THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE P. J OF THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conducte proposed work starts.	icting a business or undertaking (HBU) is	required to ture at a safe work method s	statement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring	compliance of the SWMS well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED	N TE AND DATED SIGNATURE OF A CO. MUNICATED TO IN THE DEVELO	LL RELEVANT PERSONNEL WHO HAVE B OPMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched ed in accordance with regislative requirements to first identify any site hazards, conditioned unical those hazards and then to further take steps to either condition conditions are or conditional hazard.	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must study underly. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Slips and trips, Manual handling injuries	2M	 Ensure proper housekeeping: Keep the work area clean, well-lit, and free of clutter to minimise the risk of slips and trips. Use slip-resistant footwear: Workers should way sturdy work shoes with a slip-resistant sole to help prevent accidents. Place warning signs: Put up warning signs on bard bard to alert workers to any potential slip and trip hazards in the area. Provide proper storage area. Designate specific reas for using tools, equipment, and materials to ke them off the floor data or walking paths. Conduct regular increases: Ren tarly inspect the work area to identify and address any brands, such as pilled uneven the hing. Train employ is: Ensure of employer or one appropriate training on how to safely and initiation e juicer to minute the risk of injury. Implify the safe in the and in the provide mechanical aids, such as trolleys or effective and winters welling. Train explores to the apport heavy items and reduce the need for manual handling. Ensure the load and reduce individual strain. Indeule regular breaks: Allow workers to take regular short breaks to rest and recover, reducing the risk of fatigue-related injuries. Monitor workloads: Assess the physical demands of tasks and adjust workloads accordingly to ensure that workers are not overburdened. Develop an emergency response plan: In the event of an injury or accident, have a clear and established plan for dealing with the situation, including first aid measures and reporting processes. Review and update safety procedures: Regularly review your safety procedures and reporting processes. 	1L	
2. Cleaning	Chemical exposure, Electric shock	2M	 Proper Training: Ensure that all workers involved in the cleaning process are adequately trained in handling and using cleaning chemicals, equipment, and understanding potential hazards. Personal Protective Equipment (PPE): Workers should wear appropriate PPE, such as gloves, goggles or safety glasses, aprons, and closed-toe shoes to minimise exposure to harmful chemicals. Material Safety Data Sheets (MSDS): Keep MSDS readily available on-site for all cleaning chemicals used, containing information about the properties of the substances, their hazards and safety precautions to take. 	1L

SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Storage and disposal of chemicals: Store chemicals in a well-ventilated area, away from heat sources, and electrical equipment. Dispose of empty containers, used rags, and other cleaning materials according to local gulations.		
			- Electrical safety checks: Before starting the of using process, make sure all electrical equipment is turned off and unply and. Check for any visible damage to cables or plugs that may pose a risk for electric shocks		
			- Use of non-conductive tools: Utilise non-conductive cleaning tools such as plastic or rubber scrapers, squeegees, and brushes to hence the risk electrical shock during cleaning.		
			- Ground Fault Circuits, expectally in wet or damp and as when the just or power or tlets are located, reducing the risk of electrical and a.		
			- Adecreate lighting: Ensure there is subject to lighting in the workspace to allow work the clean decreate equipment, surfaces, and floor areas they are cleaning, minimum to accide.		
			- Propervention: In the sure the workplace is adequately ventilated to prevent chemical vapure from the oming concentrated, which can cause health problems.		
			absection naterials and spill kits handy in case of a chemical spill or leak.		
			Clear countunication between workers: Ensure that all workers are aware of each on the stations and whereabouts during the cleaning process in case an emergency situation arises.		
	C		 First-aid recommendation: Have first-aid kits, eyewash stations, and appropriate first-aid procedures readily available in case of accidental chemical exposure or electric shock incidents. 		
			- Regular inspection and maintenance: Conduct regular inspections and maintenance of electrical connections, cables, and equipment to ensure that safety requirements are met and any hazards are dealt with promptly.		
			 Proper training: Ensure all workers involved in the setup process have been adequately trained on the safe and correct methods of assembling and operating the juicer. 		
3. Setup	Falls from height, Caught in/between equipment	ЗH	- Use of PPE: Workers should be provided with and required to wear appropriate Personal Protective Equipment (PPE), such as safety shoes, gloves, hard hats, and safety glasses.	2M	
	Southern		 Inspection of equipment: Before starting the setup process, inspect the juicer and any associated equipment for signs of damage, wear and tear, or potential malfunctions. Address any issues before proceeding. 		
			- Safe lifting techniques: Train workers on proper lifting techniques to minimise the risk of injury when moving or positioning heavy components of the juicer.

SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Work area clearance: Ensure the workspace is clear of any obstructions or hazards that may result in falls or workers becoming caught between the equipment.		
			- Ladder safety: If ladders are necessary for reaching elevated sections during setup, ensure they are stable, secure, and have non-consurfaces. Workers should also maintain a three-point contact when working an ladders.		
			- Secure footing: Encourage workers to main on promotooting when handling machinery, using anti-slip mats or covers when the ssary to reduce the risk of falls.		
			- Communication protocols: to ablish clear communication protocols among workers to prevent misunderstandings perfors that may lear one dents during the setup process.		
			- Lockout/Tage procedure Imple ant lockor agout procedures to prevent inadvertent a vation of the dicer sy. m with it is being set up.		
			- Gure wils any arries where applice re, install guardrails or barriers around eleval orking and open edges to protect workers from falls.		
			- Propertor usage: sure workers use appropriate tools during the setup process and are rain in the ofe and effective use.		
			The rest cy studevices: Equip the juicer with emergency stop devices in easy-to- rest loci ions in case of sudden malfunctions or incidents that require immediate		
			shutdo uddy system: Pair workers together during the setup process to provide an actional level of safety and support, especially when working at height or handling heavy equipment.		
	G		- Regular breaks: Encourage workers to take regular breaks and avoid fatigue during the setup process. This can minimise the risk of human error and potential accidents.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAL WO A STHUD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to revised if necessary) if relevant control measure are subcontract of the SWMS and their health and safety representatives who reworkplace.

ke sure it remains effective and must be reviewed (and are subcontractions) who may be affected by the operation sentatives who received that work group at the

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- 1. Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.			
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWh			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effectine sections.			
Responsible person is assigned and listed on the SWMS for the impement of continue measures.			
Permit requirements specified, such as Hot Work, Electrical Work, Vortat Heights etc.			
SWMS identifies plant and equipment to be up t.			
Details of inspection checks required for any equipment listed at noted on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
