THIS SAFE WORK METHOD	STATEMENT IS APPRO	THE PC. OF THE ROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conductive proposed work starts.	icting a business or under thing (Port U) is	required to en that a safe work method s	statement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring η_{i}	compliance of the SWI, was well as re	eviews and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS HAVE THE FOLLOWING COMMUNICATED	NATE OF ALL RELEVANT PERSONN EVELOPMENT AND APPROVAL OF	NEL WHO HAVE BEEN CONSULTED AND THIS SWMS	COMMUNICATED TO IN THE
Safety meetings or toolbox talks will be scheduled in according with regislative requirements to first identify any site hazards, and the to control to those hazards and then to further take steps to either eliminate or control leach hazard.			
If an incident or a near miss occurs, all work must stude under the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			 Ensure all workers are provided with and a perly fitted in appropriate personal protective equipment, including P2 respirators, disposable cover is, gloves and safety goggles. Conduct a comprehensive risk assessment. If and perception risks related to asbestos handling and 	
			ensure all preventative measures are docume. d in the Saf Work Method Statement (SWMS).	
			- Verify that all personnel enjoyed in asbestos is hydrove received accredited training in asbestos awareness and safe anoval to iniques from a region ed training organisation.	
			- Establish exclusion zone aroun, the asbest removal area with clearly visible signage to prevent inadvertent clearly visible signage to prevent c	
			- Ensure proper lecontrolination facilities are available and clearly marked for use after asbestos hand to asks a completed.	
	Inadequate PPE, lack of training		- Instruct we kers on the correct procedure for setting up and using negative pressure enclosures to contain asbeings fibre and minimise environmental contamination.	
1. Preparation		ЗН	Provide colbustalks prior to starting work to reinforce the importance of following the SWMS and as single established safety procedures.	2M
			Continue at an asbestos register is readily available on-site, detailing the location and condition of bestos-containing materials.	
			- Muntain effective air monitoring practices throughout the duration of the asbestos removal to detect and address any potential fibre release promptly.	
			- Outline emergency procedures in the event of an accidental release of asbestos fibres or other hazardous situations.	
			- Use wet methods, or approved vacuuming equipment with HEPA filters, to suppress dust during asbestos handling tasks.	
			 Regularly inspect PPE for integrity before each use and replace any damaged or worn items immediately to ensure ongoing protection. 	
			- Collaborate with licensed asbestos removal contractors when additional expertise is required to safely remove or encapsulate asbestos materials.	
			- Conduct a thorough site inspection to identify potential asbestos-containing materials before work begins.	
2. Site Assessment	Unidentified asbestos, unsuitable workspace	4A	- Use certified asbestos assessors to confirm the presence of asbestos and its type, condition, and location.	3H
			- Implement exclusion zones around identified asbestos areas using clear signage and physical barriers.	
			- Train all personnel in asbestos awareness and safe handling practices before entering the site.	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			- Equip workers with personal protective equipment (PPE) such as disposable coveralls, P2 respirators, gloves, and eye protection.	
			- Ensure that all tools and equipment used in the an urare suitable for use in asbestos environments and are regularly cleaned or disposed of as require.	
			- Develop a detailed asbestos management fan outlining fetection methods, access restrictions, removal procedures, and emergency contacts.	
			- Use air monitoring systems during the site as. Soment to detect airborne asbestos fibres and evaluate the effectiveness of control casures.	
			- Implement a decontamination ocedure for work through asbestos-affected areas to prevent cross- contamination.	
			- Limit the number of work is permited inside the asbestos zone to the minimum necessary to reduce exposure risk	
			- Not marby process and occupants about asbestos assessment activities and any potential disture to is.	
			- Arran e for minde, indent clearance inspection upon completion of the works to ensure no residual asbestor rem. Its.	
	G		- Ensure ar and prominent signage is posted around the perimeter of the exclusion zone to inform and ram perimeter and the public about the presence of asbestos.	
			- tall physical barriers such as barricade tape, temporary fencing, or solid barriers to delineate the exclusion zone and restrict access.	
			- Utilise security personnel to monitor the exclusion zone entry points and patrol boundaries to prevent unauthorised access.	
			- Implement an access control system where only authorised personnel with appropriate training and personal protective equipment (PPE) can enter the exclusion zone.	
3. Establishing Exclusion Zone	Unauthorized access, in.	3H	- Conduct safety briefings with all team members to emphasise the importance of maintaining the integrity of the exclusion zone and compliance with established controls.	2M
	signage		- Establish clearly defined entry and exit procedures for the exclusion zone, including decontamination processes to prevent accidental spread of asbestos fibres.	
			- Equip designated entry points with decontamination facilities and signage to ensure that all individuals exiting the exclusion zone follow correct decontamination procedures.	
			- Communicate the location and boundaries of the exclusion zone during toolbox talks and site meetings to keep all workers informed.	
			- Schedule regular inspections of the exclusion zone to check and maintain the condition and visibility of barriers and signage.	
			- Assign a responsible person or team to manage the maintenance of exclusion zone barriers and signage throughout the duration of the project.	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			- Integrate exclusion zone maps into site induction materials, so all new site personnel are made aware of any restricted areas upon arrival.	
			- Use lockable gates or doors at entry points into the exclusion zone if the area involves permanent structures or buildings.	
			- Consider using supplementary warnings, uch as flash vights or audible alarms, in high-traffic areas to reinforce the significance of the exclusion 2 e.	
			- Develop an emergency response plan spect to breaches of the exclusion zone, including steps to mitigate exposure risks and the cessary reporting the ocedure

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.		
All relevant personnel consulted during the development of the SWMS.		
Name, signature, position and date signed of the person approving the SWMS.		
Specific personnel and qualifications, experience is noted in the SWMS.		
Provides a step-by-step process of tasks required to carry out the activity or task.		
Adequate risk assessment of any identified hazards has been completed.	\boxtimes	
Foreseeable hazards are identified and documented for each step.		
Any hazards listed in any site risk assessments have been added to the SN S.	\boxtimes	
SWMS initial risk (IR) column as well as residual risk (RR) column completed.	\square	
Check control measures added to the SWMS are the most effective sour tions.	\boxtimes	
Responsible person is assigned and listed on the spin central procentation of control measures.	\square	
Permit or licenses requirements specified, so in as Hot Work, Electrical Work, Work at Heights etc.	\boxtimes	
SWMS identifies plant and equipment to be	\square	
Details of inspection checks required for any equipment lister are noted on the SWMS.	\square	
Describes any mandatory qualifications, experience, ang or skills required to perform the work.	\boxtimes	
Applicable personal protective equipment is selected on the SWMS.	\square	
Reflects and documents any legislative references and/or Australian Standards.	\square	
Identifies any hazardous substances used with specific control measures in line with any SDS.
