

Repairing Sewer System	ms SAFE WORK METHO	D STATEMENT (SWMS)	
TASK	OR ACTIVITY: Repairing Sewer S	Systems	
Business Name:		ABN:	SWMS#
Business Address:			
Contact Person:	Phone:	E ail:	
THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE PC. 'OF TP' ROJECT	
THIS SAFE WORK METHOD			
Under the Work Health and Safety Regulation (WHS Regulation), a person conductive proposed work starts.	acting a business or und ing (Pt U) is	s required to element that a safe work method	statement (SWMS) is prepared before
Full Name:			
Signature:	NY	Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring	compliant e of the SWIL as well as re	eviews and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS VMS HAVE THE FOLLOWING COMMUNICATED	NA. 2 OF ALL RELEVANT PERSONI EVELOPMENT AND APPROVAL OF	NEL WHO HAVE BEEN CONSULTED AND F THIS SWMS	COMMUNICATED TO IN THE
Safety meetings or toolbox talks will be scheded in accordance with regislative requirements to first identify any site hazards, to continue the those hazards and then to further take steps to either eliminate or continue to the result of t			
If an incident or a near miss occurs, all work must standardly. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			- Conduct a site inspection to identify poter artripping hazards and clear pathways of any obstacles or unnecessary equipment.	
			- Use appropriate signage to warn workers and light soft uneven surfaces and areas where equipment is being used.	
			- Ensure all equipment and to are stored neatly and comely when not in use, preventing them from becoming tripping because.	
			- Provide adea to e lighting the tookspace, possularly in low-light conditions, to enhance visibility and reduce trip to s.	
1. Preparation	Tripping over equipment, exposure to sewer gases	2M	- Brief prkers the cuffic layout one worksite and highlight any identified trip hazards during a safet seting be work commences.	1L
			- Suppopulation on a projective equipment such as gloves and masks specifically designed to protect against sewer to see	
			Equip to rkers ith portable gas detectors to monitor and detect hazardous sewer gases continuously.	
			- Es lis proper ventilation systems, like fans or extraction units, to disperse dangerous gases from the vorking, a.	
			- ain employees on emergency protocols for gas detection and how to respond safely to exposure incrents.	
			- Limit worker exposure to high-risk areas and implement a rotating schedule to ensure no one is exposed for prolonged periods.	
			- Establish and maintain clear signage to warn road users of work taking place, reducing the risk of traffic accidents.	
			- Use high-visibility barriers to clearly delineate work areas from traffic flow and pedestrian pathways.	
			- Implement traffic control measures such as temporary traffic lights or stop/slow paddles operated by trained personnel.	
2. Site inspection	Traffic accidents, bio-hazardous materials	3H	- Ensure that all site personnel wear appropriate high-visibility clothing to enhance visibility near roadways.	2M
			- Schedule inspections during off-peak hours when there is less traffic if feasible.	
			- Employ spotters to assist machine operators and workers in navigating potential hazards on-site safely.	
			- Develop a Safe Work Method Statement (SWMS) specific to the task and ensure all workers are familiar with it.	
			- Provide appropriate personal protective equipment (PPE) for handling bio-hazardous materials, including gloves, masks, and protective eyewear.	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			- Train workers on recognising and handling bio-hazardous materials safely, ensuring they understand the associated risks and correct procedures.	
			- Isolate and secure any access points to the seven system during inspection, preventing unauthorized entry and exposure to hazardous environments.	
			- Conduct air quality monitoring before air a furing inspection activities to detect harmful gases within confined spaces.	
			- Ventilate confined spaces adequately using chanical ventilation systems to reduce harmful gas concentrations.	
			- Arrange for emergency response procedures to a sublished, ensuring workers are aware of evacuation routers and a sions.	
			- Regularly regw and upone site-specific rises sessments and SWMS to manage dynamic changes in the working environment appearance of the control of the sessments and SWMS to manage dynamic changes in the working environment.	
			- Con to pre-e v risk assessment to identify potential hazards specific to the confined space.	
	Confined space of try risks, gas or chemical exposur	4A	- Ensul, all, rkers and proper use of equipment.	
			- plement an exective gas monitoring program using calibrated gas detectors before and during sewer acce.	
			stablish and enforce a confined space entry permit system, requiring authorisation before entry.	
			appropriate personal protective equipment (PPE) such as respiratory protection, chemical-resistant gloves, and full-body coveralls.	
3. Sewer assessment			- Ventilate the confined space adequately by using portable fans or blowers to disperse any hazardous gases.	3H
			- Assign a competent standby person outside the confined space who maintains constant communication with those inside.	
			- Create an emergency response plan that includes rescue procedures and ensure all personnel are familiar with it.	
			- Secure entry and exit points to prevent unauthorised access to the confined area while working is underway.	
			- Provide equipment for safe entry and exit, such as ladders or hoisting systems, ensuring they are properly maintained.	
			- Limit exposure time for personnel working in confined spaces and schedule regular breaks to minimise fatigue.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

SAFE WORK IN 'THIS 'S' ITEM ON MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remain effect, and must be reviewed (and revised if necessary) if relevant control measures are revised. The view as should be carried out in consultation with workers (including contractors as unputractors of the SWMS and their health and safety registeratives who represented that work group at the workplace.

When the SWMS has been revised the PCBD mest ensure the advised that a revision has been made and how they can accept the revised SWMS, including all persons who will need to change a work procedure or system as a remotified the review are advised of the changes in a way that will enable them to implement their duties the thing with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- Spot Checks.
- Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.		
All relevant personnel consulted during the development of the SWMS.		
Name, signature, position and date signed of the person approving the SWMS.		
Specific personnel and qualifications, experience is noted in the SWMS.	7	
Provides a step-by-step process of tasks required to carry out the activity or task.	<u>k</u>	
Adequate risk assessment of any identified hazards has been completed.	\boxtimes	
Foreseeable hazards are identified and documented for each step.	\boxtimes	
Any hazards listed in any site risk assessments have been added to the SV 5.		
SWMS initial risk (IR) column as well as residual risk (RR) column ampleted.		
Check control measures added to the SWMS are the most effective sections.		
Responsible person is assigned and listed on the splenentant of control measures.		
Permit or licenses requirements specified, so n as Hot Work, Electrical Work, Work at Heights etc.		
SWMS identifies plant and equipment to be		
Details of inspection checks required for any equipment lister are noted on the SWMS.	\boxtimes	
Describes any mandatory qualifications, experience, ang or skills required to perform the work.		
Applicable personal protective equipment is selected on the SWMS.		
Reflects and documents any legislative references and/or Australian Standards.	\boxtimes	
Identifies any hazardous substances used with specific control measures in line with any SDS.	\boxtimes
