THIS SAFE WORK METHOD	STATEMENT IS APPRO	THE PC. OF THE ROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person condu the proposed work starts.	icting a business or under thing (Pu-U) is	required to entry that a safe work method	statement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitorin	compliance of the SWI, was well as re	eviews and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS HAVE THE FOLLOWING COMMUNICATED	NALE OF ALL RELEVANT PERSONN EVELOPMENT AND APPROVAL OF	NEL WHO HAVE BEEN CONSULTED AND C	COMMUNICATED TO IN THE
Safety meetings or toolbox talks will be schedued in according e with egislative requirements to first identify any site hazards, and the to contain the those hazards and then to further take steps to either eliminate or contail each hazard.			
If an incident or a near miss occurs, all work must successful adiately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Inadequate equipment, lack of safety gear	ЗН	 Conduct a thorough equipment inspectic prior to use ensuring all tools and machinery are in safe working condition and comply with manufacturer spectrations. Verify that all team members have complete prior and training for the equipment they will operate. Ensure all workers are equipped with high visit by clothing prior increase their visibility on-site. Provide hard hats, safety book gloves, and other prior all protective equipment (PPE) appropriate for the task at hand the complete result of the project layout. Implement comprehenses complete indication and the project layout. Estimation a proportion of lisces the day's tasks, potential hazards, and control measures ensuring all workers have an opportunity to ask questions. Instanyah g signe round the work area to alert the public and nearby traffic of the construction activities takin blace. Appoint safety officer to continuously monitor site conditions and worker compliance with safety procols throughout the job. Maintain an emergency response plan that outlines procedures in case of an accident, health incident, or equipment failure, ensuring all workers are briefed on these procedures. 	2M
2. Site Inspection	Slippery conditions, unlevel ground	2М	 Conduct a thorough site assessment before commencing work to identify potential hazards such as slippery surfaces and uneven terrain. Wear appropriate personal protective equipment, including non-slip boots and high-visibility clothing. Implement temporary barriers or warning signs around the work area to alert others of potential hazards. Schedule work during daylight hours where possible to ensure better visibility of site conditions. Use planks or mats to create stable walking surfaces over slippery or unlevel areas. Employ additional lighting if working during low-light conditions to enhance visibility. Carry out a dynamic risk assessment as conditions can change due to weather or other factors. Ensure all employees are trained on hazard recognition and safe work practices specific to the task. Use mechanical aids like trolleys or dollies to transport heavy materials safely over uneven ground. Deploy anti-slip coverings on extremely slippery areas to reduce the risk of slipping. Regularly monitor weather forecasts and adjust schedules to avoid adverse conditions where practical. 	1L

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK 3H	 SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS Maintain clear communication among team members through radios or mobile devices to coordinate efforts smoothly. Regularly inspect the site for new hazards as were progresses, including checking for water accumulation or displaced soil. Ensure that emergency procedures are ourly understruct and in place, and that first aid kits are readily accessible at the site. Ensure all workers are trafficit in proper manuscrandling or uninjques to reduce the risk of injury from lifting. Use mechanication, so as to asys or lifting devices, to minimise physical exertion during setting up. Conduct are safety and vis (JS) controption to agginning work to identify and mitigate potential hazards. Instant work to lift out their kneepend keep loads close to their body to prevent twisting injuries. Assign ultiple to exers to carry heavy or bulky items to distribute the load evenly. Rotatilitat, among workers to prevent fatigue and overexertion from repetitive movements. Set links on the weige that workers are permitted to handle based on safe lifting guidelines. And the ayoung the work area carefully to ensure clear and unobstructed pathways for moving materia and equipment. Implement regular rest breaks and encourage hydration to maintain worker stamina and focus. Establish communication protocols using radios or hand signals to coordinate safe lifting and placement of barriers. Position a spotter to provide guidance and prevent accidents during the handling of large or obstructive items. Conduct routine inspections of equipment and tools to ensure they are in good working order and reduce the likelihood of failure during area set-up. Enforce strict adherence to personal protective equipment (PPE) requirements, including safety boots and gloves, to safeguard against potential injuries. 	RESIDUAL RISK 2M

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

SAFE WORK THE S ATEM AT MONITORING AND REVIEW The SWMS must be reviewed regularly to make sure it remain effect. and mu be reviewed (and The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are revised if necessary) if relevant control measures are revised. The s should be carried out in effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The view consultation with workers (including contractors person responsible for monitoring the effectiveness of the Safe Work Method Statement should ntractors nay be cted by the operation of the SWMS and their health and safety representatives who rep sented that work group at the employ a multi-faceted approach which includes but is not limited to: workplace. 1. Spot Checks. When the SWMS has been revised the PCBU must ensure the all versons involved with the work are 2. Consultation with workers, contractors and sub-contractors. advised that a revision has been made and how they can acce the revised SWMS, including all persons 3. Internal audits on a continual basis who will need to change a work procedure or system as a reof the review are advised of the changes in a way that will enable them to implement their duties ntly with the revised SWMS. All workers that An approach of continuous improvement, promptly recording inconsistencies or deficiencies, will be involved in the work must be provided with the relevant information and instruction that will assist followed up by immediate corrective action and consultation with all relevant personnel ensures them to understand and implement the revised SWMS. that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.		
All relevant personnel consulted during the development of the SWMS.		
Name, signature, position and date signed of the person approving the SWMS.		
Specific personnel and qualifications, experience is noted in the SWMS.		
Provides a step-by-step process of tasks required to carry out the activity or task.		
Adequate risk assessment of any identified hazards has been completed.		
Foreseeable hazards are identified and documented for each step.	\boxtimes	
Any hazards listed in any site risk assessments have been added to the Sλ. S.	\boxtimes	
SWMS initial risk (IR) column as well as residual risk (RR) column completed.	\boxtimes	
Check control measures added to the SWMS are the most effective sections.	\boxtimes	
Responsible person is assigned and listed on the spiral of the spiral entry of control measures.	\boxtimes	
Permit or licenses requirements specified, so in as Hot Work, Electrical Work, Work at Heights etc.	\boxtimes	
SWMS identifies plant and equipment to be	\boxtimes	
Details of inspection checks required for any equipment lister are noted on the SWMS.	\square	
Describes any mandatory qualifications, experience, ang or skills required to perform the work.	\square	
Applicable personal protective equipment is selected on the SWMS.	\square	
Reflects and documents any legislative references and/or Australian Standards.	\boxtimes	
Identifies any hazardous substances used with specific control measures in line with any SDS.
