THIS SAFE WORK METHOD	STATEMENT IS APPROV D BY		
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or und $ring (P = V)$ is	required to end of that a safe work method	statement (SWMS) is prepared before
Full Name:			
Signature:	NX	Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring	compliance of the SWI, was well as re	views and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS HAVE THE FOLLOWING COMMUNICATED	NALE OF ALL RELEVANT PERSONN EVELOPMENT AND APPROVAL OF	EL WHO HAVE BEEN CONSULTED AND THIS SWMS	COMMUNICATED TO IN THE
Safety meetings or toolbox talks will be schedued in according with regislative requirements to first identify any site hazards, and the to further take steps to either eliminate or contail each hazard.			
If an incident or a near miss occurs, all work must stude undiately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Equipment failure, poor communication	ЗН	 Conduct regular equipment inspections, so maintenance checks before commencing operations. Ensure all personnel are adequately traine on the uncorf forestry equipment and understand operational protocols. Provide a comprehensive offety briefing outlines potential azards and emergency procedures. Equip all workers with two-was readios or other release ammunication devices to maintain constant contact. Implement are oust system for reporting and coaressing equipment malfunctions or defects immediately. Establish clear communication characterian standard operating procedures for all tasks. Use to age an usual aids to indicate hazardous areas and delineate work zones effectively. Develop to emerging the sponse plan, including evacuation routes and assembly points, that is well understood shall personnel. Source first of kit and trained first aid responders are available on site. Source furst of kit and trained first aid responders are available on site. Source a culture of safety where workers feel comfortable reporting hazards without fear of reprisal. 	2М
2. Site Induction	Slips/trips/falls, inadequate knowledge of hazards	ЗН	 Conduct pre-induction site inspections to identify and mitigate potential hazards. Provide comprehensive site induction training covering specific hazards and safety protocols. Issue Personal Protective Equipment (PPE) including safety boots, high visibility clothing, gloves, and helmets. Install clear signage indicating potential hazards such as uneven ground or areas where slips and trips may occur. Establish a safe walking route within the site and make sure it is well-lit and free from obstructions. Ensure all workers are familiar with emergency procedures and evacuation routes. Utilize buddy systems to ensure no worker is left alone during high-risk tasks. Implement a communication plan that includes the use of radios or mobile phones for real-time hazard reporting. Develop and distribute an induction handbook specific to the site detailing all known hazards and control measures. Schedule regular toolbox talks focused on hazard awareness and prevention techniques. Maintain an up-to-date hazard register that is accessible to all employees. Conduct refresher inductions at regular intervals and whenever significant changes occur on -site. 	2М

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.		
All relevant personnel consulted during the development of the SWMS.	\boxtimes	
Name, signature, position and date signed of the person approving the SWMS.		
Specific personnel and qualifications, experience is noted in the SWMS.	7	
Provides a step-by-step process of tasks required to carry out the activity or task.		
Adequate risk assessment of any identified hazards has been completed.		
Foreseeable hazards are identified and documented for each step.	\boxtimes	
Any hazards listed in any site risk assessments have been added to the Sλ. S.	\boxtimes	
SWMS initial risk (IR) column as well as residual risk (RR) column completed.	\boxtimes	
Check control measures added to the SWMS are the most effective sections.	\boxtimes	
Responsible person is assigned and listed on the spiral of the spiral entry of control measures.	\boxtimes	
Permit or licenses requirements specified, so in as Hot Work, Electrical Work, Work at Heights etc.	\boxtimes	
SWMS identifies plant and equipment to be	\boxtimes	
Details of inspection checks required for any equipment lister are noted on the SWMS.	\boxtimes	
Describes any mandatory qualifications, experience, ang or skills required to perform the work.	\boxtimes	
Applicable personal protective equipment is selected on the SWMS.	\square	
Reflects and documents any legislative references and/or Australian Standards.	\boxtimes	
Identifies any hazardous substances used with specific control measures in line with any SDS.	\boxtimes
