

## Hydraulic Tamper | SAFE WORK METHOD STATEMENT (SWMS)

### TASK OR ACTIVITY: Hydraulic Tamper

Business Name: [Company Name]

ABN: [ABN]

SWMS#

Business Address: [Company Address]

Contact Person:

Phone: [Phone]

Email:

### THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE PCBU OF THE PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a safe work method statement (SWMS) is prepared before the proposed work starts.

Full Name:

Signature:

Title:

Date:

Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS, as well as reviews and modifications of the SWMS.

Full Name:

Title:

Phone:

ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS SWMS MUST HAVE THE FOLLOWING COMMUNICATED

NAME AND DATED SIGNATURE OF ALL RELEVANT PERSONNEL WHO HAVE BEEN CONSULTED AND COMMUNICATED TO IN THE DEVELOPMENT AND APPROVAL OF THIS SWMS

Safety meetings or toolbox talks will be scheduled in accordance with legislative requirements to first identify any site hazards, then communicate those hazards and then to further take steps to either eliminate or control each hazard.

If an incident or a near miss occurs, all work must stop immediately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.

Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.

The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

Date SWMS supplied to Project Manager:	

## ANY HIGH-RISK CONSTRUCTION WORK BEING CARRIED OUT

<input type="checkbox"/> involves a risk of a person falling more than 2 meters.	<input type="checkbox"/> is carried out on or near pressurised gas mains or piping.
<input type="checkbox"/> is carried out on a telecommunication tower.	<input type="checkbox"/> is carried out on or near chemical, fuel or refrigerant lines.
<input type="checkbox"/> involves demolition of an element of a structure that is load-bearing.	<input type="checkbox"/> is carried out on or near energised electrical installations or services.
<input type="checkbox"/> involves demolition of an element related to the physical integrity of a structure.	<input type="checkbox"/> is carried out in an area that may have a contaminated or flammable atmosphere.
<input type="checkbox"/> involves, or is likely to involve, disturbing asbestos.	<input type="checkbox"/> involves tilt-up or precast concrete.
<input type="checkbox"/> involves structural alteration or repair that requires temporary support to prevent collapse.	<input type="checkbox"/> is carried out on, in or adjacent to a road, railway, shipping lane or other traffic corridor.
<input type="checkbox"/> is carried out in or near a confined space.	<input type="checkbox"/> is carried out in an area of a workplace where there is any movement of powered mobile plant.
<input type="checkbox"/> is carried out in/near a shaft or trench deeper than 1.5m or tunnel involving use of explosives.	<input type="checkbox"/> is carried out in areas with artificial extremes of temperature.
<input type="checkbox"/> is carried out in or near water or other liquid that involves a risk of drowning.	<input type="checkbox"/> involves diving work.

## ANY HIGH-RISK MACHINERY OR EQUIPMENT NEARBY

<input type="checkbox"/> Forklift	<input type="checkbox"/> Crane/s	<input type="checkbox"/> Hoist/s	<input type="checkbox"/> Excavator	<input type="checkbox"/> Backhoe/Loader	<input type="checkbox"/> Boom Lift	<input type="checkbox"/> EWP	<input type="checkbox"/> Genie Lift
<input type="checkbox"/> Trencher	<input type="checkbox"/> Drilling Rig	<input type="checkbox"/> Trucks	<input type="checkbox"/> Formwork	<input type="checkbox"/> Bobcat	<input type="checkbox"/> Flammable Gas	<input type="checkbox"/> Fuel	<input type="checkbox"/> Dozer
<input type="checkbox"/> High Voltage	<input type="checkbox"/> Mulcher	<input type="checkbox"/> Tilt-up Panels	<input type="checkbox"/> Roller	<input type="checkbox"/> Scissor Lift	<input type="checkbox"/> Tractor	<input type="checkbox"/> Other -	

## RISK MATRIX

LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HEIRARCHY OF CONTROLS
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE			<b>Elimination</b> Remove the hazard.
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	<b>Substitution</b> Replace the hazard.
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review before work starts.	<b>Isolation</b> Isolate People from the hazard
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	2M MODERATE	Ensure control measures in place.	<b>Engineering</b> Isolate the hazard.
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH	1L LOW	Monitor and keep records	<b>Administrative</b> Change the work. <b>PPE</b>

**Notes on Hierarchy of Controls:** Elimination methods are the most effective and preferred when controlling a hazard. Substitution is the second most effective method of controlling a hazard. Engineering by isolation is the third most effective, while Administrative Controls by changing the work is the fourth most effective method. PPE (Personal Protective Equipment) is the least effective method.

