Plastic Drum Recycling Bulk	Containers   SAFE WORK	METHOD STATEMENT (SWM	S)
TASK OR AC	TIVITY: Plastic Drum Recycling B	Bulk Containers	
Business Name: [Company Name]		ABN: [ABN]	SWMS#
Business Address: [Company Address]			
Contact Person:	Phone: [Phone]	E ail:	
THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE P. J OF THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conductive proposed work starts.	icting a business or undertaking (N 3U) is	required to ture out a safe work method s	statement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring	compliance of the SWMS well as review	vs and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED		ALL RELEVANT PERSONNEL WHO HAVE B OPMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched ed in accordance with egislative requirements to first identify any site hazards, conduct unica those hazards and then to further take steps to either chare or contained with each hazard.	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must study unately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Slips and falls, Poor housekeeping	2M	<ul> <li>Conduct a pre-work inspection of the area to identify and address any potential hazards and housekeeping issues prior to starting the selection and preparation of plastic drums.</li> <li>Clearly designate work zones with approprive safety signage and barriers to maintain an organised and hazard-free work ace.</li> <li>Provide training to workers on proper handling menuques in order to prevent slips, trips, and falls during the preparation process.</li> <li>Ensure that all employees are rearing required P to prevote the Equipment (PPE), including slip or tent sites, gloves, and satt egoggles, to mitigate risks associated with use and us or do or injurites.</li> <li>Implement regular clear of school to contain a tidy and clutter-free worksproe, the by reducing the likeling and accidents caused by poor house the by reducing the likeling and serviced regularly to minimise the risk of malfundons and ling to underts.</li> <li>Verific thread litic to a rade as or best or used and cleaned plastic drums, as well as waste materials benerated during the recycling process, to keep the work area clean and inderly.</li> <li>Promote a strong safety culture among employees; encourage open comunication and reporting of near misses or hazards to help identify and mitigate risks in a timely manner.</li> <li>Regularly review and update the Standard Work Method Statement (SWMS) to incorporate new risks and control measures based on ongoing learnings from the work environment.</li> <li>Require a supervisor or a competent person to periodically inspect the workplace throughout the day, ensuring compliance with all safety processes and procedures.</li> <li>Develop strategies to ensure safe manual handling of plastic drums, such as utilising drum lifting devices and mechanical aids, trolleys, or pallet jacks to move the bulk containers.</li> </ul>	1L	
2. Inspection	Sharp edges, Chemical exposure	ЗH	- Personal Protective Equipment (PPE): Workers should wear proper PPE, including safety gloves to protect hands from sharp edges, safety goggles to shield eyes from chemical splashes, and long-sleeved clothing to cover exposed skin.	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul> <li>Regular inspection and maintenance: Periodically inspect the plastic drums for any damages or defects that may lead to sharp edges, and fix or replace them as needed.</li> <li>Chemical-resistant containers: Ensure all place drums are made of materials resistant to chemicals being used or stored to avoid potential leaks and exposure risks.</li> <li>Proper labeling: Label each plastic drum with the uppe of substance it contains, along with appropriate hazardsymbols and hans to instruction to inform workers of the contents inside and possib hazards.</li> <li>Training: Provide or traine to employees on the correct procedures for inspecting and beauing putie drues, as well as the potential hazards associated with these tat.</li> <li>Ventilation: Ensure addicate ventilations present around the work area, especially if harmachemics are present, to minimise the risk of chemical exposure to worke.</li> <li>Spill in spong plant, evelop and implement a spill response plan in case of accident relative of comicals during inspection, which may include containment easure clearen procedures, and first aid protocols.</li> <li>Use the propriate tools: Equip workers with specialised tools, such as de-burring ools on the protectors, to safely handle sharp edges while inspecting plastic irms.</li> <li>Proper disposal: Dispose of damaged drums or those with unrepairable sharp edges according to local waste management regulations to avoid potential injuries or incorrect recycling.</li> <li>Reporting system: Encourage workers to report any hazards, including sharp edges or chemical exposures, immediately to their supervisor to allow for prompt action and prevent further incidents.</li> </ul>		
3. Sorting	Manual handling, Pinch points	2M	<ul> <li>Implement a proper manual handling training programme for workers involved in the sorting process, including lifting techniques and posture awareness.</li> <li>Set up ergonomically designed workstations with suitable heights and adequate space for employees to reduce excessive reaching and bending while sorting bulk containers.</li> <li>Establish a rotation system among team members to minimise repetitive tasks and lower the risk of injuries due to overexertion.</li> <li>Provide appropriate personal protective equipment (PPE) such as gloves and steel- toed boots to protect against pinch points and other potential hazards.</li> <li>Clearly mark designated pathways for moving materials, segregating pedestrian and vehicle traffic to avoid collisions and accidents.</li> </ul>	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Develop standard operating procedures for the sorting process, ensuring that all employees adhere to them consistently.		
			- Utilise mechanical aids or lifting devices whenever cossible to minimise manual handling of heavy or awkward items.		
			- Set reasonable daily targets and take region breaks to bid fatigue-related errors and injuries.		
			- Encourage open communication among team onbers to allow discussion of potential risks and adjustment of r safer operation		
			- Uphold good housekeeping plustices to maintain a sub-rand organised workplace, reducing tripping the area of promoting efficient worknows.		
			- Conduct remar inspection and must enable on tools and equipment used during the sorting process to ensure they remain a safe working condition.		
			- Have vergene finand kits readily available in close proximity to the sorting area for property reatmened of an injury.		
			- Ensul, prover lightly is installed in the sorting area to eliminate dark spots, reducing the highlight accidents.		
	1		<ul> <li>form eriod, eviews and updates to the SWMS to keep it current and relevant to the section of the workplace, as well as incorporating any new hazards lentifies</li> </ul>

#### SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

#### SAF WC A STHUD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to revised if necessary) if relevant control measure are subcontract of the SWMS and their health and safety representatives who reworkplace.

ke sure it remains effective and must be reviewed (and acception of the process should be carried out in s any subcontract s) who may be affected by the operation esentatives who recented that work group at the

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- 1. Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

#### SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.			
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWh			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effectine sections.			
Responsible person is assigned and listed on the SWMS for the impement of continue measures.			
Permit requirements specified, such as Hot Work, Electrical Work, Vortat Heights etc.			
SWMS identifies plant and equipment to be up t.			
Details of inspection checks required for any equipment listed at noted on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
