Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS VMS HAVE THE FOLLOWING COMMUNICATED	NA. 2 OF ALL RELEVANT PERSONN EVELOPMENT AND APPROVAL OF	IEL WHO HAVE BEEN CONSULTED AND THIS SWMS	COMMUNICATED TO IN THE
Safety meetings or toolbox talks will be scheduled in according with regislative requirements to first identify any site hazards, to continuing the those hazards and then to further take steps to either eliminate or con			
If an incident or a near miss occurs, all work must stead dately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			- Ensure that all workers involved in the target properly trained and competent in handling tools and equipment for soldering copper pipes.	
			- Conduct a thorough risk assessment of the the transfer of identify any unsupported structures, and ensure they are adequately braced or supported before commencing york.	
			- Use appropriate personal practive equipment (i, E), it ading gloves, safety glasses, and protective clothing, to minimise the risks a pociated with mish along tools and exposure to heat.	
			- Inspect all toget and equipment part to use to sure they are in good working condition and suitable for the task.	
1. Preparation	Unsupported structures, mishandling of tools	2M	- Estatesh a cite of and confidence of an ised work environment, removing any unnecessary materials or debris that could be tribute to cards.	1L
	IOUS		- Imple en slear or munication procedures, ensuring all workers are aware of their roles and responsibility during the preparation phase.	
			Use appropriate barriers or signs to cordon off the work area and prevent unauthorised personnel from exercing tring to soldering process.	
			Ensure there is a fire extinguisher or other fire suppression equipment readily available in case of cidental ignition during hot works.	
			- Unise adjustable workbenches or supports to secure copper pipes, preventing movement that could esult in improper joins or tool mishandling.	
			- Review and follow the manufacturer's instructions and safety guidelines for all tools and soldering equipment to ensure safe usage.	
			- Ensure all equipment is properly secured and stable before starting the job to prevent movement during operation.	
			- Inspect all electrical cords and connections for damage or wear before use, replacing any that are faulty or frayed.	
2. Equipment Set Up	Unsecured equipment, risk of electric	3H	- Use only outdoor-rated extension cords and power tools if working in open areas or conditions that might expose them to weather.	1L
2. Equipment Set Op	shock	311	- Always connect electrical tools to a safety switch (residual current device) to reduce the risk of electric shock.	
			- Position soldering equipment away from flammable materials and liquids to prevent fire hazards.	
			- Verify that power supply points are readily accessible and can be shut off quickly in case of an emergency.	
			- Provide adequate ventilation in the work area to disperse fumes generated during the soldering process.	

