THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE POST THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or undertaking (N 3U) is	required to ture at a safe work method s	tatement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring a	ompliance of the SWMS well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED		LL RELEVANT PERSONNEL WHO HAVE BI PMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched ed in accordance with egislative requirements to first identify any site hazards, conditions those hazards and then to further take steps to either the conditions of the conditions are or conditional talks.	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must standardly. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Unsecured load, poor visibility	ЗН	 Ensure that the load is securely fastened and packaged properly prior to any vehicle journey. Routinely inspect the vehicle used for delivering checking brakes, mirrors, indicators and headlights to enhance visibility and safety on the road. Implement a visibility improvement plan success additor more lights or reflective materials to increase visibility during poor light countries. Provide all staff with approper the high-visibility chaing to ensure they are seen at all times, particularly in low-light phyrionnents. Delivery times should be checked and during optimal weather and daylight conditions where possible avoid has reds as related with door visibility. Conduct regular training assions of a life stalks on safe methods of securing loads and adhe on to a sed limits for obside delivery staff. Ensure allear are current site plan is always available. This includes marking out deliver are clear andicating all entry and exit points. Encounge to of spoors or banksmen while working in congested areas to guide hicle derator and maintain clear lines of sight. Develop in effective communication system for on-site workers. This could include adio could to hand signals for safer on-site operations. angularly review and monitor control measures in response to changes in environmental conditions, volume of work, and introduction of new equipment or processes. 	2M	
2. Arrival On-Site	Lack of proper signage, unfamiliar site conditions	ЗН	 All delivery vehicles must be equipped with proper safety gear including high visibility vests, hard hats, and steel toe boots as applicable. Site supervisors should communicate effectively with delivery personnel, providing them with a thorough briefing on arrival at the site regarding any specific hazards or conditions they ought to be aware of. Install adequate signage identifying entry and exit points for delivery vehicles. Implement a well-lit, clearly designated and secure delivery area. Regularly review and update site layout plans marking out vehicle routes, pedestrian paths, and access points. Make sure all delivery drivers are given these layouts. Ensure that a competent person is responsible for guiding trucks or large vehicles into the delivery areas. Provide appropriate training for all workers interacting with delivery vehicles to ensure they understand their role and required precautions. 	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Set up an effective communication system (like walkie talkies or mobile phones) to communicate changes in conditions or unexpected hazards to vehicle operators immediately.		
			- Make certain the delivery vehicle's reversing the mass are functional and heard by everyone in the vicinity during a vehicle's between move		
			- Any uneven terrain that could potentially can a slips of ps or falls should be levelled or clearly marked so as to minimise ris		
			- Keep the site tidy and free Mebris to prevent a dental trib or falls around the delivery area.		
			- The usage of species and ld be imployed when moving heavy loads to avoid collision with of secures or insonnic		
			- Swiftly repoil and rectify clential has belowe spills, fallen objects, exposed wires etc.		
			- Last, u efinite, of the least, regular toolbox talks should be held to refresh employ es howled about safety practices during onsite deliveries.		
			applement regular comprehensive vehicle checks to identify any mechanical faults early and spair them before vehicles are put to use.		
			Ensure that drivers are equipped with a checklist for conducting initial inspections fore commencing work.		
			- Develop a preventive maintenance schedule consistent with the vehicle manufacturer's recommendations.		
			- Emphasize the importance of reporting any faults, signs of wear and tear, or unusual sounds immediately so quick action can be taken to fix these issues.		
			- Provide proper training on vehicle maintenance tasks such as oil changes, belt checks, and tyre pressure checks. These basic checks can help avoid larger mechanical faults.		
3. Vehicle inspection	Mechanical faults, lack of mamenance	3H	- Equip all vehicles with emergency breakdown kits which include items like warning triangles, high visibility vests, and torches.	1L	
			- Assign qualified mechanics to conduct more complex maintenance checks periodically.		
			- Implement systematic checks for essential items such as brakes, steering systems, lighting systems, mirrors, and windscreen wipers.		
			- All vehicles should be kept clean and free from waste material that may have accumulated, which could conceal possible maintenance issues or safety hazards.		
			- Restrict entry to operational areas until clearance is provided by site manager or delegated personnel. No deliveries should be accepted without proper clearance.		
			- Never disregard minor problems; small mechanical issues can easily become larger and potentially dangerous ones if left unchecked.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P A	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	P		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWI			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting sections.			
Responsible person is assigned and listed on the SWMS for the imperent of contameasures.			
Permit requirements specified, such as Hot Work, Electrical Work, Vorat Heights etc.			
SWMS identifies plant and equipment to be u d.			
Details of inspection checks required for any equipment listed at noted on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
