

## Partitioning Steel-Stud-Track | SAFE WORK METHOD STATEMENT (SWMS)

### TASK OR ACTIVITY: Partitioning Steel-Stud-Track

Business Name:	ABN:	SWMS#
Business Address:		
Contact Person:	Phone:	Email:

### THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE PCBU OF THE PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a safe work method statement (SWMS) is prepared before the proposed work starts.

Full Name:
------------

Signature:	Title:	Date:
------------	--------	-------

Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS as well as reviews and modifications of the SWMS.

Full Name:	Title:	Phone:
------------	--------	--------

### ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS SWMS MUST HAVE THE FOLLOWING COMMUNICATED

Safety meetings or toolbox talks will be scheduled in accordance with legislative requirements to first identify any site hazards, then to communicate those hazards and then to further take steps to either eliminate or control each hazard.

If an incident or a near miss occurs, all work must stop immediately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.

Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.

The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

### NAME OF ALL RELEVANT PERSONNEL WHO HAVE BEEN CONSULTED AND COMMUNICATED TO IN THE DEVELOPMENT AND APPROVAL OF THIS SWMS

### CLIENT OR PRINCIPAL CONTRACTOR DETAILS

Client:	SCOPE OF WORKS
Project Name:

Date SWMS supplied to Project Manager:	

### ANY HIGH-RISK CONSTRUCTION WORK BEING CARRIED OUT

<input type="checkbox"/> involves a risk of a person falling more than 2 meters	<input type="checkbox"/> is carried out on or near pressurised gas mains or piping
<input type="checkbox"/> is carried out on a telecommunication tower	<input type="checkbox"/> is carried out on or near chemical, fuel or refrigerant lines
<input type="checkbox"/> involves demolition of an element of a structure that is load-bearing	<input type="checkbox"/> is carried out on or near energised electrical installations or services
<input type="checkbox"/> involves demolition of an element related to the physical integrity of a structure	<input type="checkbox"/> is carried out in an area that may have a contaminated or flammable atmosphere
<input type="checkbox"/> involves, or is likely to involve, disturbing asbestos	<input type="checkbox"/> involves tilt-up or precast concrete
<input type="checkbox"/> involves structural alteration or repair that requires temporary support to prevent collapse	<input type="checkbox"/> is carried out on, in or adjacent to a road, railway, shipping lane or other traffic corridor
<input type="checkbox"/> is carried out in or near a confined space	<input type="checkbox"/> is carried out in an area of a workplace where there is any movement of powered mobile plant
<input type="checkbox"/> is carried out in/near a shaft or trench deeper than 2m or tunnel involving use of explosives	<input type="checkbox"/> is carried out in areas with artificial extremes of temperature.
<input type="checkbox"/> is carried out in or near water or other liquid that involves a risk of drowning.	<input type="checkbox"/> involves diving work.

### ANY HIGH-RISK MACHINERY OR EQUIPMENT NEARBY

--	--

## RISK MATRIX

LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HEIRARCHY OF CONTROLS
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE			<b>Elimination</b> Remove the hazard.
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	<b>Substitution</b> Replace the hazard.
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review before work starts.	<b>Isolation</b> Isolate People from the hazard
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	2M MODERATE	Ensure control measures in place.	<b>Engineering</b> Isolate the hazard.
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH	1L LOW	Monitor and keep records	<b>Administrative</b> Change the work.
<b>Notes on Hierarchy of Controls:</b> Elimination methods are the most effective and preferred when controlling a hazard. Substitution is the second most effective method of controlling a hazard. Engineering by isolation is the third most effective, while Administrative Controls by changing the work is the fourth most effective method. PPE (Personal Protective Equipment) is the least effective method.								<b>PPE</b>

## PERSONAL PROTECTIVE EQUIPMENT (PPE)

Select the appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

FOOT PROTECTION	HAND PROTECTION	HEAD PROTECTION	HEARING PROTECTION	EYE PROTECTION	RESPIRATORY PROTECTION	FACE PROTECTION	HIGH-VIS CLOTHING	PROTECTIVE CLOTHING	FALL PROTECTION	SUN PROTECTION	HAIR/JEWELLERY SECURED

Other PPE Required:

## Permit or Licenses Requirements

## Mandatory Qualifications and Training

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Site Preparation	Trip hazards, Exposure to hazardous substances	2M	<ul style="list-style-type: none"> <li>- Conduct a thorough site inspection to identify and remove any existing trip hazards such as loose cables, debris, or uneven surfaces before work begins.</li> <li>- Clearly mark areas with potential trip hazards using warning signs or barrier tape to highlight the risks to workers.</li> <li>- Provide proper storage for tools and materials to prevent them from being left on the ground and becoming trip hazards.</li> <li>- Regularly sweep and clean the work area to ensure it remains free of debris and dust that could cause slips or trips.</li> <li>- Ensure adequate lighting is available in all work areas to improve visibility and help identify potential hazards.</li> <li>- Train all personnel on the importance of maintaining a tidy workspace and adhering to housekeeping protocols.</li> <li>- Use appropriate personal protective equipment (PPE), including gloves and safety boots with slip-resistant soles, to reduce the risk of slips and falls.</li> <li>- Implement a spill management plan to promptly deal with any spills of hazardous substances, minimising hazards and chemical exposure.</li> <li>- Store hazardous substances according to manufacturer's instructions and relevant Australian standards to prevent accidental exposure.</li> <li>- Provide Material Safety Data Sheets (MSDS) for all hazardous substances on-site and ensure they are easily accessible to all workers.</li> <li>- Conduct training sessions on the handling of hazardous substances, including the correct use of PPE and emergency procedures in the event of exposure.</li> <li>- Ensure that ventilation systems are adequate to reduce the inhalation risks associated with volatile or hazardous substances.</li> <li>- Designate specific areas for the mixing or handling of hazardous chemicals away from general work zones to limit widespread exposure.</li> <li>- Develop and enforce a strict check-in procedure for monitoring substances entering and leaving the site to maintain control over hazardous materials.</li> </ul>	1L
2. Material Handling	Manual handling injuries, Struck by falling objects	3H	<ul style="list-style-type: none"> <li>- Use mechanical lifting aids such as forklifts or hoists to move heavy steel studs and tracks to avoid manual handling injuries.</li> <li>- Conduct regular safety training for workers on proper lifting techniques and the use of mechanical aids.</li> <li>- Keep pathways clear and floors free from debris to prevent slips, trips, and falls while handling materials.</li> </ul>	2M