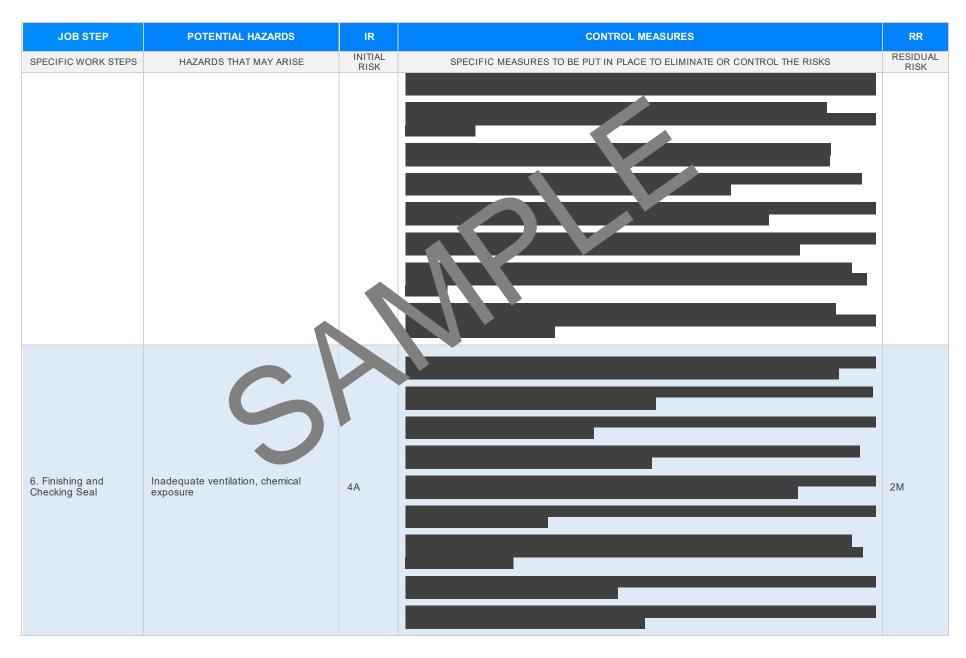

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			- Familiarise yourself with equipment operating manuals and ensure you understand all warnings and safe operation procedures.	
			- Wear appropriate personal protective equipment as insulated gloves and safety goggles to protect against potential burns and eye injury.	
			- Conduct a pre-operation inspection che st on all so ring and electric equipment to identify any potential faults.	
			- Implement barricades or warning signs around the work area to prevent unauthorised personnel from entering.	
			- Maintain a clean and organis workspace to average pring hazards and allow quick access to emergency equipment.	
			- If using gar owered sold ing too ensure sey are checked for leaks and maintained according to the manufacture, instruction	
			- Ens. all won solved in the set-up process are trained in recognising electrical hazards and emergen, processes.	
			- Conduit a provork sucty briefing to ensure all workers understand the potential hazards and required fety measure.	
			- Ens. tworkers are equipped with appropriate PPE, including heat-resistant gloves, safety goggles, ng-slevel dictoring, and respiratory protection if necessary.	
			- pect all soldering tools before use for signs of wear or damage, such as frayed cords, loose connections, or broken components.	
			- Regularly maintain and certify all equipment used for hot works to prevent malfunction or failure during operation.	
			- Establish a designated safe area for tool inspection and testing away from flammable materials to prevent accidental ignition.	
3. Safety Checks	Inadequate PPE, defective tools	3H	- Implement a tagging system to identify defective tools and remove them immediately from service until they are repaired or replaced.	2M
			- Provide easily accessible fire extinguishers and other firefighting equipment near the worksite and ensure that workers are trained in their use.	
			- Designate a fire watch individual to monitor for sparks, flames, or smoke during hot work activities and for an adequate amount of time after completion.	
			- Confirm that ventilation systems are operational and effective in removing fumes and airborne particles generated by soldering.	
			- Establish secure boundaries with signage and barriers to restrict access to authorised personnel only within the hot works area.	
			- Instruct workers never to leave active solder irons unattended and to switch off and unplug equipment when not in use.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature		Date

SAFE WORK IN 'THIS 'S' ITEM ON MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remain effect, and must be reviewed (and revised if necessary) if relevant control measures are revised. The view as should be carried out in consultation with workers (including contractors as unputractors of the SWMS and their health and safety registeratives who represented that work group at the workplace.

When the SWMS has been revised the PCBD mest ensure the advised that a revision has been made and how they can accept the revised SWMS, including all persons who will need to change a work procedure or system as a rest of the review are advised of the changes in a way that will enable them to implement their duties the theoretical with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- Spot Checks.
- Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
TIEMS WHICH MOST BE INCLUDED IN THE SWIMS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.		
All relevant personnel consulted during the development of the SWMS.		
Name, signature, position and date signed of the person approving the SWMS.		
Specific personnel and qualifications, experience is noted in the SWMS.		
Provides a step-by-step process of tasks required to carry out the activity or task.		
Adequate risk assessment of any identified hazards has been completed.	\boxtimes	
Foreseeable hazards are identified and documented for each step.	\boxtimes	
Any hazards listed in any site risk assessments have been added to the SV 5.		
SWMS initial risk (IR) column as well as residual risk (RR) column ampleted.		
Check control measures added to the SWMS are the most effective sections.		
Responsible person is assigned and listed on the splenetation of control measures.		
Permit or licenses requirements specified, so in as Hot Work, Electrical Work, Work at Heights etc.		
SWMS identifies plant and equipment to be	\boxtimes	
Details of inspection checks required for any equipment lister are noted on the SWMS.		
Describes any mandatory qualifications, experience, and or skills required to perform the work.		
Applicable personal protective equipment is selected on the SWMS.		
Reflects and documents any legislative references and/or Australian Standards.		
Identifies any hazardous substances used with specific control measures in line with any SDS.
