to preve the ease to osure. Isolate any lick annuals promptly to prevent the spread of contagious diseases. Develor and disease of provided the provided the handling process to mitigate disease risks. Inducate workers on zoonotic diseases, symptoms, and prevention techniques relevant to their role. Execurage good hygiene practices, including hand washing and the use of hand sanitisers after contact with livestock. Schedule regular rest breaks to prevent fatigue-related accidents that may lead to slips or improper judgment while handling animals. Keep communication tools readily accessible for notifying supervisors immediately in case of an incident. 	1L
2. Proper handling training	Inadequate supervision or training, Poor working conditions	3Н	 Conduct thorough and regular training sessions to ensure all workers are well-versed in proper livestock handling techniques, addressing both new employees and refresher courses for existing staff. Implement a mentorship system where experienced handlers supervise and guide less experienced workers, providing real-time feedback and support for safe practices. Develop clear, accessible training materials that cover safe foot handling processes, including videos, manuals, and diagrams to accommodate different learning preferences. Ensure the workplace environment where training occurs is optimally lit and well-organised to reduce the risk of accidents during practice sessions. Regularly review and update training programs to include the latest safety standards and techniques in livestock handling, ensuring ongoing compliance with industry best practices. Perform skills assessments post-training to evaluate understanding and proficiency in safe handling procedures, offering additional training opportunities as needed. 	2M

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			- Introduce a clear communication protocol that allows workers to easily report inadequacies or hazards they encounter in their work environment, leading to timely interventions.	
			- Equip trainers with appropriate skills not only in the stock handling but also in teaching methods that cater to a diverse workforce with varying expension levels.	
			- Establish standard operating procedure SOPs) specially focused on minimising the risk of injury during foot handling by describing step-by-top methods proven to be effective.	
			- Utilise simulation exercises and role-playing searios during training to better prepare handlers for real-world situations, enhancing their ability to response correctly dynamic conditions.	
			- Monitor the working condition a gularly to identify sociify any issues such as inadequate ventilation, slippery floors, or the specific that could composite the effectiveness of training and potentially lead to mishar ang.	
			- Enamall equamer* segularly main ained and serviced according to the manufacturer's guidelines.	
			- Con to re-use spections of equipment to identify any signs of damage or wear and tear.	
	Equipment failure of cantum con, Incorrectly made of maintained equipment		- Keep log lok foll cording maintenance schedules and inspection results for each piece of equipm it.	
			- in we kers or roper equipment handling and operational techniques specific to livestock handling scene is	
			implement a reporting procedure for faulty or malfunctioning equipment so repairs can be addressed populy.	
		2M	Use only equipment that is specifically designed and suitable for foot handling with livestock.	
3. Equipment check			- Store equipment in a clean, dry location to prevent deterioration from environmental factors.	1L
			- Consult with equipment manufacturers or suppliers for advisory services to ensure appropriate use and maintenance.	
			- Install safety guards or barriers where applicable to minimise the risk of injury during equipment operation.	
			- Establish emergency communication protocols in case of equipment failure, ensuring workers can quickly contact support staff.	
			- Ensure spare parts are readily available on-site to address minor repair needs without significant downtime.	
			- Regularly review and update existing Standard Operating Procedures (SOPs) relating to equipment use in line with the latest safety standards and practices.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

SAFE WORK IN 'THIS 'S' ITEM ON MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remain effect, and must be reviewed (and revised if necessary) if relevant control measures are revised. The view as should be carried out in consultation with workers (including contractors as unputractors of the SWMS and their health and safety registeratives who represented that work group at the workplace.

When the SWMS has been revised the PCBD mest ensure the advised that a revision has been made and how they can accept the revised SWMS, including all persons who will need to change a work procedure or system as a remotified the review are advised of the changes in a way that will enable them to implement their duties the thing with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- Spot Checks.
- Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.		
All relevant personnel consulted during the development of the SWMS.		
Name, signature, position and date signed of the person approving the SWMS.		
Specific personnel and qualifications, experience is noted in the SWMS.	7	
Provides a step-by-step process of tasks required to carry out the activity or task.		
Adequate risk assessment of any identified hazards has been completed.		
Foreseeable hazards are identified and documented for each step.		
Any hazards listed in any site risk assessments have been added to the SV 5.		
SWMS initial risk (IR) column as well as residual risk (RR) column ampleted.		
Check control measures added to the SWMS are the most effer ve secutions.		
Responsible person is assigned and listed on the splenetation of control measures.		
Permit or licenses requirements specified, so n as Hot Work, Electral Work, Work at Heights etc.		
SWMS identifies plant and equipment to be		
Details of inspection checks required for any equipment lister are noted on the SWMS.		
Describes any mandatory qualifications, experience, and or skills required to perform the work.		
Applicable personal protective equipment is selected on the SWMS.		
Reflects and documents any legislative references and/or Australian Standards.		
Identifies any hazardous substances used with specific control measures in line with any SDS.
