

Hydraulic Punch	SAFE WORK METHOD ST	ATEMENT (SWMS)	
TA	ASK OR ACTIVITY: Hydraulic Pur	ch	
Business Name: [Company Name]		ABN: [ABN]	SWMS#
Business Address: [Company Address]			
Contact Person:	Phone: [Phone]	E 11:	
THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE PL OF THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	eting a business or undertaking (N 3U) is	required to ture at a safe work method s	tatement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring a	ompliance of the SWMS well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A CO. MUNICATED TO IN THE DEVELO	LL RELEVANT PERSONNEL WHO HAVE BI PMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched ed in accordance with egislative requirements to first identify any site hazards, conditions those hazards and then to further take steps to either the conditions of the conditions are or conditionally as a condition of the conditions are conditionally as a condition of the condition of the conditions are conditionally as a condition of the conditi	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must standardly. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

			A								

Select me appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Incorrect equipment selection, Poor site conditions	2M	 Undertake a thorough risk assessment before selecting the appropriate hydraulic punch equipment for the specific task and site conditions, keeping in mind factors like material strength, size, and working area. Ensure workers are trained and competer or using hydraulic punch equipment including proper operation, maintenance, an exafety produres. Always read and follow equipment manufacts and elines for safety, operation, and maintenance when using a hydraulic punch schine. Visit and assess the worksite for to commencing are assuring that all potential risks, hazards, and elimple valuations like ground scallity, weather, and space constraints are chament and a ressed. Establish concommunic on charcols be usen team members on-site, ensuring that everyone pains in med of plan to activities, upcoming changes, or identical hazare. Develope tice emergency response plan that covers all possible scenarios related to the use of or braulic punch equipment, with clearly defined roles and respons lilities or each sam member during an incident. a syide uitable personal Protective Equipment (PPE) for workers, such as safety glow and gles, hard hats, and high-visibility clothing, and ensure their proper usage hrough to me work process. a signate specific areas for equipment storage and movement to avoid congestion and tripping hazards at the worksite. Regularly evaluate and maintain hydraulic punch equipment to ensure optimal performance, minimise the risk of equipment failure, and identify any wear and tear that could cause safety concerns. Set up temporary barriers and signage around the work area as necessary, alerting other workers, pedestrians, or vehicles of potential hazards or restricted access. Implement regular safety meetings and toolbox talks, encouraging open dialogue and feedback from team members about ongoing tasks, safety concerns, or operational improvements related to hydraulic punch equipment and worksite ope	1L	
2. Inspection	Inadequate inspection, Faulty equipment	3H	 Implement a regular inspection schedule for the hydraulic punch equipment to ensure it is in good working condition. Train all operators on how to properly inspect the hydraulic punch, its components and accessories, as well as identify potential hazards related to faulty equipment. Develop an inspection checklist, listing all necessary inspection points and guidelines for detecting any signs of wear, corrosion or damage that can lead to equipment failure. 	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Use qualified personnel with appropriate knowledge and experience to inspect and assess the hydraulic punch equipment's condition.		
			- Consult manufacturer guidelines and recomment ons, ensuring that inspections adhere to these standards and maintenance proceds.		
			- Maintain proper documentation of all inspections performed, including dates, findings, and any corrective actions taken. It is a cords on file to reference requirements during future inspections.		
			- Remove from operation and suipment that does not pass it section or is considered faulty, until repairs the been successful considered by a qualified technician.		
			- Regularly change of leaks that could conform the achine sortion and or leaks that could conform the achine sortion and or leaks that could conform the achine sortion and or leaks that could conform the achine sortion and or leaks that could conform the achine sortion and or leaks that could conform the achine sortion and the achine sortion are achine sortion and the achine sortion achine sortion and the achine sortion and the achine sortion and the achi		
			- Ensure that are effety and and medianisms are in place, functioning correctly, and first own observious before beginning the operation of hydraulic punches.		
			- Keep loof any functions, accidents, or near-misses related to hydraulic punch a uiplant, invaligating their underlying causes to prevent recurrence.		
			Review poling and consumables being used with the hydraulic punch, replacing the last eded to maintain optimum performance and safety.		
			Perform by preventative maintenance tasks recommended by the manufacturer, ich could include lubricating parts, checking for proper alignment, and tightening bo		
			Utilise appropriate personal protective equipment (PPE) during inspections, such as gloves, safety glasses, and footwear, to minimise the risk of injury while handling the hydraulic punch equipment.		
			- Conduct a thorough risk assessment prior to setup, identifying potential tripping hazards and locations where falling objects may occur.		
			- Clearly mark the designated work area with appropriate signage and barriers to prevent unauthorised access or inadvertent entry.		
3. Set up area	Tripping hazards, Falling objects	2M	- Ensure that the work surface is level, clean, and free of debris or obstructions that may cause tripping hazards.	1L	
J. Oet up alea	Tripping flazards, Lailing objects	ZIVI	- Arrange equipment, materials, and tools in an organised manner, with appropriate storage when not in use to minimise clutter and the risk of tripping.	IL	
			- Provide adequate lighting in the work area to ensure visibility and reduce the risk of tripping hazards.		
			- Implement a regular inspection and maintenance schedule for all equipment being used, specifically focusing on checking the hydraulic punch for wear, damage, or loose components that may result in falling objects.		

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Establish a comprehensive training programme for workers on safe work practices and hazard identification, including instruction on how to safely set up and operate the hydraulic punch.		
			- Maintain clear communication lines between thembers of the work team, ensuring everybody is aware of any ongoing activities or potential hazards in the area.		
			- Utilise personal protective equipment (PPE) a hard hats, safety glasses, and steel-toe boots to reduce the risk of injury from the ring hazards and falling objects.		
			- In cases where there is a polyntial for falling object entry is a "no-go zone" below the work area are appropriate barricades and ungrage to prevent entry.		
			- Follow a syst patic approach to a placement machinery, equipment, and construction terials, pricesing the liter mat pose the least risk of becoming falling bjects.		
			- Propagation -		
			- Estable have ddy sy m, with one worker acting as a spotter during setup and operation to all others of potential hazards and mitigate risks.		
	•		- In terms t a regular review process of the implemented control measures for this work seems as a procedure for reporting and rectifying any identified ortcomings to ensure ongoing effectiveness of the strategies in place.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P A	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	P		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWI			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effective securions.			
Responsible person is assigned and listed on the SWMS for the imperent of contameasures.			
Permit requirements specified, such as Hot Work, Electrical Work, Vocat Heights etc.			
SWMS identifies plant and equipment to be u d.			
Details of inspection checks required for any equipment listed at noted on the SWMS.			
Describes any mandatory qualifications, experience reining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