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			<ul style="list-style-type: none"> <li>- Implement a buddy system for carrying long or unwieldy items to distribute weight evenly and reduce strain.</li> <li>- Store materials close to work areas to minimise the distance over which heavy items need to be carried.</li> <li>- Organise and secure all materials neatly to prevent them from tipping over and causing struck-by injuries.</li> <li>- Use personal protective equipment (PPE), such as steel-toed boots, gloves, and hard hats, to protect against falling objects.</li> <li>- Establish exclusion zones around areas where heavy materials are being moved or lifted.</li> <li>- Schedule regular inspections of all lifting equipment and handling gear for integrity and safety compliance.</li> <li>- Provide instructional signage and barriers around storage areas to alert staff of potential hazards.</li> <li>- Limit the amount of materials handled manually by using pre-cut steel studs and tracks where possible.</li> <li>- Rotate tasks among workers to mitigate the risk of repetitive strain injuries from continuous handling.</li> <li>- Implement stretching and warm-up exercises before shifts to reduce the risk of musculoskeletal injuries.</li> <li>- Ensure that first aid kits and injury management guidelines are readily accessible in case of an accident.</li> </ul>	
3. Tool Setup	Electrical shock, Equipment malfunction	3H	<ul style="list-style-type: none"> <li>- Ensure tools and equipment are inspected and tested by a competent person before use to confirm they are in good working condition</li> <li>- Use only tools and equipment that meet Australian Standards and manufacturer specifications</li> <li>- Provide training for all workers on how to safely operate tools and identify signs of equipment malfunction</li> <li>- Implement regular maintenance schedules for tools and equipment to prevent malfunctions and ensure efficient operation</li> <li>- Use Residual Current Devices (RCDs) with all power tools to prevent electrical shock</li> <li>- Ensure all electrical cords, plugs, and connectors are intact and free of damage before use</li> <li>- Keep the work area well-lit to enhance visibility and reduce the risk of accidents involving electrical tools</li> <li>- Store tools safely when not in use to prevent hazards associated with electrical equipment</li> <li>- Establish clear procedures on what steps to take in case of an electrical emergency or equipment malfunction</li> <li>- Prohibit the use of homemade or modified tools as they can pose significant safety risks</li> <li>- Position and secure extension leads and power cords away from traffic areas to minimise trip hazards and protection from damage</li> <li>- Train staff to conduct regular visual inspections of tools and report any issues immediately to supervisors for corrective action</li> </ul>	1L
4. Cutting Materials	Lacerations, Noise-induced hearing loss	3H		2M

## EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.

## SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

## SAFE WORK METHOD STATEMENT MONITORING AND REVIEW

**The SWMS must be reviewed regularly** to make sure it remains effective and must be reviewed (and revised if necessary) if relevant control measures are revised. The review must be carried out in consultation with workers (including contractors and sub-contractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

**The SWMS must be monitored regularly** for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

1. Spot Checks.
2. Consultation with workers, contractors and sub-contractors.
3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

## SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.	<input checked="" type="checkbox"/>	
All relevant personnel consulted during the development of the SWMS.	<input checked="" type="checkbox"/>	
Name, signature, position and date signed of the person approving the SWMS.	<input type="checkbox"/>	
Specific personnel and qualifications, experience is noted in the SWMS.	<input checked="" type="checkbox"/>	
Provides a step-by-step process of tasks required to carry out the activity or task.	<input checked="" type="checkbox"/>	
Adequate risk assessment of any identified hazards has been completed.	<input checked="" type="checkbox"/>	
Foreseeable hazards are identified and documented for each step.	<input checked="" type="checkbox"/>	
Any hazards listed in any site risk assessments have been added to the SWMS.	<input checked="" type="checkbox"/>	
SWMS initial risk (IR) column as well as residual risk (RR) column completed.	<input checked="" type="checkbox"/>	
Check control measures added to the SWMS are the most effective solutions.	<input checked="" type="checkbox"/>	
Responsible person is assigned and listed on the SWMS for the implementation of control measures.	<input checked="" type="checkbox"/>	
Permit or licenses requirements specified, such as Hot Work, Electrical Work, Work at Heights etc.	<input checked="" type="checkbox"/>	
SWMS identifies plant and equipment to be used.	<input checked="" type="checkbox"/>	
Details of inspection checks required for any equipment listed are noted on the SWMS.	<input checked="" type="checkbox"/>	
Describes any mandatory qualifications, experience, training or skills required to perform the work.	<input checked="" type="checkbox"/>	
Applicable personal protective equipment is selected on the SWMS.	<input checked="" type="checkbox"/>	
Reflects and documents any legislative references and/or Australian Standards.	<input checked="" type="checkbox"/>	
Identifies any hazardous substances used with specific control measures in line with any SDS.	<input checked="" type="checkbox"/>
