

Hydraulic Punch	SAFE WORK METHOD ST	ATEMENT (SWMS)	
TA	ASK OR ACTIVITY: Hydraulic Pur	nch	
Business Name:		ABN:	SWMS#
Business Address:			
Contact Person:	Phone:	E ail:	
THIS SAFE WORK METHOD	STATEMENT IS APPROV O BY	THE PC. OF THE ROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conductive proposed work starts.	acting a business or und thing (Pc V) is	required to el ethat a safe work method	statement (SWMS) is prepared before
Full Name:			
Signature:	NY	Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring	compliant e of the SWIL as well as re	eviews and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS VMS IN HAVE THE FOLLOWING COMMUNICATED	NA. 2 OF ALL RELEVANT PERSONN EVELOPMENT AND APPROVAL OF	IEL WHO HAVE BEEN CONSULTED AND THIS SWMS	COMMUNICATED TO IN THE
Safety meetings or toolbox talks will be sched ed in account with regislative requirements to first identify any site hazards, to compute the those hazards and then to further take steps to either eliminate or con leach hazard.			
If an incident or a near miss occurs, all work must standately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Incorrect equipment selection, Poor site conditions	2M	<ul> <li>Undertake a thorough risk assessment betwe selecting the appropriate hydraulic punch equipment for the specific task and site conditions, keeping in mind fact the like material strength, size, and working area.</li> <li>Ensure workers are trained and competent the gray hydraulic punch equipment including proper operation, maintenance, and safety procedure.</li> <li>Always read and follow equipment manufacturer of delite processes, operation, and maintenance when using a hydraulic punch machin.</li> <li>Visit and assess the worker price operation of commenting work, ensuring that all potential risks, hazards, and other relevant actors like abound so slitly, a carner, and space constraints are documented and addressed.</li> <li>Estable clear operations of channels between team members on-site, ensuring that everyone remain in priced operations.</li> <li>Develop a total specific area decivities, upcoming changes, or identified hazards.</li> <li>Develop a total specific area decivities, upcoming changes, or identified hazards.</li> <li>Proves a litable Personal Protective Equipment (PPE) for workers, such as safety gloves, goggles, hard ats, are ugh-visibility clothing, and ensure their proper usage throughout the work process.</li> <li>As signate specific areas for equipment storage and movement to avoid congestion and tripping hazards at the worksite.</li> <li>Regularly evaluate and maintain hydraulic punch equipment to ensure optimal performance, minimise the risk of equipment failure, and identify any wear and tear that could cause safety concems.</li> <li>Set up temporary barriers and signage around the work area as necessary, alerting other workers, pedestrians, or vehicles of potential hazards or restricted access.</li> <li>Implement regular safety meetings and toolbox talks, encouraging open dialogue and feedback from team members about ongoing tasks, safety concems, or operational improvements related to hydraulic punch equipment and worksite operations.</li> </ul>	1L
2. Inspection	Inadequate inspection, Faulty equipment	зн	<ul> <li>Implement a regular inspection schedule for the hydraulic punch equipment to ensure it is in good working condition.</li> <li>Train all operators on how to properly inspect the hydraulic punch, its components and accessories, as well as identify potential hazards related to faulty equipment.</li> <li>Develop an inspection checklist, listing all necessary inspection points and guidelines for detecting any signs of wear, corrosion or damage that can lead to equipment failure.</li> <li>Use qualified personnel with appropriate knowledge and experience to inspect and assess the hydraulic punch equipment's condition.</li> </ul>	1L

