THIS SAFE WORK METHOD	STATEMENT IS APPROVIDED BY	THE PC. OF THE ROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conductive proposed work starts.	acting a business or und	s required to electhat a safe work method	statement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring	compliant e of the SWIL as well as r	reviews and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS VMS HAVE THE FOLLOWING COMMUNICATED	NA. 2 OF ALL RELEVANT PERSON EVELOPMENT AND APPROVAL O	NEL WHO HAVE BEEN CONSULTED AND F THIS SWMS	COMMUNICATED TO IN THE
Safety meetings or toolbox talks will be sched ed in accomple with egislative requirements to first identify any site hazards, to continue to those hazards and then to further take steps to either eliminate or continue to the real leach hazard.			
If an incident or a near miss occurs, all work must standately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Inadequate planning, Lack of safety gear	ЗН	- Conduct a thorough risk assessment to its artify potential hazards associated with the task. - Develop a comprehensive work plan that on ines the aquired equipment, personnel, and procedures. - Ensure that all workers have access to and the trained in the proper use of personal protective equipment (PPE) such as he advisibility vests, he it hats, globely, and steel-capped boots. - Verify that all safety dear is compliant with relevation at alian standards and inspect it regularly for defects or damage. - Provide a property briefing to all prosonnel insured, highlighting safety requirements and emergency procedures. - Estimate the approximation channels among team members and ensure the use of radios or other common thation decrease in necessary for coordination. - Implement anagement barriers to clearly demarcate the work area, thereby preventing unauthorised access. - Le visual aids are maps or diagrams during planning to anticipate placement needs and minimise interval a with traffic or pedestrian movement. Review and consider environmental conditions such as weather, visibility, and lighting that may impact sorty. - Assign roles and responsibilities to each team member to ensure adequate monitoring and supervision of safety practices. - Coordinate with relevant authorities or contractors to understand specific site regulations and integrate them into the planning process. - Maintain an emergency response plan tailored to the location and scale of the worksite, ensuring that all workers are informed and prepared in case of an incident.	2M
2. Equipment Inspection	Faulty equipment, Missing tools	4A	 Conduct a pre-use inspection checklist for all equipment to ensure they are in good working order. Tag and remove any faulty equipment from service immediately to prevent use. Maintain a logbook of equipment maintenance and inspections for traceability. Ensure all personnel are trained to identify faulty equipment and understand reporting procedures. Provide a designated storage area for tools, keeping them organised and reducing the risk of loss. Implement a tool check-out and check-in process to track usage and return of equipment. Establish a spare parts inventory to quickly replace any missing or damaged tools. Regularly audit the tool inventory to identify any discrepancies or missing items promptly. Use brightly coloured tags or stickers to highlight important equipment that needs regular checks. 	2M

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS - Ensure all equipment has clear labels or identifiers detailing their last inspection date. - Institute a routine schedule for professional equipment servicing and recalibration where necessary. - Keep a dedicated list of emergency contacts equipment repairs and maintenance services. - Train staff regularly on proper equipment and ling and storage procedures. - Post visual instructions near storage areas remit workers of correct equipment handling techniques.	RESIDUAL RISK
3. Site Assessment	Uneven terrain, Slipper and faces	34	 Conduct a thorough walk-unugh of the site to rentify a camark any uneven terrain areas before commencing work. Use high-visibility camara marks to outline hazardous zones where workers should exercise caution due to unever outfaces. Provide adds ate trainty for worke a recognising and navigating uneven terrains safely. Important the appropriate footwear with slip-resistant soles to minimise the risk of slipping on slipper is faces. Install amy not slip mats or coverings over particularly slippery areas to enhance traction for workers. Install amy any not slip mats or coverings over particularly slippery areas to enhance traction for workers. Is edd, work altry weather conditions whenever possible to reduce the likelihood of slippery surfaces due to a slipper surfaces. Ensure all workers are briefed on emergency procedures related to slips, trips, and falls, including reporting protocols for hazards. Inspect tools and equipment regularly to ensure they are in good working condition and suitable for use on uneven or slippery surfaces. Limit access to areas with harsh terrain or slippery surfaces without appropriate supervision and safety measures in place. Utilises stabilising equipment such as platforms or ladders designed to adjust to uneven surfaces to provide a level working area. Develop and communicate a clear plan for safe movement around the site, highlighting preferred pathways that minimise exposure to hazardous surfaces. Keep the work environment tidy by promptly removing debris and obstacles that could exacerbate navigation challenges on uneven or wet ground. Encourage a culture of safety awareness where workers are empowered to report potential fall hazards immediately. 	2M

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

SAFE WORK IN 'THIS 'S' ITEM ON MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remain effect, and must be reviewed (and revised if necessary) if relevant control measures are revised. The view should be carried out in consultation with workers (including contractors as an intractors of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBD mest ensure the all persons involved with the work are advised that a revision has been made and how they can accept the revised SWMS, including all persons who will need to change a work procedure or system as a rest of the review are advised of the changes in a way that will enable them to implement their duties the total with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- Spot Checks.
- Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.
