THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY 1	THE PLOOF THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	eting a business or undertaking (N=3U) is	required to ure at a safe work method s	tatement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring a	ompliance of the SWMS well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A CO. MUNICATED TO IN THE DEVELO	LL RELEVANT PERSONNEL WHO HAVE BI PMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched ed in accordance with egislative requirements to first identify any site hazards, conditions those hazards and then to further take steps to either the conditions of the conditions are or conditional talks.	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must standardly. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Slips, trips and falls, Electrical hazards	2M	 Proper housekeeping: Keep the work area clean and clutter-free to prevent slips, trips, and falls. Regularly remove waste material or divris from the floor. Anti-slip footwear: Ensure workers wear approvate anti-slip shoes for better grip on potentially slippery surfaces. Proper lighting: Maintain adequate and wen estribute righting in the working area to ensure employees can clearly see any potential azards. Electrical safety checks: Remarkly inspect all electrical equitation that such as power cords, plugs, and outlets to eliminate electrical hazers. Clear walkways: and well of instance and electrical hazers. Clear walkways: and well of instance and electrical hazers. Guardrails a barriers: a tall guardor for poarriers around high-risk areas or elevate chang to proper and falls. Cabi managemy of Keep cables organised and secured using cable trays, ties, or covers or an individual proper use of tools and equipment. Supervise works it ansure they follow safety guidelines. Trainin and propervis is: Provide regular training on workplace health and safety, bluding, azare recognition and proper use of tools and equipment. Supervise works it ansure they follow safety guidelines. Spill could: Implement spill containment measures and procedures to quickly diress and clean up any spills that could pose a slip hazard. Signage and markings: Clearly display appropriate warning signs and floor markings to highlight potential hazards in the work area. Use of personal protective equipment (PPE): Ensure workers are equipped with necessary PPE like gloves, safety glasses, and proper footwear. Regular risk assessments: Conduct periodic hazard assessments and take corrective measures accordingly to reduce risks of slips, trips, and falls, as well as electrical hazards. Emergency preparedness: Develop and implement an emergency response plan for addressing accidents or incidents, including evacuation drill	1L	
2. Material Selection	Manual handling injuries, Exposure to hazardous substances	3Н	- Proper manual handling training: Ensure that all workers involved in this work step receive adequate training on correct lifting, pushing, pulling, and carrying techniques to reduce the risk of injuries associated with manual handling Ergonomic workplace layout: Design the working area so that it minimises reaching, twisting, and bending movements. This could include adjusting the height of work surfaces or providing equipment to facilitate material handling.	2M

3. Machine Setup	Machinery entanglement, Crush injuries	ЗН	- Conduct a comprehensive risk assessment and inspection of the rubber extruder before starting machine setup to identify potential hazards and address them immediately. - Ensure that all operators involved in the setup process are fully trained in the safe operation of the rubber extruder, using relevant standard operating procedures (SOPs) and manufacturer guidelines. - Establish proper lockout/tagout procedures when installing, adjusting, or maintaining machinery components to prevent unintentional startups and eliminate risks related to machinery entanglement and crush injuries. - Provide and enforce the use of appropriate personal protective equipment (PPE), such as safety gloves, steel-toe boots, and eye protection for all personnel involved in the setup process. - Keep work areas around the rubber extruder clean and clear of clutter, debris, and excess materials to avoid slip, trip, and fall hazards, ensuring adequate lighting and ventilation throughout the workspace.	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			 Install appropriate safety guards and devices on the rubber extruder machinery to prevent user contact with moving parts and hot surfaces during preparation and adjustment procedures. 		
			- Implement an efficient communication system, using operators during machine setup, ensuring all adjustments, connection, and alignments are made correctly and checked by at least two qualified workers.		
			- Regularly inspect, maintain, and replace work the prevent malfunctions, ensuring a proactive approach to hazard evention.		
			- Incorporate an emergency standard mechanism that on becaused easily and quickly by operators long for amediate machine anutdown if incidents occur or imminent days as are notified.		
			- Allocate sectasks according to each work is physical capabilities and experience level minimizing the risk of man error and unnecessary accidents.		
			- School appropriate rest breaks during the setup process to prevent fatigue-related and stensive g staff members stay alert and attentive to the task.		
			- Promo a a ture of the reporting of potential hazards and encourage workers to alse contents a suggestions regarding workplace safety.		
			- comist regular efresher training for all rubber extruder operators, ensuring that safety and and new control measures are effectively understood and mmunicated throughout the team.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

	SAF WO A STHED STATEMENT MONITORING AND REVIEW							
The SWMS must be reviewed regularly to refer to the sure it remains effective and must be reviewed (and revised if necessary) if relevant control measure are a council at review process should be carried out in consultation with workers (including contractors and subcontract is) who may be affected by the operation of the SWMS and their health and safety representatives who reduces that work group at the workplace. When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.				The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to: 1. Spot Checks. 2. Consultation with workers, contractors and sub-contractors. 3. Internal audits on a continual basis. An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	P		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWh			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting so tions.			
Responsible person is assigned and listed on the SWMS for the imperent of continue assures.			
Permit requirements specified, such as Hot Work, Veralt Heights etc.			
SWMS identifies plant and equipment to be u d.			
Details of inspection checks required for any equipment listed are noted on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
dentifies any hazardous substances used with specific control measures in line with any SDS.
