THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE PC. OF THE ROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or und thing (Pu V) is	required to electron that a safe work method	statement (SWMS) is prepared before
Full Name:			
Signature:	NY	Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring	compliant e of the SWIL as well as re	views and modifications of the SWMS.	
Full Name:	111.	Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS VMS HAVE THE FOLLOWING COMMUNICATED	NA. 2 OF ALL RELEVANT PERSONN EVELOPMENT AND APPROVAL OF	IEL WHO HAVE BEEN CONSULTED AND (THIS SWMS	COMMUNICATED TO IN THE
Safety meetings or toolbox talks will be sched ed in accorde with regislative requirements to first identify any site hazards, to construct the those hazards and then to further take steps to either eliminate or conclude ach hazard.			
If an incident or a near miss occurs, all work must stead adately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Slipping, Falling objects, Electric shock	2M	 Conduct a pre-work safety assessment to centify and address potential hazards. Wear appropriate slip-resistant footwear continuity over risk of slipping. Use warning signs to alert others about wet very surfaces. Ensure that the work area covell-lift to improve vibility accreduce the likelihood of accidents. Inspect the ice-black comach cry for any faults of pactrical issues before use. Keep the work area cleans funity assary item that could create tripping hazards. Wear person protective equipment as as gloves, safety glasses, and hard hats. Sed wall took on a laterials to prevent them from falling and causing injury. Imply the block-on ag-out procedures to ensure machinery is de-energised before maintenance or setup. Ensure electroal cords and connections are in good condition and properly insulated. The later solve the proper use and handling of the ice-blasting machinery and associated safety protoco. 	1L
2. Equipment Check	Cutting/pinching injuries, Equipment malfunction	ЗН	 - Conduct a pre-start inspection of the machinery to identify any visible damage - Ensure all guards and safety devices are properly installed and functional - Verify that all moving parts are adequately lubricated to prevent seizing or sticking - Check integrity and tension of belts and other components that may cause cutting injuries - Use appropriate Personal Protective Equipment (PPE) such as gloves, goggles, and steel-toed boots - Test all emergency stop features to ensure they are operational - Confirm that electrical connections are secure and insulated to prevent electrical hazards - Ensure that work area is clear of obstructions that may cause tripping or interference with the machine - Train operators on safe handling and operating procedures specific to the ice-blasting machinery - Apply lockout-tagout (LOTO) procedures during maintenance to prevent accidental start-up - Regularly calibrate and test control systems to ensure accurate operation - Maintain a log of inspections and repairs; ensure all records are up-to-date - Use warning signs and barricades around work areas to keep unauthorized personnel away - Establish a clear communication protocol for reporting equipment issues immediately 	2M
3. Position Machine	Crush injury, Strains and sprains	3H	- Ensure all personnel are trained in safe manual handling techniques to prevent strains and sprains.	2M

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			- Use appropriate lifting equipment, such as trolleys or mechanical aids, to reduce the risk of crush injuries and sprains.	
			- Conduct a pre-operation check to ensure that all ving parts are secured and functioning correctly to avoid unexpected movements.	
			- Implement a clear communication system nong work to coordinate the positioning and operation of the machinery.	
			- Mark out a designated work zone with visible wers to keep unauthorised personnel at a safe distance.	
			- Wear appropriate personal cotective equipmen (PPE) auding gloves, safety boots, and hi-vis clothing.	
			- Ensure the grand surface is storie, level, and free of obstacles to prevent trips and falls.	
			- Turn off the pachinery and isolate two surces before attempting any manual adjustment or reposit uning.	
			- Ass. it spotter guide the machine operator during positioning to ensure accurate placement and minimistry.	
			- Evaluting by the root litions, such as wet surfaces or high winds, that may affect the stability and and line of the pachinery.

EMERGENCY RESPONSE - CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

SAFE WORK IN 'THIS 'S' ITEM ON MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remain effect, and must be reviewed (and revised if necessary) if relevant control measures are revised. The view should be carried out in consultation with workers (including contractors as an intractors of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBD mest ensure the advised that a revision has been made and how they can accept the revised SWMS, including all persons who will need to change a work procedure or system as a remotified the review are advised of the changes in a way that will enable them to implement their duties the child with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- Spot Checks.
- Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS	
The company details have been entered, including the project name and address.			
All relevant personnel consulted during the development of the SWMS.			
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	7		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.	\boxtimes		
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SV. 5.			
SWMS initial risk (IR) column as well as residual risk (RR) column completed.			
Check control measures added to the SWMS are the most effective sections.			
Responsible person is assigned and listed on the high centary of control measures.			
Permit or licenses requirements specified, so in as Hot Work, Electrical Work, Work at Heights etc.			
SWMS identifies plant and equipment to be			
Details of inspection checks required for any equipment lister are noted on the SWMS.			
Describes any mandatory qualifications, experience, ang or skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.	\boxtimes