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			- Consult manufacturer guidelines and recommendations, ensuring that inspections adhere to these standards and maintenance protocols.	
			- Maintain proper documentation of all inspections fromed, including dates, findings, and any corrective actions taken. Keep these records on file to rence requirements during future inspections.	
			- Remove from operation any equipment to does not proving inspection or is considered faulty, until repairs have been successfully completed by a question of the does not proving inspection or is considered faulty, until repairs have been successfully completed by a question of the does not proving inspection or is considered faulty, until repairs have been successfully completed by a question of the does not proving inspection or is considered faulty.	
			- Regularly check hydraulic hoses and connect as for any sices of damage or leaks that could compromise the machine's a formance or safe	
			- Ensure that all safety quards and mechanisms and mace, functioning correctly, and free from obstructions before any ing to operation of hydradic punches.	
			- Keep a log cany malfur jions, a lidents near-misses related to hydraulic punch equipment, investigating ir underly g causes went recurrence.	
			- Rever pooling of an sumables being used with the hydraulic punch, replacing them as needed to maint in timum offormance and safety.	
			- Performant prevent ive maintenance tasks recommended by the manufacturer, which could include lubricating particles of proper alignment, and tightening bolts.	
	•		glass a proprior personal protective equipment (PPE) during inspections, such as gloves, safety glass and footwear, to minimise the risk of injury while handling the hydraulic punch equipment.	
			- nduct a thorough risk assessment prior to setup, identifying potential tripping hazards and locations where falling objects may occur.	
			- Clearly mark the designated work area with appropriate signage and barriers to prevent unauthorised access or inadvertent entry.	
			- Ensure that the work surface is level, clean, and free of debris or obstructions that may cause tripping hazards.	
			- Arrange equipment, materials, and tools in an organised manner, with appropriate storage when not in use to minimise clutter and the risk of tripping.	
3. Set up area	Tripping hazards, Falling objects	2M	- Provide adequate lighting in the work area to ensure visibility and reduce the risk of tripping hazards.	1L
			- Implement a regular inspection and maintenance schedule for all equipment being used, specifically focusing on checking the hydraulic punch for wear, damage, or loose components that may result in falling objects.	
			- Establish a comprehensive training programme for workers on safe work practices and hazard identification, including instruction on how to safely set up and operate the hydraulic punch.	
			- Maintain clear communication lines between all members of the work team, ensuring everybody is aware of any ongoing activities or potential hazards in the area.	
			- Utilise personal protective equipment (PPE) such as hard hats, safety glasses, and steel-toe boots to reduce the risk of injury from tripping hazards and falling objects.	

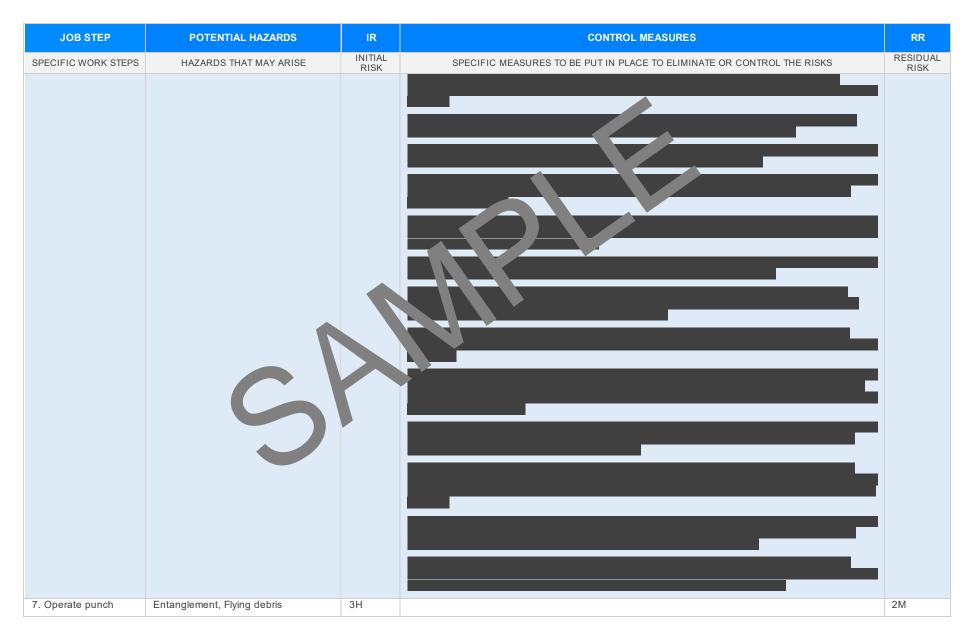

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			- In cases where there is a potential for falling objects, establish a "no-gozone" below the work area and use appropriate barricades or signage to prevent entry.	
			- Follow a systematic approach to the placement machinery, equipment, and construction materials, prioritising those items that pose the least risk becoming falling objects.	
			- Properly secure any equipment or material located at least ghts, using tie-downs, tarps, or other restraints to ensure they cannot accidentally dislodge and fall	
			- Establish a buddy system, with one worker according as a spotter during setup and operation to alert others of potential hazards and manager risks.	
			- Implement a regular review places of the implement control measures for this work step, as well as a procedure for reporting any identified swortcomings to ensure ongoing effectiveness of the strategies in procedure.

### EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.

### SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

### SAFE WORK IN 'THIS 'S' ITEM ON MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remain effect, and must be reviewed (and revised if necessary) if relevant control measures are revised. The view as should be carried out in consultation with workers (including contractors as unputractors of the SWMS and their health and safety registeratives who represented that work group at the workplace.

When the SWMS has been revised the PCBD mest ensure the advised that a revision has been made and how they can accept the revised SWMS, including all persons who will need to change a work procedure or system as a rest of the review are advised of the changes in a way that will enable them to implement their duties the theoretical with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- Spot Checks.
- Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

### SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.
