Details of the person(s) responsible for ensuring implementation, monitoring	compliance of the SWN, as well as re	eviews and modifications of the SWMS.					
Full Name:		Title:	Phone:				
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS HAVE THE FOLLOWING COMMUNICATED	NALE OF ALL RELEVANT PERSONN EVELOPMENT AND APPROVAL OF	IEL WHO HAVE BEEN CONSULTED AND (THIS SWMS	COMMUNICATED TO IN THE				
Safety meetings or toolbox talks will be scheduled in according ewith regislative requirements to first identify any site hazards, and the to further take steps to either eliminate or contail each hazard.							
If an incident or a near miss occurs, all work must stude under the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.							
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.							
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

1. Preparation	Inadequate training, Incorrect PPE	ЗН	 Ensure all workers are adequately trained an andling steel replacement tasks and understand the risks involved. Conduct a pre-start meeting to discuss the subserve work, potential hazards, and control measures with the team. Verify that all personnel have completed necessory sately induction courses specific to the site and activities. Provide completencies in the pre-start of the preparation phase and ensure compliance with safety protocompleted tasks. Conduct mpeter vassessments to confirm that workers possess the required knowledge and skills for their ssigned tas. Ensure valiantly and familiarity with the Safety Data Sheets (SDS) related to materials being used. Imports t a system for regular inspection and maintenance of Personal Protective Equipment (PPE) to revenue of damaged or ineffective gear. Itabilish clear signage indicating mandatory PPE zones and requirements for entry into work areas. Supply appropriate PPE such as gloves, safety glasses, hard hats, and steel-capped boots, ensuring they meet Australian standards. Conduct refresher training on the correct selection, use, and fit of PPE relevant to replacing steel operations. Schedule regular emergency drills to prepare workers for potential incidents, emphasizing the importance of PPE during evacuations. 	2M
2. Site Inspection	Uneven ground, Unmarked hazards	4A	 Conduct a pre-inspection meeting to inform all workers of potential site hazards. Use high-visibility markers or flags to indicate unmarked hazards on-site. Implement a check-in system for monitoring worker movements in uneven areas. Utilise barriers or fencing around identified hazard zones to prevent accidental entry. Employ the use of personal protective equipment (PPE) such as steel-toed boots and helmets. Ensure adequate lighting is available for visibility in low light conditions. Develop and communicate safe pathways for movement through the site. Provide training on hazard recognition and response specific to the site conditions. 	2M

SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS - Use portable walkway mats or stabilised platforms over heavily uneven surfaces Regularly monitor weather conditions, as wet or windy weather can exacerbate ground instability Maintain open communication channels to remark new or changing site hazards immediately Schedule regular inspections throughout are day to recesses ground conditions and hazards Limit access to site inspection tasks only to persense of with proper training and authorisation.	RESIDUAL RISK
3. Erect Barricades	Trip hazards, Insufficient visibility	ЗН	 Ensure barricades are high visibility with reflect tape transance visibility, especially in low-light conditions. Use clear signature inspection to ident about areas and alternative routes around the worksite. Conduct area inspection to ident about arriving hazards before erecting barricades. Ensure all workers interest in erectine parricades wear appropriate personal protective equipment, inclute univision. Designate spotter orguide the erection of barricades and ensure they are placed correctly and safely. Maintage area and atter-free area around the barricades to prevent trips and falls. Indemnet traking sessions for staff on safe barricading practices and hazard awareness. Regroupment barricades during the work process to ensure they remain secure and visible. Doordinate with other work teams to ensure awareness of the placement and purpose of the barricades. Use proper lighting measures when working in areas with insufficient natural light to keep the workspace well-lit. Clearly communicate the boundaries set by the barricades through daily briefings and site maps for all site personnel. 	1L

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

SAFE WORK THE S ATEM ANT MONITORING AND REVIEW The SWMS must be reviewed regularly to make sure it remain effect. and mu be reviewed (and The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are revised if necessary) if relevant control measures are revised. The s should be carried out in effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The view consultation with workers (including contractors person responsible for monitoring the effectiveness of the Safe Work Method Statement should ntractors nay be cted by the operation of the SWMS and their health and safety representatives who rep sented that work group at the employ a multi-faceted approach which includes but is not limited to: workplace. 1. Spot Checks. When the SWMS has been revised the PCBU must ensure the all versons involved with the work are 2. Consultation with workers, contractors and sub-contractors. advised that a revision has been made and how they can acce the revised SWMS, including all persons 3. Internal audits on a continual basis who will need to change a work procedure or system as a reof the review are advised of the changes in a way that will enable them to implement their duties ntly with the revised SWMS. All workers that An approach of continuous improvement, promptly recording inconsistencies or deficiencies, will be involved in the work must be provided with the relevant information and instruction that will assist followed up by immediate corrective action and consultation with all relevant personnel ensures them to understand and implement the revised SWMS. that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.		
All relevant personnel consulted during the development of the SWMS.		
Name, signature, position and date signed of the person approving the SWMS.		
Specific personnel and qualifications, experience is noted in the SWMS.		
Provides a step-by-step process of tasks required to carry out the activity or task.		
Adequate risk assessment of any identified hazards has been completed.	\boxtimes	
Foreseeable hazards are identified and documented for each step.		
Any hazards listed in any site risk assessments have been added to the SN S.	\boxtimes	
SWMS initial risk (IR) column as well as residual risk (RR) column completed.	\square	
Check control measures added to the SWMS are the most effective sour tions.	\boxtimes	
Responsible person is assigned and listed on the spin central procentation of control measures.	\square	
Permit or licenses requirements specified, so in as Hot Work, Electrical Work, Work at Heights etc.	\boxtimes	
SWMS identifies plant and equipment to be	\square	
Details of inspection checks required for any equipment lister are noted on the SWMS.	\square	
Describes any mandatory qualifications, experience, ang or skills required to perform the work.	\boxtimes	
Applicable personal protective equipment is selected on the SWMS.	\square	
Reflects and documents any legislative references and/or Australian Standards.	\square	
Identifies any hazardous substances used with specific control measures in line with any SDS.
