THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE PC. OF TP' ROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conductor the proposed work starts.	acting a business or und ring (P V) is	required to en that a safe work method	statement (SWMS) is prepared before
Full Name:			
Signature:	NY	Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring	compliant e of the SWIL as well as re	eviews and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS VMS HAVE THE FOLLOWING COMMUNICATED	NA. 2 OF ALL RELEVANT PERSONN EVELOPMENT AND APPROVAL OF	NEL WHO HAVE BEEN CONSULTED AND THIS SWMS	COMMUNICATED TO IN THE
Safety meetings or toolbox talks will be scheduled in according with regislative requirements to first identify any site hazards, to continuing the those hazards and then to further take steps to either eliminate or con			
If an incident or a near miss occurs, all work must stead dately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Injury from heavy equipment lifting, Slips, falls and trips	ЗН	<ul> <li>Conduct a pre-burn site inspection to ideal, and mark out uneven surfaces, obstacles, and hazards.</li> <li>Ensure all team members are trained in no ual harang techniques and proper lifting procedures.</li> <li>Utilise appropriate lifting equipment such as a veys or mechanical hoists for moving heavy items, reducing the need for many lifting.</li> <li>Provide personal protective entoment (PPE) such as a veys, sturdy boots, and high-visibility clothing for all personnel involutions are prevation phase.</li> <li>Establish cho communitation procols us addios or hand signals to coordinate movements and equipment unamong the eam.</li> <li>Implicant tags on agging methods to highlight potential trip hazards and areas of unstable ground.</li> <li>Designation pathways away from slopes, ditches, or any steeply inclined areas to avoid slips and falls.</li> <li>Schedie in ular represents for workers engaged in physically demanding tasks to prevent fatigue-related cide.</li> <li>Longoy buddy, system during the preparation stage to ensure assistance is readily available in case of injury as ergency.</li> <li>Issign a safety officer to oversee operations and respond swiftly to any emerging risks or incidents.</li> <li>Use non-slip mats and surfaces where feasible, particularly in areas prone to moisture accumulation.</li> <li>Maintain an adequate first aid kit on-site, with personnel trained in its use present throughout the activity.</li> <li>Monitor weather conditions continuously and postpone activities if conditions become too hazardous, such as wet or foggy environments that could cause slips.</li> <li>Erect safety signs and barriers around operational zones to keep unauthorized personnel and bystanders at a safe distance.</li> </ul>	2M
2. Firebreak Establishment	Fire risk, Smoke inhalation	4A	<ul> <li>Ensure that all personnel are trained in fire safety procedures and understand the risks associated with prescribed burning operations.</li> <li>Establish clear communication protocols using two-way radios to keep all team members informed of operational progress and any changes in conditions.</li> <li>Set up designated safe zones where personnel can retreat in case of emergency, ensuring these areas are free of combustible materials.</li> <li>Conduct a thorough inspection of the site to identify and clear potential hazards along the firebreak path, such as dry vegetation or flammable debris.</li> <li>Implement strict control over ignition sources by using approved equipment and maintaining a safe distance between ignition points and fuel loads.</li> </ul>	ЗН

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS  - Wear appropriate personal protective equipment (PPE), including fire-resistant clothing, gloves, face masks, and eye protection to minimise exposure to smoke and heat.  - Monitor weather conditions closely, particularly for speed and direction, as these can significantly impact the behaviour of the fire.  - Utilise mechanical aids like bulldozers of adders to crope and maintain clear firebreaks that are wide enough to effectively contain the fire within a intermed area.  - Keep firefighting equipment, such as water to s, hoses, and portable extinguishers, on standby at strategic locations around to worksite.  - Rotate crew members regular to prevent fatigue, meduce their exposure to smoke, ensuring that fresh personnel are tree to be notinue work efficiently.  - Establish as unergency to ponse can that studies evacuation routes, first aid measures, and contact information to local fire strices in the end that the fire escapes control.	RESIDUAL RISK
3. Ignition Planning	Chemical handling any inition devices, Incorrect fuel seld won	ЗH	<ul> <li>Ensure operson of handling ignition devices have completed appropriate training and are familiar with safety ros clures.</li> <li>Conduct a perignition priefing to discuss chemical handling protocols and potential hazards.</li> <li>Los perignal projective equipment, such as gloves and goggles, when handling chemicals.</li> <li>Clean, seel and store chemicals in accordance with safety data sheets and regulations.</li> <li>Illow manufacturer's instructions for the use and disposal of ignition devices.</li> <li>Implement spill containment measures to manage accidental spills or leaks of chemicals.</li> <li>Keep an emergency eyewash station and spill kit near the operation area.</li> <li>Use only approved fuels that comply with regulation and manufacturer recommendations.</li> <li>Verify labels and check material safety data sheets prior to selecting fuel.</li> <li>Designate a specific area for fuelling operations away from ignition sources.</li> <li>Regularly inspect all ignition devices for damage or defects prior to use.</li> <li>Establish clear communication channels among the team to promptly address any incidents.</li> <li>Monitor environmental conditions such as wind speed and direction to ensure safe ignition practices.</li> <li>Develop an emergency response plan specifically addressing chemical exposure incidents.</li> </ul>	2M
4. Actual Ignition	Extreme heat exposure, Fire outbreak, Fast moving fire	4A		3Н

#### **EMERGENCY RESPONSE - CALL 000 FOR EMERGENCIES**

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.

#### SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

#### SAFE WORK IN 'THE 'S' NTEMANT MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remain effect, and must be reviewed (and revised if necessary) if relevant control measures are revised. The view as should be carried out in consultation with workers (including contractors as unputractors of the SWMS and their health and safety registeratives who represented that work group at the workplace.

When the SWMS has been revised the PCBD mest ensure the all persons involved with the work are advised that a revision has been made and how they can accept the revised SWMS, including all persons who will need to change a work procedure or system as a rest of the review are advised of the changes in a way that will enable them to implement their duties the total with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- Spot Checks.
- Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

### SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS	
The company details have been entered, including the project name and address.			
All relevant personnel consulted during the development of the SWMS.			
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	7		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.	$\boxtimes$		
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SV. 5.			
SWMS initial risk (IR) column as well as residual risk (RR) column completed.			
Check control measures added to the SWMS are the most effective sections.			
Responsible person is assigned and listed on the high centary of control measures.			
Permit or licenses requirements specified, so in as Hot Work, Electrical Work, Work at Heights etc.			
SWMS identifies plant and equipment to be			
Details of inspection checks required for any equipment lister are noted on the SWMS.			
Describes any mandatory qualifications, experience, ang or skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.	$\boxtimes$
