THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE PC. OF THE ROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person condute the proposed work starts.	icting a business or under thing (Pu (1) is	required to entry that a safe work method	statement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitorin $\gamma_{\rm e}$	compliance of the SWI, was well as re	eviews and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS	NA. 2 OF ALL RELEVANT PERSON	NEL WHO HAVE BEEN CONSULTED AND	COMMUNICATED TO IN THE
Safety meetings or toolbox talks will be scheduled in according with regislative requirements to first identify any site hazards, and the to contract the those hazards and then to further take steps to either eliminate or contract leach hazard.			
If an incident or a near miss occurs, all work must store an equately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			- Implement a buddy system where workers assist each other during the selection process to enhance control and coordination.	
			- Conduct regular inspections of the work area to it with and mitigate potential risks, including ensuring that the floor is free of debris and tripping har us.	
			- Train workers on proper procedures for a nual hand <sup>10</sup> of glass, including safe grip techniques and awareness of glass load limits.	
			- Develop emergency response procedures for a dents involving glass breakage or injuries and conduct regular drills.	
			- Install signage and barriers a fund areas where the stored to restrict access to authorised personnel only.	
			- Encourage safety-first on ture by promotive open communication about hazards and reinforcing the importance of oporting nour misses of cardous conditions immediately.	
			- Ensure, worked are equipped with appropriate personal protective equipment (PPE), including cut- resistance, we are one-sleeved clothing.	
	Cuts and abrasio , Eye injuries from shattered glass	44	- Provid safe glasse or goggles to protect against eye injuries from glass shards.	
			shaped us.	
			stall and maintain appropriate machine guards on glass cutting equipment to prevent direct contact w blades.	
			Train workers on the proper usage and handling of glass cutting tools and equipment.	
3. Cutting the Glass			- Use automated machinery for cutting when available to minimise manual handling and close contact with the glass.	2M
			- Implement a buddy system where feasible, ensuring there is always someone nearby to offer assistance or call for help if necessary.	
			- Regularly inspect and maintain cutting tools and machinery to ensure they are in good working condition and do not pose additional risks.	
			- Develop and enforce strict procedures for safely disposing of offcuts and broken glass to prevent accidental injuries.	
			- Provide clear signage and hazard warnings in areas where glass cutting is taking place to alert workers and visitors of potential dangers.	
			- Establish an emergency response plan that includes first aid procedures specifically for cuts and eye injuries, ensuring quick access to medical supplies.

#### **EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES**

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.

#### SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

#### SAFE WORK THE S ATEM AT MONITORING AND REVIEW The SWMS must be reviewed regularly to make sure it remain effect. and mu be reviewed (and The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are revised if necessary) if relevant control measures are revised. The s should be carried out in effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The view consultation with workers (including contractors person responsible for monitoring the effectiveness of the Safe Work Method Statement should ntractors nay be cted by the operation of the SWMS and their health and safety representatives who rep sented that work group at the employ a multi-faceted approach which includes but is not limited to: workplace. 1. Spot Checks. When the SWMS has been revised the PCBU must ensure the all versons involved with the work are 2. Consultation with workers, contractors and sub-contractors. advised that a revision has been made and how they can acce the revised SWMS, including all persons 3. Internal audits on a continual basis who will need to change a work procedure or system as a reof the review are advised of the changes in a way that will enable them to implement their duties ntly with the revised SWMS. All workers that An approach of continuous improvement, promptly recording inconsistencies or deficiencies, will be involved in the work must be provided with the relevant information and instruction that will assist followed up by immediate corrective action and consultation with all relevant personnel ensures them to understand and implement the revised SWMS. that the PCBU is consistently developing ever-improving systems of safe work principles.

#### SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS	
The company details have been entered, including the project name and address.			
All relevant personnel consulted during the development of the SWMS.	$\boxtimes$		
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	7		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.	$\boxtimes$		
Any hazards listed in any site risk assessments have been added to the Sλ. S.	$\boxtimes$		
SWMS initial risk (IR) column as well as residual risk (RR) column completed.	$\boxtimes$		
Check control measures added to the SWMS are the most effective sections.	$\boxtimes$		
Responsible person is assigned and listed on the spiral of the spiral entry of control measures.	$\boxtimes$		
Permit or licenses requirements specified, so in as Hot Work, Electrical Work, Work at Heights etc.	$\boxtimes$		
SWMS identifies plant and equipment to be	$\boxtimes$		
Details of inspection checks required for any equipment lister are noted on the SWMS.	$\boxtimes$		
Describes any mandatory qualifications, experience, ang or skills required to perform the work.	$\boxtimes$		
Applicable personal protective equipment is selected on the SWMS.	$\square$		
Reflects and documents any legislative references and/or Australian Standards.	$\boxtimes$		
Identifies any hazardous substances used with specific control measures in line with any SDS.	$\boxtimes$
