

## Marine Refrigeration System Work | SAFE WORK METHOD STATEMENT (SWMS)

### TASK OR ACTIVITY: Marine Refrigeration System Work

Business Name:	ABN:	SWMS#
Business Address:		
Contact Person:	Phone:	Email:

### THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE PCBU OF THE PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a safe work method statement (SWMS) is prepared before the proposed work starts.

Full Name:
------------

Signature:	Title:	Date:
------------	--------	-------

Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS as well as reviews and modifications of the SWMS.

Full Name:	Title:	Phone:
------------	--------	--------

### ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS SWMS MUST HAVE THE FOLLOWING COMMUNICATED

Safety meetings or toolbox talks will be scheduled in accordance with legislative requirements to first identify any site hazards, then to communicate those hazards and then to further take steps to either eliminate or control each hazard.

If an incident or a near miss occurs, all work must stop immediately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.

Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.

The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

### NAME OF ALL RELEVANT PERSONNEL WHO HAVE BEEN CONSULTED AND COMMUNICATED TO IN THE DEVELOPMENT AND APPROVAL OF THIS SWMS

### CLIENT OR PRINCIPAL CONTRACTOR DETAILS

Client:	SCOPE OF WORKS
Project Name:	
Project Address:	
Project Manager:

Date SWMS supplied to Project Manager:	

### ANY HIGH-RISK CONSTRUCTION WORK BEING CARRIED OUT

<input type="checkbox"/> involves a risk of a person falling more than 2 meters	<input type="checkbox"/> is carried out on or near pressurised gas mains or piping
<input type="checkbox"/> is carried out on a telecommunication tower	<input type="checkbox"/> is carried out on or near chemical, fuel or refrigerant lines
<input type="checkbox"/> involves demolition of an element of a structure that is load-bearing	<input type="checkbox"/> is carried out on or near energised electrical installations or services
<input type="checkbox"/> involves demolition of an element related to the physical integrity of a structure	<input type="checkbox"/> is carried out in an area that may have a contaminated or flammable atmosphere
<input type="checkbox"/> involves, or is likely to involve, disturbing asbestos	<input type="checkbox"/> involves tilt-up or precast concrete
<input type="checkbox"/> involves structural alteration or repair that requires temporary support to prevent collapse	<input type="checkbox"/> is carried out on, in or adjacent to a road, railway, shipping lane or other traffic corridor
<input type="checkbox"/> is carried out in or near a confined space	<input type="checkbox"/> is carried out in an area of a workplace where there is any movement of powered mobile plant
<input type="checkbox"/> is carried out in/near a shaft or trench deeper than 2m or tunnel involving use of explosives	<input type="checkbox"/> is carried out in areas with artificial extremes of temperature.
<input type="checkbox"/> is carried out in or near water or other liquid that involves a risk of drowning.	<input type="checkbox"/> involves diving work.

### ANY HIGH-RISK MACHINERY OR EQUIPMENT NEARBY

--	--

## RISK MATRIX

LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HEIRARCHY OF CONTROLS
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE			<b>Elimination</b> Remove the hazard.
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	<b>Substitution</b> Replace the hazard.
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review before work starts.	<b>Isolation</b> Isolate People from the hazard
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	2M MODERATE	Ensure control measures in place.	<b>Engineering</b> Isolate the hazard.
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH	1L LOW	Monitor and keep records	<b>Administrative</b> Change the work.
<b>Notes on Hierarchy of Controls:</b> Elimination methods are the most effective and preferred when controlling a hazard. Substitution is the second most effective method of controlling a hazard. Engineering by isolation is the third most effective, while Administrative Controls by changing the work is the fourth most effective method. PPE (Personal Protective Equipment) is the least effective method.								<b>PPE</b>

## PERSONAL PROTECTIVE EQUIPMENT (PPE)

Select the appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

FOOT PROTECTION	HAND PROTECTION	HEAD PROTECTION	HEARING PROTECTION	EYE PROTECTION	RESPIRATORY PROTECTION	FACE PROTECTION	HIGH-VIS CLOTHING	PROTECTIVE CLOTHING	FALL PROTECTION	SUN PROTECTION	HAIR/JEWELLERY SECURED

Other PPE Required:

## Permit or Licenses Requirements

## Mandatory Qualifications and Training

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Manual handling injuries, slips and falls	3H	<ul style="list-style-type: none"> <li>- Conduct a pre-task risk assessment to identify potential hazards associated with manual handling and slips or falls.</li> <li>- Provide adequate training for all workers involved in the preparation stage, focusing on safe lifting techniques and hazard awareness.</li> <li>- Ensure proper personal protective equipment (PPE) is available and used, including gloves and non-slip footwear.</li> <li>- Keep the work area clean, organized, and free from clutter to minimise trip hazards and improve access.</li> <li>- Use mechanical aids such as trolleys or hoists to reduce the risk of manual handling injuries when moving heavy equipment.</li> <li>- Set up temporary barriers or signage around the work area to alert others to potential hazards and restrict unauthorized access.</li> <li>- Encourage team lifts for heavy items, ensuring the weight is evenly distributed among workers.</li> <li>- Inspect tools and equipment before use to ensure they are in good condition and suitable for the task.</li> <li>- Implement clear communication protocols between team members to coordinate movements and actions effectively.</li> <li>- Establish and maintain a slip-resistant floor surface by keeping it dry and cleaning up any spills or debris promptly.</li> <li>- Regularly review and update safety procedures to incorporate new insights or changes in project scope.</li> </ul>	2M
2. Inspection	Electric shock, chemical hazards	3H	<ul style="list-style-type: none"> <li>- Ensure all electrical equipment is properly maintained, tagged, and tested in compliance with standards.</li> <li>- Use insulated tools and wear rubber gloves when inspecting electrical components to prevent electric shock.</li> <li>- Ensure that Lockout/Tagout (LOTO) procedures are strictly followed before inspection begins.</li> <li>- Provide specific training to workers on handling and identifying electrical hazards associated with marine refrigeration systems.</li> <li>- Use voltage detectors to ensure circuits are de-energised before conducting inspections.</li> <li>- Conduct thorough inspections for any exposed wires or damaged insulation and repair as necessary prior to starting work.</li> <li>- Provide appropriate Personal Protective Equipment (PPE) such as safety glasses, chemical-resistant gloves, and aprons when dealing with refrigerants and other chemicals.</li> <li>- Ensure adequate ventilation in the inspection area to avoid accumulation of toxic fumes from refrigerants.</li> </ul>	2M

