Nibbler   SAFE WORK METHOD STATEMENT (SWMS)								
	TASK OR ACTIVITY: Nibbler							
Business Name: [Company Name]		ABN: [ABN]	SWMS#					
Business Address: [Company Address]								
Contact Person:	Phone: [Phone]	E ail:						
THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE P OF THE PROJECT						
Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (F 3U) is required to surregular a safe work method statement (SWMS) is prepared before the proposed work starts.								
Full Name:								
Signature:		Title:	Date:					
Details of the person(s) responsible for ensuring implementation, monitoring	compliance of the SWMS well as review	s and modifications of the SWMS.						
Full Name:		Title:	Phone:					
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED	N. TE AND DATED SIGNATURE OF A CO. MUNICATED TO IN THE DEVELO	LL RELEVANT PERSONNEL WHO HAVE B OPMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND					
Safety meetings or toolbox talks will be sched ed in accordance with rgislative requirements to first identify any site hazards, conditioned in inicial those hazards and then to further take steps to either contact or contact each hazard.	NAME	SIGNATURE	DATE					
If an incident or a near miss occurs, all work must study unately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.								
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.								
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON		
			<ul> <li>Establish exclusion zones around the inspection area and use barriers and signage to restrict unauthorised access to avoid instances of being struck by objects.</li> </ul>				
			- Ensure adequate lighting around the inspection struor better visibility, helping workers identify hazards and respond promptive				
			- Train workers in safe working procedures, cluding process handling and storage of materials and equipment used during the instant stion meass.				
			- Store tools and equipment appropriately when the risk of dropped objects or trip haza.				
			<ul> <li>Provide workers with clear concurrication devices and y can alert others of potential hazards and pp. shing, viects and coordinate their movements accordingly.</li> <li>Conduct percent ic noise an essments and not review noise levels, ensuring</li> </ul>				
			they ain with the eptable range or workplace health and safety standards. - Sche built stagge, breaks for workers to allow them the opportunity to step away				
			from https://www.second.mitigate the effects of prolonged noise exposure. - Implement accided system during the inspection process so that workers look out seach ther's fety and are closely supervised, especially when navigating hat reduct situations.				
						Regulate view and update Safe Work Method Statements (SWMS) as needed, orporating any new hazards, control measures, or changes to existing procedures to mintain a safe work environment.	
			<ul> <li>Ensure all electrical equipment is properly inspected and tested before use, with up-to-date safety tags attached.</li> </ul>				
			- Keep all power cords and electrical cables clear of walkways and work areas to reduce tripping hazards.				
			- Use only approved and correctly rated extension leads and avoid overloading plug sockets or power boards.				
3. Setup	Electrical hazards, Falling objects	ЗН	- Implement a lockout/tagout procedure for any electrical equipment that is damaged or malfunctioning until repairs can be completed.	2M			
			- Make sure proper grounding procedures are followed, including the use of Ground Fault Circuit Interrupters (GFCIs) where necessary.				
			- Train all personnel in correct safe lifting techniques to prevent muscle strains and back injuries while setting up equipment.				
			- Regularly inspect and maintain ladders, scaffolds, and other access equipment to ensure their safety and stability.				
			- Set up exclusion zones around work areas where falling objects could pose a risk, and use appropriate signage to warn others to stay away.

#### SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

#### SAF WC A STHUD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to revised if necessary) if relevant control measure are subcontract of the SWMS and their health and safety representatives who reworkplace.

ke sure it remains effective and must be reviewed (and acception of the process should be carried out in s any subcontract s) who may be affected by the operation esentatives who recented that work group at the

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- 1. Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

#### SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.			
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWh			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effectine sections.			
Responsible person is assigned and listed on the SWMS for the impement of continue measures.			
Permit requirements specified, such as Hot Work, Electrical Work, Vortat Heights etc.			
SWMS identifies plant and equipment to be up t.			
Details of inspection checks required for any equipment listed at noted on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
