

Rubbish and Waste Dis	posal SAFE WORK METH	OD STATEMENT (SWMS)						
TASK O	R ACTIVITY: Rubbish and Waste	Disposal						
Business Name: [Company Name]		ABN: [ABN]	SWMS#					
Business Address: [Company Address]								
Contact Person:	Phone: [Phone]	E ill:						
THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE P. OF THE PROJECT								
Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (r 3U) is required to the proposed work starts.								
Full Name:								
Signature:		Title:	Date:					
Details of the person(s) responsible for ensuring implementation, monitoring	compliance of the SWMS well as review	s and modifications of the SWMS.						
Full Name:		Title:	Phone:					
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS VMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A CO. MUNICATED TO IN THE DEVELO	ILL RELEVANT PERSONNEL WHO HAVE B OPMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND					
Safety meetings or toolbox talks will be sched ed in accordance with egislative requirements to first identify any site hazards, conditions those hazards and then to further take steps to either take or conditions and the education of the conditions are conditionally as a condition of the condition of the conditions are conditionally as a condition of the condi	NAME	SIGNATURE	DATE					
If an incident or a near miss occurs, all work must strength and the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.								
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.								
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

Select me appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Improper PPE, Inadequate training	2M	 Conduct proper risk assessment: Before beginning the waste disposal process, perform a comprehensive risk assessment to identify potential hazards and develop adequate control measures. Provide training on waste handling: Ensure at all staff involved in the rubbish and waste disposal receive thorough training on a ste map a unent procedures and the safe usage of equipment and machinery. Personal Protective Equipment (PPE): Mandate and provide a ropriate PPE, such as gloves, safety glasses or gorgles, masks, and a reralls a employees involved in waste disposal tasks. Label waste commers contry: Contry label waste containers based on their contents to provent accident exported to have about materials. Implement due saal techniques: Train conoyees on proper waste segregation techniques to ensure and effective disposal. Safet or munica in: Establish clear lines of communication between employees engage in a ste dismal tasks to ensure any issues are promptly reported and address d. Conduct regular inspections of work sites and waste storage area, not ject and rectify unsafe conditions. Emergency response plan: Develop and communicate an emergency response porto all employees so they know how to respond in case of accidents or spillages. Waste handling tools and equipment: Provide suitable waste handling tools and equipment, ensuring they are well maintained, clean, and readily available for use. Housekeeping: Maintain a clean and organised work environment to reduce the risk of injuries caused by slips, trips, and falls due to improper waste disposal. Review and update control measures: Regularly review and update the control measures employed for rubbish and waste disposal to ensure continuous improvement and adapt to changes in regulations or workplace practices. 	1L	
2. Waste Identification	Hazardous materials exposure, Biological hazards	ЗН	 Provide adequate training for workers responsible for waste identification, with a focus on recognizing and handling hazardous materials and understanding the risks associated with biological hazards. Establish clear protocols for the proper storage of different types of waste, to minimise the risk of cross-contamination and potential harm to workers. This may include secure containers and designated areas for storing hazardous materials, such as chemical waste or biohazardous waste. Regularly inspect waste storage areas for signs of leaks or spills and address issues promptly in order to prevent exposure to hazardous materials or potential contamination. 	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Ensure personal protective equipment (PPE) is worn by all workers involved in waste identification tasks, including gloves, eye protection, and masks if necessary, depending on the nature of the waste being handled - Implement strict hand-washing protocols for convoyees handling waste, ensuring that they wash their hands thoroughly with the pand water after removing PPE and before touching any surfaces or objects.		
			- Develop emergency response plans to deal war indents, spills, or other incidents involving hazardous materials or biological hazar. This should include procedures for evacuating the affected all notifying relevant thoriting and providing appropriate first aid or medicals re. - Install safety single in laste stange areas and around work zones, indicating the		
			presence of a cardous man also an electing of kers to potential risks. - Encourage of a common cation amon orkers regarding potential hazards and concern and proportion of culture where reporting hazards is encouraged and supports		
		1	- Provide we are with a ccess to Material Safety Data Sheets (MSDS) for all potential had doubted stances they may encounter during waste identification sks, an ensure they are trained on how to interpret and use this information. - Co. you agular fisk assessments and update SWMS as needed to account for		
			hanges vorkplace practices, new hazards, or other contributing factors. - spose of hazardous materials and biological waste in a safe and responsible mater, in accordance with all local, state, and federal regulations governing waste disposal.		
			- Implement a system for tracking the location and status of hazardous materials, ensuring their proper disposal and minimising the risk of accidental exposure to workers or contamination of other waste streams.		
			- Ensure that all workers involved in waste identification and disposal processes are up-to-date with relevant immunizations and have access to medical surveillance programs as necessary, to maintain safety and health.		
			- Regularly review and update workplace policies, procedures, and training programs related to waste identification and handling, to ensure ongoing compliance with best practices and recognition of new hazards.		
3. Segregation	Cross-contamination, Inadequate containers	3H	- Thoroughly train employees on proper waste segregation procedures, including the use of appropriate colour-coded containers and clear labelling to differentiate between different types of waste.	2M	
	Containor		- Regularly inspect and maintain waste disposal containers to ensure they are in good working order, have secure lids, and do not have any cracks or leaks that may lead to cross-contamination.		

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Implement a strict schedule for the regular cleaning and sanitization of all waste disposal containers, especially those holding hazardous waste, to minimise the risk of contamination.		
			- Place designated waste disposal areas strategingly throughout the facility, ensuring they are easily accessible yet september from other critical work zones to reduce potential contact with contaminants.		
			- Utilise personal protective equipment (PPE) s gloves, aprons, and face masks when handling waste materials, particular when sorting and segregating, to protect workers from direct council with hazardous obstant.		
			- Establish a monitoring stem shecklist to ensure unerence to waste segregation protests, with putine secks performed by supervisors or designated personnel.		
			- Ensure that a vaste discosal contain sure appropriately labelled with clear signal dication the pe of waste that can be disposed of within each container.		
			- Display contain lated equipment, tools, or PPE in proper waste bins if they cannot be a portain led, minimising the risk of spreading contamination to other areas.		
	•		spling the embedding procedures and communication plans in case of accidental spling the ks involving potentially hazardous waste materials, ensuring swift espons mitigate potential cross-contamination risks.		
			- induct regular audits and reviews of waste management processes, ensuring the, remain up-to-date and compliant with relevant industry standards, regulations, and guidelines. Address identified issues promptly and implement improvements where necessary.		
			- Encourage a culture of continuous improvement around waste management practices by inviting employee feedback and suggestions on ways to enhance existing practices and develop new, more effective solutions.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

		SAF WC A	STATEMENT	MONITORING AND R	EVIEW			
The SWMS must be reviewed regularly to use ke sure it remains effective and must be reviewed (and revised if necessary) if relevant control measure are subcontracted by process should be carried out in consultation with workers (including contractors are subcontracted) who may be affected by the operation of the SWMS and their health and safety representatives who researched that work group at the workplace. When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.				The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to: 1. Spot Checks. 2. Consultation with workers, contractors and sub-contractors. 3. Internal audits on a continual basis. An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	P		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWh			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting so tions.			
Responsible person is assigned and listed on the SWMS for the imperent of continue assures.			
Permit requirements specified, such as Hot Work, Veralt Heights etc.			
SWMS identifies plant and equipment to be u d.			
Details of inspection checks required for any equipment listed are noted on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
dentifies any hazardous substances used with specific control measures in line with any SDS.
