THIS SAFE WORK METHOD	STATEMENT IS APPRO	THE PC. OF THE ROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conductive proposed work starts.	icting a business or under thing (Pool V) is	required to entry of that a safe work method	statement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitorin	compliance of the SWI, was well as re	eviews and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS HAVE THE FOLLOWING COMMUNICATED	NALE OF ALL RELEVANT PERSONN EVELOPMENT AND APPROVAL OF	IEL WHO HAVE BEEN CONSULTED AND FITHIS SWMS	COMMUNICATED TO IN THE
Safety meetings or toolbox talks will be schedued in according e with egislative requirements to first identify any site hazards, and the to contain the those hazards and then to further take steps to either eliminate or contail each hazard.			
If an incident or a near miss occurs, all work must successful adiately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

			- Use high visibility clothing for all personnel to enhance visibility and avoid accidents involving moving vehicles.	
			- Limit the load capacity to manageable weights the dimensions to prevent overexertion and potential injuries.	
			- Schedule regular breaks to prevent fatigue related incidents and maintain alertness while handling glass materials.	
			- Provide personal protective equipment (PPE) an as gloves, rafety glasses, and steel-capped boots to protect against cuts and for enjuries.	
			- Ensure all collection vehicles are maintained in group orking order, with reverse warning systems functional to alert many worker.	
			- Carry out prostart safety necks of all equiverent used in the collection process to identify and mitigate any risks between the safety of th	
			- Provide imprensive training for all staff on the identification and handling of different types of glass and potent contain that ants.	
	Exposure to harmful substances, C		- Equipt orke with a copriate personal protective equipment (PPE) including cut-resistant gloves, fety glorgles, and long-sleeve shirts to prevent cuts and exposure to harmful substances.	
			- Impute t colour-coded bins and clear signage to assist in the efficient sorting of glass by type and plour, the cing the risk of mistakes and contamination.	
		44	- e mechanical aids such as adjustable conveyors to reduce manual handling and exposure to broken glass.	
			- Conduct regular health and safety audits to ensure compliance with WHS regulations and to identify areas for improvement in the sorting process.	
3. Sorting and Grading			- Establish a well-maintained first aid station nearby the sorting area, equipped to deal with cuts and exposure to contaminants, including eye wash stations.	3H
<u> </u>	injuries		- Ensure that the work environment is well ventilated to minimise workers' exposure to potentially harmful dust and small particles.	
			- Schedule frequentbreaks for workers involved in sorting to reduce fatigue and maintain high levels of alertness.	
			- Provide ongoing health monitoring for workers, including regular checks for respiratory issues or skin conditions resulting from exposure to glass dust or other harmful substances.	
			- Apply clear protocols for immediate reporting and response to any incidents or injuries, including detailed procedures on how to handle and dispose of broken glass safely.	
			- Enforce strict cleanliness and maintenance regimes in the sorting area to reduce the build-up of waste materials that could pose health risks.	
			- Train and require staff to practice proper handwashing techniques after handling glass and before breaks to decrease the risk of contamination.

#### SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

#### SAFE WORK THE S ATEM AT MONITORING AND REVIEW The SWMS must be reviewed regularly to make sure it remain effect. and mu be reviewed (and The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are revised if necessary) if relevant control measures are revised. The s should be carried out in effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The view consultation with workers (including contractors person responsible for monitoring the effectiveness of the Safe Work Method Statement should ntractors nay be cted by the operation of the SWMS and their health and safety representatives who rep sented that work group at the employ a multi-faceted approach which includes but is not limited to: workplace. 1. Spot Checks. When the SWMS has been revised the PCBU must ensure the all versons involved with the work are 2. Consultation with workers, contractors and sub-contractors. advised that a revision has been made and how they can acce the revised SWMS, including all persons 3. Internal audits on a continual basis who will need to change a work procedure or system as a reof the review are advised of the changes in a way that will enable them to implement their duties ntly with the revised SWMS. All workers that An approach of continuous improvement, promptly recording inconsistencies or deficiencies, will be involved in the work must be provided with the relevant information and instruction that will assist followed up by immediate corrective action and consultation with all relevant personnel ensures them to understand and implement the revised SWMS. that the PCBU is consistently developing ever-improving systems of safe work principles.

#### SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS	
The company details have been entered, including the project name and address.			
All relevant personnel consulted during the development of the SWMS.	$\boxtimes$		
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	7		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.	$\boxtimes$		
Any hazards listed in any site risk assessments have been added to the Sλ. S.	$\boxtimes$		
SWMS initial risk (IR) column as well as residual risk (RR) column completed.	$\boxtimes$		
Check control measures added to the SWMS are the most effective sections.	$\boxtimes$		
Responsible person is assigned and listed on the spiral of the spiral entry of control measures.	$\boxtimes$		
Permit or licenses requirements specified, so in as Hot Work, Electrical Work, Work at Heights etc.	$\boxtimes$		
SWMS identifies plant and equipment to be	$\boxtimes$		
Details of inspection checks required for any equipment lister are noted on the SWMS.	$\boxtimes$		
Describes any mandatory qualifications, experience, ang or skills required to perform the work.	$\boxtimes$		
Applicable personal protective equipment is selected on the SWMS.	$\square$		
Reflects and documents any legislative references and/or Australian Standards.	$\boxtimes$		
Identifies any hazardous substances used with specific control measures in line with any SDS.	$\boxtimes$
