THIS SAFE WORK METHOD	STATEMENT IS APPROV D BY	THE PC. VOF THE ROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or und ting (Pc V) is	required to el ethat a safe work method	statement (SWMS) is prepared before
Full Name:			
Signature:	NY	Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring	compliant e of the SWIL as well as re	eviews and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS VMS HAVE THE FOLLOWING COMMUNICATED	NA. 2 OF ALL RELEVANT PERSONN EVELOPMENT AND APPROVAL OF	NEL WHO HAVE BEEN CONSULTED AND FITHIS SWMS	COMMUNICATED TO IN THE
Safety meetings or toolbox talks will be sched ed in accorde with regislative requirements to first identify any site hazards, to contribute those hazards and then to further take steps to either eliminate or conclude acchimacy.			
If an incident or a near miss occurs, all work must stead dately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Slips on wet surfaces, incorrect PPE	ЗН	 Conduct a thorough site inspection to idercy, any wet surfaces and take appropriate action to clean or barricade them. Implement signage in areas where wet surfaces by exist, such as during adverse weather conditions or after cleaning operations. Ensure all staff involved in louding and unloading that a copriate slip-resistant footwear to reduce the risk of slipping. Provide appropriate personal productive equippoint (PPE) training to ensure understanding and correct usage by attemptoyees. Ensure high we billity Progress wom to increase worker visibility and safety around vehicles and equipment. Condition egular defings on the importance of wearing proper PPE, including gloves, helmets, and vests. Use not-slip hats or or face treatments on loading areas prone to becoming slippery to improve footing. Developed in the integrity of loading dock edges and steps to prevent slips and falls. Developed implement a comprehensive policy for monitoring weather conditions and adjusting tasks or nocesses as necessary during wet weather. In ablish a system for reporting and promptly addressing spills or water accumulation that might contribute to slip hazards. Encourage workers to report defective or inadequate PPE immediately so that replacements can be issued swiftly. 	2M
2. Site Assessment	Traffic hazards, uneven ground	4A	 Conduct a pre-work safety briefing to discuss site-specific hazards and control measures with all personnel. Use high-visibility signs and barriers to clearly mark the loading and unloading area. Implement a traffic management plan that includes safe routes, speed limits, and designated pedestrian pathways. Ensure ground surfaces in the work area are stable and even, using temporary ramps or matting if necessary. Assign a qualified spotter to guide vehicles and ensure clear communication between drivers and ground staff. Establish exclusion zones to keep unauthorised personnel away from the worksite. Utilise wheel chocks on delivery trucks to prevent unintentional vehicle movement. Conduct regular inspections of the site to identify changes in conditions such as potholes, debris, or wet surfaces. 	зн

SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			- Provide clear and concise signage indicating hazards, traffic flow, and emergency procedures.	
			- Equip workers with personal protective equipment (PPE) appropriate for the site conditions, including high-visibility clothing.	
			- Train all employees in emergency response procedures specific to traffic management and uneven terrain situations.	
			- Ensure lighting is adequate during early money evening operations to improve visibility around the site.	
			- Use communication device such as two-way rather for sective coordination among team members.	
			- Regularly review and late to site assessment an control measures to adapt to any changes in site conditions or taxes.	
			- Conclect a plantart inspection check the identify any visible defects or issues with the vehicle.	
	Vehicle malfunction, unsecured load		- Ens. 5. I vehice adintenance is up to date, including regular servicing and inspections by qualified person en	
			- Confine that rakes, whits, indicators, and mirrors are in proper working condition before commencing rading runled ling activities.	
			- Ve of the fall tyres, including spare tyres, are properly inflated and free from significant wear or damage.	
			Check and all doors, tailgates, and side panels are secure and functional to prevent accidental opening ing operation.	
		ЗН	- Use load restraint systems, such as straps and chains, to prevent the movement of loads during transit and ensure they are fully secured before departure.	
3. Vehicle Inspection			- Train staff in recognising potential mechanical issues and the importance of reporting any concerns immediately.	2M
			- Implement regular audits and spot-checks on vehicle conditions to ensure compliance with safety standards.	
			- Ensure the load does not exceed the vehicle's weight capacity and is evenly distributed to prevent instability or tipping.	
			- Equip vehicles with fire extinguishers that are regularly maintained and easily accessible in case of emergency.	
			- Ensure all drivers possess the appropriate qualifications and are trained to conduct thorough vehicle inspections.	
			- Establish a communication protocol for reporting and addressing any identified vehicle hazards or safety concerns swiftly.	
4. Communication Setup	Miscommunication, inadequate briefing	3H		2M

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

SAFE WORK IN 'THE 'S' NTEMANT MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remain effect, and must be reviewed (and revised if necessary) if relevant control measures are revised. The view as should be carried out in consultation with workers (including contractors as unputractors of the SWMS and their health and safety registeratives who represented that work group at the workplace.

When the SWMS has been revised the PCBD mest ensure the all persons involved with the work are advised that a revision has been made and how they can accept the revised SWMS, including all persons who will need to change a work procedure or system as a rest of the review are advised of the changes in a way that will enable them to implement their duties the total with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- Spot Checks.
- Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.		
All relevant personnel consulted during the development of the SWMS.		
Name, signature, position and date signed of the person approving the SWMS.		
Specific personnel and qualifications, experience is noted in the SWMS.	7	
Provides a step-by-step process of tasks required to carry out the activity or task.		
Adequate risk assessment of any identified hazards has been completed.	\boxtimes	
Foreseeable hazards are identified and documented for each step.		
Any hazards listed in any site risk assessments have been added to the SV. 5:		
SWMS initial risk (IR) column as well as residual risk (RR) column ampleted.		
Check control measures added to the SWMS are the most effer the securions.		
Responsible person is assigned and listed on the place of control measures.		
Permit or licenses requirements specified, so in as Hot Work, Electrical Work, Work at Heights etc.		
SWMS identifies plant and equipment to be		
Details of inspection checks required for any equipment lister are noted on the SWMS.		
Describes any mandatory qualifications, experience, and or skills required to perform the work.		
Applicable personal protective equipment is selected on the SWMS.		
Reflects and documents any legislative references and/or Australian Standards.		
Identifies any hazardous substances used with specific control measures in line with any SDS.
