THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE PC. OF THE ROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conductive proposed work starts.	ucting a business or under thing (Pt - U) is	required to end of that a safe work method	statement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitorin	compliance of the SWI, was well as re	eviews and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS VMS	NA OF ALL RELEVANT PERSONN EVELOPMENT AND APPROVAL OF	NEL WHO HAVE BEEN CONSULTED AND THIS SWMS	COMMUNICATED TO IN THE
Safety meetings or toolbox talks will be sched, ed in according to with egislative requirements to first identify any site hazards, and the to contain the those hazards and then to further take steps to either eliminate or contained and hazard.			
If an incident or a near miss occurs, all work must stude under the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

2. Approach and Parking	Moving vehicles, Unsecured livestock	3Н	 Ensure that all drivers have valid and appropriate licenses and are familiar with the specific requirements for transporting livestock. Conduct a pre-operational safety inspection of vehicles, ensuring all safety features like brakes, lights, and indicators are functioning properly. Use signage such as 'Caution: Livestock Loading/Unloading' in the designated area to alert other personnel and vehicles. Establish a clearly marked loading/unloading zone with safety cones or barriers to prevent unauthorised access. Implement speed limits within the vicinity of the loading area to minimise risks related to moving vehicles. 	2M

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			- Train personnel in safe vehicle operation practices and procedures specific to loading and unloading livestock.	
			- Designate a spotter or guide to assist the driver up in approaching and parking the vehicle to avoid blind spots and ensure precision.	
			- Ensure the ground surface is stable and the from obstructions or hazards that could cause slips, trips, or falls.	
			- Keep communication equipment readily availated for coordinating movements between drivers and on- ground personnel.	
			- Inspect livestock containment nates and fencing source they are secure and capable of handling potential impacts from tock.	
			- Utilise when mocks on surponary whicles the revent any unintended movements during the loading or unloading process.	
			- Appende use a visual mirrors and rearview cameras where possible to increase visibility around livesto k indling eas.	
		- Establish a genergin cy protocol for dealing with unsecured livestock, including escape routes and personial resonability.		
			- induc regular rafety briefings to ensure all personnel are aware of the procedures, roles, and hazards relar. Yo ne loading/unloading process.	
			- usure all workers are trained in safe animal handling techniques to minimise the risk of bites and crush injuries.	
	G		- Use personal protective equipment, such as gloves and steel-capped boots, to protect against bites and potential foot injuries.	
			- Install anti-slip surfaces near gates to prevent slips and falls while opening or closing them.	
			- Position yourself so that there is a solid barrier between yourself and the livestock whenever possible.	
2 Opening/Clearing			- Identify and use escape routes in case of emergencies caused by aggressive animals or malfunctioning gates.	
3. Opening/Closing Gates	Animal bites, Crush injuries from gates	3H	- Maintain clear communication with team members via hand signals or radios to coordinate gate operations safely.	2M
			- Regularly inspect and maintain gates and latches for defects to ensure they function correctly and do not accidentally swing open or closed.	
			- Utilise quick-release mechanisms on gates where appropriate to allow for fast re-routing if an animal becomes aggressive.	
			- Adopt a buddy system during loading and unloading to provide assistance and ensure another person can call for help if required.	
			- Keep calm and avoid sudden movements which may spook the livestock and increase the likelihood of aggressive behaviour.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

SAFE WORK THE S ATEM AT MONITORING AND REVIEW The SWMS must be reviewed regularly to make sure it remain effect. and mu be reviewed (and The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are revised if necessary) if relevant control measures are revised. The s should be carried out in effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The view consultation with workers (including contractors person responsible for monitoring the effectiveness of the Safe Work Method Statement should ntractors nay be cted by the operation of the SWMS and their health and safety representatives who rep sented that work group at the employ a multi-faceted approach which includes but is not limited to: workplace. 1. Spot Checks. When the SWMS has been revised the PCBU must ensure the all versons involved with the work are 2. Consultation with workers, contractors and sub-contractors. advised that a revision has been made and how they can acce the revised SWMS, including all persons 3. Internal audits on a continual basis who will need to change a work procedure or system as a reof the review are advised of the changes in a way that will enable them to implement their duties ntly with the revised SWMS. All workers that An approach of continuous improvement, promptly recording inconsistencies or deficiencies, will be involved in the work must be provided with the relevant information and instruction that will assist followed up by immediate corrective action and consultation with all relevant personnel ensures them to understand and implement the revised SWMS. that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.		
All relevant personnel consulted during the development of the SWMS.	\boxtimes	
Name, signature, position and date signed of the person approving the SWMS.		
Specific personnel and qualifications, experience is noted in the SWMS.	7	
Provides a step-by-step process of tasks required to carry out the activity or task.		
Adequate risk assessment of any identified hazards has been completed.		
Foreseeable hazards are identified and documented for each step.	\boxtimes	
Any hazards listed in any site risk assessments have been added to the Sλ. S.	\boxtimes	
SWMS initial risk (IR) column as well as residual risk (RR) column completed.	\boxtimes	
Check control measures added to the SWMS are the most effective sections.	\boxtimes	
Responsible person is assigned and listed on the spiral of the spiral entry of control measures.	\boxtimes	
Permit or licenses requirements specified, so in as Hot Work, Electrical Work, Work at Heights etc.	\boxtimes	
SWMS identifies plant and equipment to be	\boxtimes	
Details of inspection checks required for any equipment lister are noted on the SWMS.	\boxtimes	
Describes any mandatory qualifications, experience, ang or skills required to perform the work.	\boxtimes	
Applicable personal protective equipment is selected on the SWMS.	\square	
Reflects and documents any legislative references and/or Australian Standards.	\boxtimes	
Identifies any hazardous substances used with specific control measures in line with any SDS.	\boxtimes
