SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Trip hazards, Incorrect equipment selection	2M	 Conduct a thorough inspection of the work site before commencing the task, identifying any potential trip hazards such as cables theven surfaces, or loose materials, and address them accordingly. Use appropriate signage and barrier tape usordon off the work area, minimising access to unauthorised personnel and reduce the rist outrip hazards. Make sure all walkways around the Panbrake in or are clear and free from obstructions that could cause trips or falls during reparation are operation. Clearly mark designated path usys for workers and usord unese pathways provide sufficient space for encreasing using the maneuvering uppent. Train workers or proper usual he dling tech uses when lifting and moving items during preparison, minimising strain in atention and preventing falls caused by improper lifting. Sele and inspection uppent prior to use, ensuring it is suited for the specific task at han all using in get working condition - replace or repair any faulty components immeduely. Implement a nullar maintenance schedule for all equipment, including the horake Tode, and tear or malfunctions before they become haze and. Develop an emergency response plan for incidents related to trip hazards and incorrect equipment selection, ensuring workers are trained on the proper procedures to follow in the event of an incident. Conduct toolbox talks and safety briefings to reinforce the importance of maintaining a clean and organised workspace, as well as operating equipment in accordance with manufacturer guidelines. Regularly assess and review the effectiveness of the implemented control measures and adjust or update procedures as necessary to maintain a safe work environment. 	2L	
2. Inspection	Maintenance oversight, Faulty equipment	2M	 Conduct regular visual inspections of the Panbrake Folder Manual to identify any signs of wear, damage, or potential maintenance issues. Develop and implement a preventive maintenance schedule for the Panbrake Folder Manual to address potential problems before they become hazards. Train all operators on the proper inspection techniques, equipment functions, and appropriate safety measures when using the Panbrake Folder Manual. Post clear signage and guidelines near the Panbrake Folder Manual outlining the required inspection steps and hazard identification processes. 	2L

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAF WC A STHUD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to revised if necessary) if relevant control measure are subcontract of the SWMS and their health and safety representatives who reworkplace.

ke sure it remains effective and must be reviewed (and acception of the process should be carried out in s any subcontract s) who may be affected by the operation esentatives who recented that work group at the

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- 1. Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.			
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWh			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effectine sections.			
Responsible person is assigned and listed on the SWMS for the impement of continue measures.			
Permit requirements specified, such as Hot Work, Electrical Work, Vortat Heights etc.			
SWMS identifies plant and equipment to be up t.			
Details of inspection checks required for any equipment listed at noted on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
