requirements to first identify any site hazards, conduction inical those	NAME	SIGNATURE	DATE	
on the severity of the incident, a meeting will be called with all workers to amend				
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON													
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON													
			- Conduct a thorough inspection of the work site to identify potential hazards, such as uneven surfaces or loose objects that may lead to bips and trips.															
			- Provide and maintain appropriate personal projective equipment (PPE), such as safety shoes with slip-resistant soles, to minute the risk of slipping on wet or slippery surfaces.															
			- Clearly mark any temporary cords or hoses in the across pathways, and secure them appropriately to avoid creating tripping haz 1s.															
			- Designate and clearly mark a signated walkways of at us, ensuring they remain free from obstruction of debring that times.															
			- Implement a coular hous peepin, chedule to usure work areas are kept clean and tidy, red tog the likeli od of sl, trip and falls.															
			- Ensuradequalight ons provided in all areas of the worksite, especially in high traffic as and the there are known hazards.															
		2М	- Provide a propriate parricading and cordoning off of potentially risky areas (e.g., excaval ons) porevel an authorised personnel from entering and risking injury from falling on ects.															
1. Preparation	Slips and trips, Falling objects		2M	- Not we ters outproper lifting techniques and safe handling of materials, and provide the necessary tools and equipment for handling heavy objects to minimise a risk or terms being dropped.	1L													
																- The materials and equipment safely and securely, using racking systems where appropriate, to reduce the chance of accidents caused by falling objects.		
	G			<ul> <li>Implement a strict "no throwing" policy on the work site and emphasise the importance of careful handling and passing of materials to reduce the risk of accidents from falling items.</li> </ul>														
					-										- Provide tool lanyards and tethering devices for all handheld tools used on elevated platforms, to help prevent tools from accidentally falling and causing injury to workers below.			
										- Encourage workers to communicate openly and proactively report potential hazards or incidents, allowing for timely corrective actions to be taken, reducing risks throughout the workplace.								
			<ul> <li>Implement a clear hierarchy of responsibility and assign accountability for addressing potential hazards in the workplace, ensuring that remediation actions are promptly taken.</li> </ul>															
			- Regularly review and update the Safe Work Method Statements (SWMS) specific to the worksite, ensuring that all control measures remain applicable and effective in minimising risks associated with slips, trips, and falling objects.															
2. Site Setup	Electrocution, Traffic accidents	ЗН	<ul> <li>Ensure all electrical equipment is regularly inspected, tested, and tagged by a qualified electrician to minimise the risk of electrocution.</li> </ul>	2M														

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Install safety barriers and/or traffic control devices around the work site to prevent unauthorised access and potential traffic accidents.		
			- Conduct regular site inspections to identify any provinazards or changes in conditions that may pose a risk to workers or the public and react accordingly.		
			- Provide training to all workers on proper to ipment user of handling, as well as emergency response procedures for electric, incident or traffic accidents.		
			- Keep the work site clean and organised to minuse the risk of tripping, slipping, or coming into contact with haz yous materials or exposed live uses.		
			- Implement a safe work zone to "ic management productakes into consideration the movement of the concentration between the site.		
			- Encourage s of to report only potential of ands, incidents, or near misses immore ely sole y care ele addressed and resolved to maintain a safe working envirt		
			- Proving a propriate personal protective equipment (PPE) for all workers, including high visuality orthing, actrical insulating gloves, steel-toed boots, and safety belmets.		
	1		- E bliss an effective communication system, including radio communication between wrkers, supervisors, and spotters to promote awareness and sparedness for any potential hazards or emergencies.		
			- coate a designated walkway or travel path for workers and visitors to follow when navigating the work site, ensuring it's clear of obstructions, well-lit, and marked with appropriate signage.		
			- Ensure heavy machinery operators are licensed, trained and competent in operating equipment safely within their designated work area.		
			- Develop an emergency response plan that outlines the correct procedures to follow in the event of an incident, such as first-aid treatment, contacting emergency services, and evacuation plans.		
			- Adhere to all relevant local, state, and federal regulations and guidelines regarding workplace health and safety, encouraging a culture of compliance and responsibility within the work site.		
			- Proper equipment training: Ensure all workers involved in material handling are trained and competent to operate the necessary equipment safely.		
3. Material Handling	Manual handling injuries, Struck by moving equipment	ЗH	<ul> <li>Implement correct lifting techniques: Encourage employees to follow proper lifting procedures, such as bending the knees and keeping the back straight to prevent injuries.</li> </ul>	1L	
			- Use appropriate tools and equipment: Provide and maintain suitable mechanical aids and tools for handling materials, such as trolleys, pallet jacks, and forklifts, to reduce manual handling risks.		

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Inspect equipment regularly: Regular inspection and maintenance of material handling equipment should be conducted to ensure its safe operation and to identify any potential hazards.		
			- Clear and unobstructed work areas: Keep we careas clean and free from obstacles that could cause tripping or collicities during material handling tasks.		
			- Utilise adequate personal protective equipment (PP <sup>+</sup> Ensure that all workers wear proper PPE, such as gloves, safety boots and such as diverses, to minimise injury risks during material handling tasks.		
			- Establish designated traffic reces: Create specifice three s for both pedestrians and moving equipment reductive risk of accidents in olving workers struck by machinery or vehicles.		
			- Limit manual handling: Wore possing fire cays to eliminate or minimise manual handling tasks ogether rimplement cautomated or mechanised systems.		
			- Safe the practice of evelop and enforce safe work practices for loading, unload g, bd stol materials to minimise the potential for accidents and injuries.		
			- Monite and control hand weight: Ensure that materials being handled do not exceed to a machine load capacity of equipment or the physical limitations of heres.		
			Disp. prining signs and markings: Post clear and visible signs to warn workers potentis mazards related to handling materials and operating equipment.		
			- In intain communication: Promote effective communication among workers to ensure awareness of material handling tasks and possible hazards.		
			- Encourage incident reporting: Encourage workers to report any issues, near misses, or incidents that occur during material handling tasks for timely response and corrective action.		
			- Regularly review and update SWMS: Assess the effectiveness of the control measures in place and revise the Safe Work Method Statement (SWMS) as needed to ensure continuous improvement and ongoing safety compliance.

#### **EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES**

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.

#### SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

#### SAF WC A STHUD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to revised if necessary) if relevant control measure are subcontract of the SWMS and their health and safety representatives who reworkplace.

ke sure it remains effective and must be reviewed (and acception of the process should be carried out in s any subcontract s) who may be affected by the operation esentatives who recented that work group at the

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- 1. Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

#### SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.			
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWh			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effectine sections.			
Responsible person is assigned and listed on the SWMS for the impement of continue measures.			
Permit requirements specified, such as Hot Work, Electrical Work, Vortat Heights etc.			
SWMS identifies plant and equipment to be up t.			
Details of inspection checks required for any equipment listed at noted on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