## PERSONAL PROTECTIVE EQUIPMENT (PPE)

FOOT PROTECTION	HAND PROTECTION	HEAD PROTECTION	HEARING PROTECTION	EYE PROTECTION	RESPIRATORY PROTECTION	FACE PROTECTION	HIGH-VIS CLOTHING	PROTECTIVE CLOTHING	FALL PROTECTION	SUN PROTECTION	HAIR/JEWELLERY SECURED
											
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Select the appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

**Note:** A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS; and,
3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Slips, Trips and Falls, Manual Handling Injuries	2M	<ul style="list-style-type: none"> <li>- Provide comprehensive training to workers on the correct usage of hydraulic tampers, proper lifting techniques and hazard identification, to minimise risks associated with manual handling injuries and slips, trips, and falls.</li> <li>- Inspect the work area prior to starting the work to identify potential hazards, such as potholes, uneven surfaces, obstacles, or oil spatters which could cause slips, trips and falls.</li> <li>- Establish designated walkways and work areas, including clear signage that alerts workers to potential hazards within the workspace.</li> <li>- Ensure that adequate lighting is available throughout the work area, to assist in the early identification and avoidance of hazards.</li> <li>- Maintain the cleanliness of the work area, regularly removing waste materials, debris and spills to reduce the likelihood of slip or trip incidents.</li> <li>- Encourage workers to wear appropriate non-slip footwear that suits the specific working conditions and provides necessary support for manual handling tasks.</li> <li>- Implement the use of mechanical aids, such as hoists or trolleys, where possible to mitigate manual handling risks associated with the operation of the hydraulic tamper.</li> <li>- Encourage workers to practice good posture when manually handling equipment or materials and to team-lift heavier items as needed.</li> <li>- Provide appropriate personal protective equipment (PPE), such as gloves and back braces, to help reduce strain and the risk of injury from manual handling tasks.</li> <li>- Schedule regular breaks and rotation of duties to avoid worker fatigue, which may exacerbate the risks associated with manual handling injuries and slips, trips, and falls.</li> <li>- Develop and communicate clear procedures for reporting any hazards, near misses, or incidents associated with slips, trips and falls or manual handling injuries, fostering a proactive safety culture within the workplace.</li> <li>- Regularly inspect and maintain the hydraulic tamper equipment to ensure its safe operation, including checking for leaks, excessive wear, or any other potential hazards that could arise from faulty equipment.</li> <li>- Conduct frequent risk assessments and safety reviews of the preparation work step, continuously evaluating its effectiveness and adjusting control measures as necessary to maintain a safe working environment.</li> </ul>	1L	
2. Equipment Inspection	Electrical Hazards, Faulty Equipment	3H	<ul style="list-style-type: none"> <li>- Regular equipment inspection: Before starting any work, perform a thorough visual inspection of the hydraulic tamper and its components, ensuring there are no signs of damage or wear.</li> <li>- Electrical safety checks: Check all electrical components such as power cords, switches, and plug connectors for any signs of fraying, exposed wires, or other damages that could pose an electrical hazard.</li> </ul>	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul style="list-style-type: none"> <li>- Equipment maintenance: Schedule regular preventative maintenance for the hydraulic tamper to ensure optimal performance and to identify any faults before they become critical issues.</li> <li>- Training and competence: Ensure that all operators have received adequate training and hold relevant qualifications to safely use the hydraulic tamper, including how to inspect the equipment for potential hazards.</li> <li>- Use of Personal Protective Equipment (PPE): Operators should always wear appropriate PPE, such as safety boots, gloves, and hearing protection, to reduce the risk of injury from faulty equipment or electrical hazards.</li> <li>- Clear workspace: Keep the area around the hydraulic tamper clear of debris or obstructions to reduce the risk of tripping hazards when moving or operating the equipment.</li> <li>- Proper grounding: Ensure that the hydraulic tamper is connected to a grounded outlet to minimise the risk of electric shock in case of a fault or short circuit.</li> <li>- Safe handling procedures: Follow manufacturer's guidelines for safely moving the hydraulic tamper on-site, avoiding strain injuries or damaging the equipment.</li> <li>- Emergency shutdown procedure: Develop and implement an emergency shutdown procedure in case of equipment failure or hazardous situations arising during operation, to quickly minimise risks to workers and property.</li> <li>- Incident reporting: Encourage a culture of open communication by establishing a system for reporting near-misses, accidents, or faulty equipment. This will help identify potential hazards, informing future risk assessments and control measures. So, the management can take appropriate actions to prevent further incidents.</li> </ul>		
3. Set-up Work Area	Falling Objects, Traffic Interference	3H	<ul style="list-style-type: none"> <li>- Ensure that the work area is clearly designated using appropriate barricades, barriers, or fencing to minimise the risk of falling objects and prevent unauthorised entry.</li> <li>- Install signs, cones, and other devices to effectively redirect and manage pedestrian and vehicle traffic near the work area to eliminate potential interference.</li> <li>- Communicate with all workers, including operators and ground personnel, about the presence of overhead hazards and risks of falling objects before commencing work.</li> <li>- Conduct a thorough inspection of the tamper and materials used for any visible damage or wear that might increase risk; repair or replace as necessary.</li> <li>- Secure loose items and materials on elevated work areas or scaffolds to prevent them from falling onto workers below.</li> <li>- Utilise proper handling and lifting techniques when moving equipment or materials to reduce the chance of accidental drops or falls.</li> </ul>	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul style="list-style-type: none"> <li>- Position temporary storage locations for tools, equipment and materials at a safe distance away from high traffic areas to mitigate the possibility of impacts and falling objects.</li> <li>- Establish a communication system such as hand signals or two-way radios to coordinate the movements of the hydraulic tamper, preventing inadvertent contact with pedestrians, vehicles, or other obstacles.</li> <li>- Equip ground personnel with high-visibility clothing, hard hats, and other relevant personal protective equipment (PPE) to reduce the risk of injury due to falling objects or traffic interference.</li> <li>- Provide training for workers on emergency response procedures and evacuation plans in the event of traffic accidents or falling objects causing injuries or fatalities.</li> <li>- Regularly review and update the site-specific Workplace Health and Safety Plan to ensure that it reflects current regulatory requirements, equipment, and tasks involved with hydraulic tamper operations.</li> <li>- Encourage ongoing reporting of potential risks or hazards identified in daily pre-start inspections and establish a system for addressing these concerns promptly.</li> <li>- Periodically review and assess control measures for effectiveness, making changes or improvements as needed based on feedback from workers and risk assessments.</li> <li>- Develop and implement a Fatigue Management Plan for all personnel operating the hydraulic tamper or performing related tasks to ensure that tiredness or sleepiness does not endanger their safety or others' in the area.</li> </ul>

## EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.

## SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

## SAFE WORK METHOD STATEMENT MONITORING AND REVIEW

**The SWMS must be reviewed regularly** to make sure it remains effective and must be reviewed (and revised if necessary) if relevant control measures are needed. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

**The SWMS must be monitored regularly** for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

1. Spot Checks.
2. Consultation with workers, contractors and sub-contractors.
3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

## SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.	<input type="checkbox"/>	<input type="checkbox"/>	
Names and signatures of all relevant personnel consulted during the development of the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Name, signature, position and date signed of the person approving the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Specific personnel and qualifications, experience is noted in the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Provides a step-by-step process of tasks required to carry out the activity or task.	<input type="checkbox"/>	<input type="checkbox"/>	
Adequate risk assessment of any identified hazards has been completed.	<input type="checkbox"/>	<input type="checkbox"/>	
Foreseeable hazards are identified and documented for each step.	<input type="checkbox"/>	<input type="checkbox"/>	
Any hazards listed in any site risk assessments have been added to the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.	<input type="checkbox"/>	<input type="checkbox"/>	
Check control measures added to the SWMS are the most effective solutions.	<input type="checkbox"/>	<input type="checkbox"/>	
Responsible person is assigned and listed on the SWMS for the implementation of control measures.	<input type="checkbox"/>	<input type="checkbox"/>	
Permit requirements specified, such as Hot Work, Electrical Work, Work at Heights etc.	<input type="checkbox"/>	<input type="checkbox"/>	
SWMS identifies plant and equipment to be used.	<input type="checkbox"/>	<input type="checkbox"/>	
Details of inspection checks required for any equipment listed are noted on the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Describes any mandatory qualifications, experience, training, skills required to perform the work.	<input type="checkbox"/>	<input type="checkbox"/>	
Applicable personal protective equipment is selected on the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Lists any required permits or licenses.	<input type="checkbox"/>	<input type="checkbox"/>	
Reflects and documents any legislative references and/or Australian Standards.	<input type="checkbox"/>	<input type="checkbox"/>	
Identifies any hazardous substances used with specific control measures in line with any SDS.	<input type="checkbox"/>	<input type="checkbox"/>
