THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY 1	THE PL OF THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	eting a business or undertaking (N=3U) is	required to ure at a safe work method s	tatement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring a	ompliance of the SWMS well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A CO. MUNICATED TO IN THE DEVELO	LL RELEVANT PERSONNEL WHO HAVE BI PMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched ed in accordance with egislative requirements to first identify any site hazards, conditions those hazards and then to further take steps to either the conditions of the conditions are or conditional talks.	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must standardly. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

**Note:** A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Slips, trips and falls, electrical hazards	2M	- Ensure the work area is clean, tidy, and free from any obstacles or debris that may pose slip, trip, or fall hazards.  - Verify that all electrical wiring and outlets in the area are properly installed, insulated, and maintained to prevent any et arical risks.  - Provide appropriate personal protective equipment (fine) for workers, such as slip-resistant shoes and rubber gloves for added given electrical insulation.  - Implement a buddy system gong staff, where to ployees or assist each other throughout the glass-washing, picess, ensuring every procedures and practical clearly marks a wet floors with having signs to turn workers and notify them of potential slip exards.  - Clearly marks a wet floors with having signs to turn workers and notify them of potential slip exards.  - Instead on-slip porior matting around we glasswasher area to minimise the risk of slippins.  - Regularly spect a a maintain the glasswasher equipment to ensure that it is in proper to briting condition, eliminating unforeseen risks while in operation.  - Train stof on site manual handling techniques for carrying heavy loads or items (e.s. statis of glasses) during preparation, helping to reduce the risk of falls or injurite.  - Initimise the use of electrical extension cords, which can pose trip hazards; if they must be used, secure them properly and do not let cords cross walkways.  - Implement a regular schedule to inspect the work environment for any emerging risks, recording the findings and addressing issues promptly.  - Enforce strict adherence to cleaning schedules and procedures for the glasswasher machine, to ensure its ongoing efficient performance and avoid unexpected shutdowns or injuries during operation.  - Establish clear channels for staff to communicate any identified hazards or concerns to management for immediate attention and resolution.  - Post written instructions for safe and proper use of the glasswasher in a clearly visible location near the equipment, allowing easy access for staff members when needed.	1L	
2. Check Glasswasher	Leaks, damaged parts, improper installation	3Н	- Conduct a thorough visual inspection of the glasswasher, paying attention to any signs of leaks, damaged parts, or improper installation before starting the operation Implement a regular maintenance schedule for the glasswasher, with prompt servicing and replacement of damaged components as needed Ensure that all staff operating the glasswasher are trained in proper use, handling procedures, and understanding of hazards associated with the equipment.	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Install appropriate signage around the glasswasher area, clearly highlighting potential hazards and the steps required to mitigate risks.		
			- Keep the workspace surrounding the glasswasher tean and free of debris to minimise accidents caused by slippery surface to leaks.		
			- Encourage open communication between aff member in any concerns or issues they may experience while using the glasswaper, all long for proactive hazard identification and rectification.		
			- Utilise drip trays or absorbe mats beneath the sswash contain minor leaks and avoid the creation of hazar us wet surfaces.		
			- Always consult the man acture quidelines regarding correct installation, usage, and operations arameter opens the glass wher is utilised as intended.		
			- Periodically adduct refresher training crowns for staff members to reinforce their under anding page rating procedures and risk mitigation strategies related to the glass pasher.		
			- Perform the sand publishooting procedures prior to the commencement of each work shaped to be be believed and addressing any operational or safety issues that may imply de the machine's performance.		
			a responsible individual on-site to regularly monitor and maintain the hygien. I functionality of the glasswasher, ensuring it operates within the escribed safety protocols.		
			- In element an easily accessible incident reporting system for employees to report any near-misses or incidents with the glasswasher, allowing management to identify trends and further improve workplace safety measures.		
			- Personal Protective Equipment (PPE): Ensure that all workers wear appropriate PPE, such as safety gloves and closed-toe shoes, to protect themselves from accidental cuts due to broken glass.		
			- Glass Inspection: Before loading the glasses into the washer, visually inspect them for any signs of damage or cracks. If found, immediately dispose of these glasses in a designated waste container to avoid mixing them with unbroken glassware.		
3. Load the Glasses	Broken glass, heavy lifting	2M	- Lifting Techniques: Train employees on proper manual handling techniques to minimise the risk of injury while lifting heavy trays or loads. This includes using both hands, bending at the knees, and keeping the load close to their bodies.	1L	
			- Pre-load Organising: Organise and stack glasses in an orderly fashion before placing them in the washer, which will help reduce the likelihood of breakage and make it easier for employees to load the items without injury.		
			- Use Trays: Encourage employees to use trays when transporting multiple glasses to and from the glasswasher to decrease the risk of dropping or breaking the glasses during transport.		

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul> <li>Adequate Lighting: Ensure that there is sufficient lighting around the glasswasher areas to help workers spot and remove broken glass effectively while minimising the risk of injury.</li> </ul>		
			- Employee Training: Regularly train employees a how to operate the glasswasher safely, including the proper loading process use of machine settings, and maintenance requirements.		
			- Signage: Place clear signage around the glasser area to remind workers of proper procedures and potential hazards associated with loading glasses.		
			- Glassware Storage: Impleme safe storage pract of glassware near the glasswasher area, some place fragile items on low shelves to minimise the risk of breakage and coldents.		
			- Regular Ma enance: Co Luct rous met anance checks on the glasswasher to ensure its fund chality, promising the long glass breakage during the washing cycle		
			- Incidents porting reate a system for employees to report any incidents involving broken last heavy fting injuries, allowing management to evaluate and address any recting ues of zards.

#### SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

	SAF WO A STHED STATEMENT MONITORING AND REVIEW							
The SWMS must be reviewed regularly to the ke sure it remains effective and must be reviewed (and revised if necessary) if relevant control measure and a subcontract as a process should be carried out in consultation with workers (including contractors and subcontract as) who may be affected by the operation of the SWMS and their health and safety representatives who researched that work group at the workplace.  When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.			The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:  1. Spot Checks. 2. Consultation with workers, contractors and sub-contractors. 3. Internal audits on a continual basis.  An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

### SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	P		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWh			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting so tions.			
Responsible person is assigned and listed on the SWMS for the imperent of continue assures.			
Permit requirements specified, such as Hot Work, Veralt Heights etc.			
SWMS identifies plant and equipment to be u d.			
Details of inspection checks required for any equipment listed are noted on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
dentifies any hazardous substances used with specific control measures in line with any SDS.