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			<ul style="list-style-type: none"> <li>- Limit the number of personnel in the inspection area to avoid unnecessary exposure to potential chemical spills or leaks.</li> <li>- Clearly label all containers and pipes carrying chemicals to prevent accidental mix-ups during inspection processes.</li> <li>- Utilise spill containment kits specifically designed for refrigerants and have them readily accessible at the work site.</li> <li>- Implement emergency response procedures including eye wash stations and first aid kits tailored for chemical exposure.</li> <li>- Maintain an up-to-date Safety Data Sheet (SDS) for all chemicals on site and ensure easy access for all personnel.</li> <li>- Conduct regular refresher training on emergency evacuation procedures and proper use of PPE concerning chemical hazards.</li> </ul>	
3. Calibration	Equipment failure, physical injury	2M	<ul style="list-style-type: none"> <li>- Conduct a thorough pre-inspection of all calibration equipment and tools to check for any wear or damage.</li> <li>- Ensure all technicians are trained and competent in the calibration procedures and understand the risks involved.</li> <li>- Use only equipment that has been routinely maintained and serviced, adhering to manufacturers' specifications.</li> <li>- Implement a lockout/tagout system to ensure that calibration equipment is not accidentally engaged during maintenance.</li> <li>- Establish clear communication protocols among team members to promptly address unexpected issues or hazards.</li> <li>- Confirm that all personal protective equipment (PPE) such as gloves, goggles, and hearing protection are worn as necessary.</li> <li>- Keep a first-aid kit readily accessible at the work site in case of minor injuries.</li> <li>- Maintain a tidy work area to prevent tripping hazards and allow easy access to exit routes in case of emergency.</li> <li>- Utilise calibrated measuring devices certified within their valid calibration dates to prevent equipment malfunction.</li> <li>- Follow safe lifting techniques and use proper mechanical aids when handling heavy calibration equipment to avoid physical strain.</li> <li>- Establish an emergency response plan specific to calibration activities, ensuring all staff are briefed on it.</li> <li>- Regularly review and update risk assessments to reflect any changes in procedure or equipment used.</li> <li>- Monitor environmental conditions such as humidity and temperature that could affect the accuracy of calibration processes.</li> </ul>	1L
4. Servicing	Exposure to refrigerants, cut injuries	4A		3H

**SAMPLE**

Figure 1. Schematic representation of the experimental design. The figure is divided into four quadrants. The top-left quadrant is light blue. The top-right quadrant is light blue with horizontal black bars. The bottom-left quadrant is light yellow. The bottom-right quadrant is light yellow with horizontal black bars. A large, diagonal, grey watermark reading "SAMPLE" is overlaid across the entire figure.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR

## EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.

## SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

## SAFE WORK METHOD STATEMENT MONITORING AND REVIEW

**The SWMS must be reviewed regularly** to make sure it remains effective and must be reviewed (and revised if necessary) if relevant control measures are revised. The review must be carried out in consultation with workers (including contractors and sub-contractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

**The SWMS must be monitored regularly** for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

1. Spot Checks.
2. Consultation with workers, contractors and sub-contractors.
3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

### SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.	<input checked="" type="checkbox"/>	
All relevant personnel consulted during the development of the SWMS.	<input checked="" type="checkbox"/>	
Name, signature, position and date signed of the person approving the SWMS.	<input type="checkbox"/>	
Specific personnel and qualifications, experience is noted in the SWMS.	<input checked="" type="checkbox"/>	
Provides a step-by-step process of tasks required to carry out the activity or task.	<input checked="" type="checkbox"/>	
Adequate risk assessment of any identified hazards has been completed.	<input checked="" type="checkbox"/>	
Foreseeable hazards are identified and documented for each step.	<input checked="" type="checkbox"/>	
Any hazards listed in any site risk assessments have been added to the SWMS.	<input checked="" type="checkbox"/>	
SWMS initial risk (IR) column as well as residual risk (RR) column completed.	<input checked="" type="checkbox"/>	
Check control measures added to the SWMS are the most effective solutions.	<input checked="" type="checkbox"/>	
Responsible person is assigned and listed on the SWMS for the implementation of control measures.	<input checked="" type="checkbox"/>	
Permit or licenses requirements specified, such as Hot Work, Electrical Work, Work at Heights etc.	<input checked="" type="checkbox"/>	
SWMS identifies plant and equipment to be used.	<input checked="" type="checkbox"/>	
Details of inspection checks required for any equipment listed are noted on the SWMS.	<input checked="" type="checkbox"/>	
Describes any mandatory qualifications, experience, training or skills required to perform the work.	<input checked="" type="checkbox"/>	
Applicable personal protective equipment is selected on the SWMS.	<input checked="" type="checkbox"/>	
Reflects and documents any legislative references and/or Australian Standards.	<input checked="" type="checkbox"/>	
Identifies any hazardous substances used with specific control measures in line with any SDS.	<input checked="" type="checkbox"/>
