If an incident or a near miss occurs, all work must study unately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.							
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.							
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Manual handling injuries, Cluttered workspace	2М	 Conduct thorough training sessions for employees on proper manual handling techniques, including correct lifting posture and how nusse mechanical aids when possible. Implement a system of regular breaks to concreate workers have ample opportunity to rest and recover from the physical demands of the task? Include warm-up exercises and stretching row on as part of the worker's daily routine to help reduce the risk of manual handlin, unjuries. Ensure all employees wear a propriate personal present requipment (PPE), such as gloves and support to botwe to prevent injury to origo manual handling tasks. Establish demanated store area and clear to ways in the workspace to minimise claus and reduce ne risk to tips untails. Ensure the part sharer machine any other equipment are properly maintained and fructioning a contract by prevent malfunction-related injuries. Cleant motion and entrice weight limits for manual lifting and communicate this informa on to tell employees. Set up to lage to identify wet or slippery surfaces clearly, ensuring that workers a ware of potential hazards and can take necessary precautions. Regularly inspect the workplace for hazards and promptly address any identified issues, such as damaged equipment, spilled material, or uneven flooring. Maintain proper lighting levels in the workspace to improve visibility and reduce the risk of accidents occurring due to poor visibility. Develop ergonomic workstations, focusing on aspects like adjustable-height tables and comfortable seating arrangements to minimise strain on workers' bodies. Review and update workplace health and safety procedures regularly to ensure they align with the latest best practices and stay relevant to the specific needs of the work environment. 	1L	
2. Machine Setup	Incorrect installation, Electrical hazards	3H	 Ensure all machine parts are properly assembled according to the manufacturer's instructions and guidelines, addressing any potential risks of incorrect installation. Conduct a thorough inspection of the Pastry Sheeter to ensure all components, including electrical connections, are securely fastened and in their correct positions. Verify that the electrical supply is compatible with the machine's requirements, and confirm its appropriate voltage, amperage, and grounding as per manufacturer's specifications. 	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			 Install an appropriate circuit breaker or residual current device (RCD) to reduce the risk of electrical shocks resulting from overcurrents, short circuits, or earth leakage faults. Provide training to all staff who will be operation one Pastry Sheeter, ensuring they understand safe setup procedures and car participation processing the paradist related to incorrect installation and electrical issues. Regularly conduct maintenance checks on the new one to inspect for wear and tear, loose connections, frayed cables, or any our signs of data age that could pose a risk during operation. Use only high-qualities and suppresent when setup, up or adjusting the Pastry Sheeter to minime more from firms per installation or accidental damage to electrical constants. Keep the sum ending and clean and superior obstructions or debris to avoid any accidents or miscles and the setup process. This includes maintaining clear access its the mache's power source and emergency stop controls. Follow a domenter blockout Tagout (LOTO) procedure during setup to help prevent mexils at components. Machine roper communication between machine operators, maintenance ersonne on suppressions during each stage of the setup process to address any accerns or questions regarding safe operation and hazard identification. Folvide personal protective equipment (PPE) such as gloves, safety glasses, and steel-toed shoes for workers involved in the setup process to protect against potential injuries from sharp edges, falling objects, or electrical hazards. Display warning labels and signage near the Pastry Sheeter to remind workers of potential hazards during set-up, such as risks from moving parts, electrical hazards, or pinching injuries. 		
3. Dough Prepping	Food contamination, Knife injuries	2М	 Regular handwashing: Ensure all workers wash their hands thoroughly with soap and water before handling any food products, as well as throughout the work process to minimise the risk of food contamination. Food-safe gloves usage: Encourage the use of disposable, food-safe gloves when handling dough and other ingredients, particularly when using knives or other sharp tools. Proper Knife handling training: Provide proper knife handling training to all workers, including regular refreshers, to ensure they are confident in safe cutting techniques to avoid injuries. Equipment Maintenance: Keep the pastry sheeter and associated equipment clean and well-maintained to prevent any malfunction that may lead to injury or contamination. 	1L

SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			 Clear working area: Maintain a clean and organised workspace by removing any clutter or debris, ensuring there is enough room for workers to safely perform their duties. Temperature control: Store raw dough and other perishable items at appropriate temperatures to minimise the risk of bacteringrowth and potential foodborne illnesses. Personal Protective Equipment (PPE): Encode terms use of PPE, such as cutresistant gloves, to minimise the risk of knife-related injuries. First Aid Kits availability: Kee vell-stocked first an site of steam and readily accessible in case of energian accidents during a dough prepping process. Adequate signing: Use of an anomaliable signate undicate areas where hazards exist, such an exation: Worfloors" of Warning: Sharp Objects." Destanted chang are . Set up clean marked, designated cutting areas for separation cutting on a form other preparation processes to reduce cross-contain name and usidental injuries. Allergin awarness: educate staff on the importance of allergen management, iscluding oroper abeling and storage of allergenic ingredients, to avoid cross-to tamin in on an subsequent allergic reactions. Superior and monitoring: Assign experienced supervisors to oversee the dough epping process to ensure that proper safety protocols are followed and hazards a unitigated in a timely manner. Incident reporting: Encourage workers to report any accidents, near misses, or unsafe practices observed in the dough prepping process for prompt investigation and corrective action.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAF WC A STHUD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to revised if necessary) if relevant control measure are subcontract of the SWMS and their health and safety representatives who reworkplace.

ke sure it remains effective and must be reviewed (and acception of the process should be carried out in s any subcontract s) who may be affected by the operation esentatives who recented that work group at the

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- 1. Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.			
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWh			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effectine sections.			
Responsible person is assigned and listed on the SWMS for the impement of continue measures.			
Permit requirements specified, such as Hot Work, Electrical Work, Vortat Heights etc.			
SWMS identifies plant and equipment to be up t.			
Details of inspection checks required for any equipment listed at noted on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
