

Manual Handling Of Heavy San	itary Ware SAFE WORK I	METHOD STATEMENT (SWI	MS)
TASK OR ACT	IVITY: Manual Handling Of Heav	y Sanitary Ware	
Business Name:		ABN:	SWMS#
Business Address:			
Contact Person:	Phone:	E ail:	
THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE PC. OF TP' ROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduthe proposed work starts.			statement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring	compliant e of the SWIL as well as re	eviews and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS VMS HAVE THE FOLLOWING COMMUNICATED	NA. 2 OF ALL RELEVANT PERSONN EVELOPMENT AND APPROVAL OF	NEL WHO HAVE BEEN CONSULTED AND FITHIS SWMS	COMMUNICATED TO IN THE
Safety meetings or toolbox talks will be scheded in according with regislative requirements to first identify any site hazards, to continuing the those hazards and then to further take steps to either eliminate or conditional leach hazard.			
If an incident or a near miss occurs, all work must stead dately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Falling objects, mishandling of equipment	ЗН	 Ensure all team members have complete covanual handling and safety training specific to handling heavy sanitary ware. Use mechanical aids such as trolleys, dollice accosts whenever possible to minimise manual lifting. Conduct a pre-lift risk assessment to identify positial harders and plan safe lifting techniques. Inspect all equipment such costings and straps, accure they are in good condition and have appropriate weight and on various. Utilise team and techniques with clear constantication and coordination among team members for balance and orbility. Mail the aclessor process with clear constantication and tripping hazards to facilitate safer move is: Wear opport riate protonal protective equipment (PPE) such as gloves, steel-capped boots, and high-visibility loth. It allows a clear or padding to protect the surfaces of both the load and surrounding environment during and ling. It is not the route in advance considering inclines, doorways, and turns to avoid sudden movements that could lead to loss of control. Limit manual handling tasks by scheduling adequate rest breaks and rotating tasks to avoid fatigue. 	2M
2. Inspection	Incorrect assessment, overlooked hazards	ЗН	 Conduct thorough site assessments to identify all potential hazards related to manual handling. Train workers on correct techniques for assessing the weight and size of items before moving them. Implement a checklist for identifying hazards that must be completed before any lifting or handling occurs. Ensure all team members are trained in recognising hidden hazards such as sharp edges, slippery surfaces, or unstable loads. Regularly update training programs to incorporate new information and feedback from past incidents. Provide detailed guidelines for assessing the need for additional assistance or equipment when handling heavy sanitary ware. Use clear signage to highlight areas requiring special caution or attention during inspections. Equip workers with personal protective equipment suitable for identified hazards, such as gloves and safety boots. Encourage a culture of open communication where workers feel comfortable reporting overlooked hazards. 	2M

SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			- Schedule routine re-assessments of the work area to ensure initial inspections remain current and accurate.	
			- Involve experienced personnel in the inspection access to capitalise on their knowledge of common hazards.	
			- Apply technology solutions like mobile and s to guide the strong hazard identification checklists efficiently.	
			- Require a secondary review of inspections by nother team member to catch any missed hazards.	
			- Conduct a pre-task manual handling risk assessing to identify potential hazards and necessary controls.	
			- Use mech sal aids such as trolless, dolling or hoists to assist with lifting and transporting sanitary ware whenever possible	
	Heavy lifting, slips, trips and falls	•	- Ens	
			- Imple ent, am lift, strategies where applicable, ensuring adequate communication among team member dun, lifts.	
			- intain clear skways and workspaces to reduce the risk of slips, trips, and falls.	
			Provide ti-slip matting in loading areas, especially if surfaces are prone to becoming wet or slippery.	
3. Loading		40	sure appropriate PPE is worn, including safety boots with non-slip soles, to provide stability and support for feet.	3H
			Plan the lifting and loading process, determining route and rest points to manage fatigue and prevent overexertion.	
			- Limit the height of loads to ensure visibility is not obstructed while transporting items.	
			- Regularly inspect equipment used for moving heavy sanitary ware to ensure it is in good condition and suitable for use.	
			- Ensure good lighting in the loading area to improve visibility and reduce trip hazards.	
			- Communicate effectively with all personnel involved about the risks and procedures for safe manual handling.	
			- Monitor weather conditions and mitigate risks of slipping during adverse weather by protecting loading areas from rain or moisture.	
			- Set weight limits on items to be moved manually, ensuring that only those capable of safely handling agreed maximum weights participate in lifting tasks.	
4. Transport	Collisions, traffic accidents	4A		3H

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

SAFE WORK IN 'THIS 'S' ITEM ON MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remain effect, and must be reviewed (and revised if necessary) if relevant control measures are revised. The view as should be carried out in consultation with workers (including contractors as unputractors of the SWMS and their health and safety registeratives who represented that work group at the workplace.

When the SWMS has been revised the PCBD mest ensure the advised that a revision has been made and how they can accept the revised SWMS, including all persons who will need to change a work procedure or system as a remotified the review are advised of the changes in a way that will enable them to implement their duties the thing with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- Spot Checks.
- Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.		
All relevant personnel consulted during the development of the SWMS.		
Name, signature, position and date signed of the person approving the SWMS.		
Specific personnel and qualifications, experience is noted in the SWMS.	7	
Provides a step-by-step process of tasks required to carry out the activity or task.	<u>k</u>	
Adequate risk assessment of any identified hazards has been completed.	\boxtimes	
Foreseeable hazards are identified and documented for each step.	\boxtimes	
Any hazards listed in any site risk assessments have been added to the SVL 5.		
SWMS initial risk (IR) column as well as residual risk (RR) column ampleted.		
Check control measures added to the SWMS are the most effective sections.		
Responsible person is assigned and listed on the splenentant of control measures.		
Permit or licenses requirements specified, so n as Hot Work, Electrical Work, Work at Heights etc.		
SWMS identifies plant and equipment to be		
Details of inspection checks required for any equipment lister are noted on the SWMS.	\boxtimes	
Describes any mandatory qualifications, experience, ang or skills required to perform the work.		
Applicable personal protective equipment is selected on the SWMS.		
Reflects and documents any legislative references and/or Australian Standards.	\boxtimes	
Identifies any hazardous substances used with specific control measures in line with any SDS.	\boxtimes
