THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE P. OF THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or undertaking (N 3U) is	required to turn out a safe work method s	statement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring	compliance of the SWMS well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A CO. MUNICATED TO IN THE DEVELO	ILL RELEVANT PERSONNEL WHO HAVE B OPMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched ed in accordance with agislative requirements to first identify any site hazards, hazards and then to further take steps to either the condition of the condition o	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must structurately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

			A								

Select me appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Tripping hazard, Incorrect machine setup	2M	 Ensure that the work area is clean and free from any obstructions or debris that might cause tripping hazards before starting the tast. Mark the work zone using safety cones or tenturary barriers, to alert others of potential trip hazards and maintain a safe to king area. Familiarise yourself with proper use and set nof the parable strapping machine by reviewing manufacturer instructions and attend to revent training sessions prior to commencing the task. Verify that all the parts of the pachine are in good parking order, and assess its suitability for the specific skill and, ensuring it met up preset safety standards. Adopt appronouse persons protein a equipment (PPE) such as safety shoes with non-slip sole to ough glove to handle the stroping, and eyewear to protect against potential projectes while curating the parallel. Contractific contracts or supervisors in case of uncertainty about correct machines supplied by a parable parable to the project. Ensure degree a lighting conditions in the workspace to minimise shadow or glare to may terfere bith visibility, ultimately reducing the risk of trips and improper mabines at age. Maintain and clutter-free environment by placing tools and materials not in use away in an walkways and workspaces, reducing the overall likelihood of tripping or other accidents. If necessary, employ the use of anti-fatigue mats in standing work areas to reduce fatigue-related risks, supporting workers in maintaining their balance and focus during tasks. Establish and enforce an ongoing routine of inspections and maintenance for both the work area and portable strapping machine, helping to reduce the chances of hazards manifesting and ensure compliance with workplace health and safety regulations. 	1L	
2. Load Strapping Material	Manual handling strain, Pinch points	2M	 Proper training: Ensure all workers are adequately trained in the safe handling and loading procedures of strapping materials. Use correct lifting techniques: Encourage workers to bend at their knees rather than their backs when lifting heavy loads, thus reducing the risk of manual handling injuries. Proper personal protective equipment (PPE): Require workers to wear safety gloves and safety shoes to protect against pinch points and other potential hazards during manual handling tasks. Implement a buddy system: Have two workers handle the loading process together, ensuring that the weight of the strapping material is distributed evenly between them. 	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			 Workstation ergonomics: Arrange the workstation in such a way that workers do not have to excessively bend or stretch to load strapping materials. 		
			- Regular breaks: Encourage workers to take short leaks at regular intervals to prevent fatigue and strain during prolonged per so of manual handling tasks.		
			- Inspection and maintenance: Regularly in sect the port se strapping machine for any damages or wear, and keep it well-main sed to sure its safe and efficient operation.		
			- Clear communication: Estate th clear community on among orkers to facilitate coordination and teamwork due to the loading processing the risk of accidents due to miscommunication.		
			- Use mechanic aids: Util equit ent such colleys or pallet jacks whenever possible to a set with the to asportant and and ingling of heavy strapping materials.		
			- Keep pork are slear and clutter-free. Maintain a tidy workspace with ample space for more spant, record the risk of trips, slips, and falls during manual handling tasks.		
			- Rotate ask limit to duration of repetitive manual handling tasks by rotating workers especially bilities, thus reducing the risk of injury related to overexertion.		
	•		- Puride uidance on safe grip and hand placement: Offer specific instruction on how to early grip and support strapping materials to minimise the risk of finger d hand upuries.		
			- Nation worker health: Encourage workers to report any discomfort, pain, or signs of injury immediately, allowing for early intervention to prevent worsening conditions.		
			- Conduct risk assessments: Regularly assess the potential hazards associated with the loading process, and implement appropriate control measures to mitigate identified risks.		
			- Provide thorough training for workers on how to correctly position packages and the proper use of the portable strapping machine, including identifying potential hazards and implementing control measures.		
			- Ensure that the workspace layout provides adequate clearance for workers to safely move around and position packages without coming into contact with stationary or moving objects.		
3. Position Package	Collision with objects, Toppling of package	2M	- Implement a colour-coded marking system to indicate designated storage areas for package positioning, reducing the risk of collision with other objects in the workspace.	1L	
			- Utilise lifting aids, such as pallet jacks or trolleys, to assist workers in positioning heavier packages, reducing the strain on workers and minimising the likelihood of toppling packages.		
			- Securely stack packages in a pyramidal or interlocking pattern to prevent toppling during the positioning process.		

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Frequently inspect the work area for potential obstacles, such as uneven surfaces or debris, that may cause packages to topple during positioning, and rectify issues promptly.		
			- Encourage open communication among team tembers to discuss any concerns or issues related to package positioning and the use of the portable strapping machine.		
			- Establish and maintain a safe working distance between workers and their tasks, accounting for potential package toppling or control with other objects.		
			- Require the use of appropriate personal protection equipment, PPE) for workers, including steel-toed boots and the historians the visibility vests, and the risk of injury in the event of a collision coulding page.		
			- Conduct required audits on pirk pincices to encompliance with established safety protocolidentifying betential passing inprovement.		
			- Post par sign be to pland workers a proper package positioning techniques and potent a parads a may encounter during this work step.		
			- Imple en buddy stem for larger or more challenging package positioning tasks, p imo a team ork and shared responsibility for achieving a safe work anvironment.		
	•		- Leaving a work as to report near-miss incidents or unsafe practices they observe, opportunity for ongoing improvement and the development of a safety-nacious culture within the organisation.		
			- Jularly review and update the Safe Work Method Statement (SWMS) to ensure it remains current and relevant, incorporating any new hazards or control measures identified through continuous improvement processes.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	P		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWh			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting so tions.			
Responsible person is assigned and listed on the SWMS for the imperent of continue assures.			
Permit requirements specified, such as Hot Work, Veralt Heights etc.			
SWMS identifies plant and equipment to be u d.			
Details of inspection checks required for any equipment listed are noted on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
dentifies any hazardous substances used with specific control measures in line with any SDS.
