

**Metal Sanding Machine | SAFE WORK METHOD STATEMENT (SWMS)**

**TASK OR ACTIVITY: Metal Sanding Machine**

Business Name: [Company Name]	ABN: [ABN]	SWMS#
Business Address: [Company Address]		
Contact Person:	Phone: [Phone]	Email:

**THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE PROJECT MANAGER OF THE PROJECT**

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a safe work method statement (SWMS) is prepared before the proposed work starts.

Full Name:

Signature: \_\_\_\_\_ Title: \_\_\_\_\_ Date: \_\_\_\_\_

Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS, as well as reviews and modifications of the SWMS.

Full Name: \_\_\_\_\_ Title: \_\_\_\_\_ Phone: \_\_\_\_\_

**ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS SWMS MUST HAVE THE FOLLOWING COMMUNICATED** | **NAME AND DATED SIGNATURE OF ALL RELEVANT PERSONNEL WHO HAVE BEEN CONSULTED AND COMMUNICATED TO IN THE DEVELOPMENT AND APPROVAL OF THIS SWMS**

	NAME	SIGNATURE	DATE
Safety meetings or toolbox talks will be scheduled in accordance with legislative requirements to first identify any site hazards, then to communicate those hazards and then to further take steps to either eliminate or control each hazard.			
If an incident or a near miss occurs, all work must stop immediately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.			

**CLIENT OR PRINCIPAL CONTRACTOR DETAILS**

Client:	SCOPE OF WORKS Provide a detailed description of the specific work being carried out (otherwise known as scope of works).
Project Name:

RISK MATRIX										
LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HEIRARCHY OF CONTROLS		
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE			<b>Elimination</b> Remove the hazard.		
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	<b>Substitution</b> Replace the hazard.		
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review before work starts.	<b>Isolation</b> Isolate People from the hazard		
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	2M MODERATE	Ensure control measures in place.	<b>Engineering</b> Isolate the hazard.		
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH	1L LOW	Monitor and keep records	<b>Administrative</b> Change the work.		
								<b>PPE</b>		

**Notes on Hierarchy of Controls:** Elimination methods are the most effective and preferred when controlling a hazard. Substitution is the second most effective method of controlling a hazard. Engineering by isolation is the third most effective, while Administrative Controls by changing the work is the fourth most effective method. PPE (Personal Protective Equipment) is the least effective method.

PERSONAL PROTECTIVE EQUIPMENT (PPE)											
FOOT PROTECTION	HAND PROTECTION	HEAD PROTECTION	HEARING PROTECTION	EYE/FACE PROTECTION	RESPIRATORY PROTECTION	FACE PROTECTION	HIGH-VIS CLOTHING	PROTECTIVE CLOTHING	FALL PROTECTION	SUN PROTECTION	HAIR/JEWELLERY SECURED
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Select the appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

**Note:** A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS; and,
- workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Poor housekeeping, Untrained workers	3H	<ul style="list-style-type: none"> <li>- Conduct a meticulous cleanup and organisation of the workspace before the commencement of any activity to mitigate the risk from poor housekeeping.</li> <li>- Ensure daily inspections and periodic deep-cleaning of the workspace to maintain cleanliness and avoid tripping hazards.</li> <li>- Implement a routine inspection for potential risks, like electrical cords laying around or clutter that may pose tripping hazards.</li> <li>- Install appropriate signage indicating 'Work Under Progress' to alert other workers not involved in the task.</li> <li>- Provide comprehensive training sessions for all workers handling the Metal Sanding Machine. This should include theoretical and practical skill-building sessions.</li> <li>- Conduct regular site-specific safety briefings to ensure staff are reminded of the importance of safety regulations.</li> <li>- Provide manuals and clear, easy-to-understand operating instructions for all machinery, including the Metal Sanding Machine.</li> <li>- Encourage a culture where employees can ask questions and seek clarifications about machine operations to enhance their understanding and reduce risk of accidents.</li> <li>- Carry out competency assessments before authorising workers to operate the machinery independently. Only trained operatives should be permitted to use the Metal Sanding Machine.</li> <li>- Create an environment of continuous learning – Organise refresher courses and skills upgrading sessions periodically so that all workers remain updated with the latest safety procedures and operational standards.</li> </ul>	2M	
2. Checking tools	Faulty tools, Inadequate protective equipment	3H	<ul style="list-style-type: none"> <li>- Regular Inspection: Ensure regular maintenance and inspection of all tools prior to use. Any faulty tool should be reported immediately and replaced.</li> <li>- Equipment Training: Workers who are required to use the metal sanding machine should be trained in its safe use and operation. They should be able to identify top sources of risks or faults and know what actions to take.</li> <li>- Use of Personal Protective Equipment (PPE): Ensure workers wear appropriate PPE, including safety glasses, gloves, and dust masks whenever operating the metal sanding machine.</li> <li>- Correct Tool for Task: Always use the correct tool for the job. Don't substitute if you don't have the right tool.</li> <li>- Tool Storage: When not in use, tools should be safely stored away to reduce the risk of unintentional injuries.</li> <li>- Discard Damaged Tools: Any damaged, cracked, or broken tools should be immediately discarded to prevent injury.</li> </ul>	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul style="list-style-type: none"> <li>- Clear Workspace: Keep the work area clean and free from unnecessary clutter to minimize risks.</li> <li>- Avoid Loose Clothing or Jewelry: Workers should avoid wearing loose clothing or jewelry that could possibly get caught in the machine.</li> <li>- Ensure Adequate Ventilation: To mitigate the risk of inhaling metal dust, ensure adequate ventilation in the work space.</li> <li>- Follow Manufacturer's Manual: Always adhere strictly to the manufacturer's operational manual when using the metal sanding machine. This guide provides important safety tips and information on corrective measures in case of faults.</li> </ul>		
3. Setting up machine	Incorrect installation, Use of inappropriate tools		<ul style="list-style-type: none"> <li>- Ensure that the staff tasked with setting up the machine are properly trained and understand the correct procedures.</li> <li>- Use only approved tools during the setup process to avoid damage or misuse.</li> <li>- Verify that all components of the machine are installed correctly, including safety guards and emergency shutdown mechanisms.</li> <li>- Double check all connections and configurations before starting the machine.</li> <li>- Ensure that proper personal protective equipment (PPE) is worn during the setup process, such as gloves, safety glasses, and protective footwear where applicable.</li> <li>- Strictly follow the manufacturer's instructions when setting up the machine.</li> <li>- Before starting up the machine, conduct a thorough visual inspection to make sure it is in good working order.</li> <li>- Establish a safety perimeter around the area where the machine is being set up to prevent unauthorized individuals from accessing it.</li> <li>- Limit access to the machine set-up area strictly to trained personnel.</li> <li>- Regularly conduct preventative maintenance checks on the machine to ensure its condition does not pose any risks.</li> <li>- Use appropriate instruction signage and tags during machine installation to alert other workers about potential hazards.</li> <li>- Initiate risk assessments prior to machine usage and review the procedures if any new hazards are identified.</li> <li>- Keep an accident and incident logbook to record any issues that arise during setup; this can help identify trends or recurring problems and aid in preventative measures.</li> </ul>	2M

**SIGNATORIES OF THE SAFE WORK METHOD STATEMENT**

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

**SAFE WORK METHOD STATEMENT MONITORING AND REVIEW**

**The SWMS must be reviewed regularly** to make sure it remains effective and must be reviewed (and revised if necessary) if relevant control measures are needed. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

**The SWMS must be monitored regularly** for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

1. Spot Checks.
2. Consultation with workers, contractors and sub-contractors.
3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST			
This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.
