

Sheep Shearing Activities | SAFE WORK METHOD STATEMENT (SWMS)

TASK OR ACTIVITY: Sheep Shearing Activities

Business Name:	ABN:	SWMS#
Business Address:		
Contact Person:	Phone:	Email:

THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE PCBU OF THE PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a safe work method statement (SWMS) is prepared before the proposed work starts.

Full Name:		
Signature:	Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS as well as reviews and modifications of the SWMS.		
Full Name:	Title:	Phone:

ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS SWMS MUST HAVE THE FOLLOWING COMMUNICATED

Safety meetings or toolbox talks will be scheduled in accordance with legislative requirements to first identify any site hazards, then to communicate those hazards and then to further take steps to either eliminate or control each hazard.

If an incident or a near miss occurs, all work must stop immediately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.

Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.

The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

NAME OF ALL RELEVANT PERSONNEL WHO HAVE BEEN CONSULTED AND COMMUNICATED TO IN THE DEVELOPMENT AND APPROVAL OF THIS SWMS

Permit or Licenses Requirements

Mandatory Qualifications and Training

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Risk of injuries from using tools, Hazardous substances exposure	3H	<ul style="list-style-type: none"> - Ensure all tools and equipment are in good working condition before use. - Provide appropriate training to workers on the use of shearing tools. - Supply and enforce the use of personal protective equipment such as gloves, safety glasses, and steel-capped boots. - Implement a regular maintenance schedule for all shearing tools and equipment. - Have Material Safety Data Sheets (MSDS) available for all hazardous substances used during preparation. - Ensure adequate ventilation when using or mixing hazardous substances. - Use less hazardous alternatives where possible. - Store all hazardous substances according to manufacturer instructions and legal requirements. - Establish and enforce procedures for the proper handling and disposal of hazardous substances. - Conduct safety briefings and refresher courses focused on the risks and control measures associated with shearing activities. - Ensure first aid kits are readily accessible and adequately stocked. - Have an emergency response plan in place and ensure all workers are familiar with it. 	2M
2. Equipment Setup	Hand-arm vibration syndrome from equipment use, Slipping or tripping over equipment	2M	<ul style="list-style-type: none"> - Ensure all equipment is maintained regularly and in good working order to minimise excessive vibrations Provide anti-vibration gloves to shearers to reduce the risk of hand-arm vibration syndrome Limit the duration of exposure to vibrating tools by rotating tasks among workers Educate shearers on proper technique and handling of equipment to reduce strain and vibration exposure Install anti-fatigue mats in shearing areas to lessen impact on shearers' hands and arms Ensure all electrical cords are properly secured and out of walkways to prevent tripping hazards Arrange equipment in an orderly manner to allow for safe movement around the work area Use nonslip mats or flooring in the shearing area to prevent slips Check that all shearing platform surfaces are dry and free from any contaminants that could cause slips Ensure adequate lighting in the work area so all hazards can be easily seen Conduct regular safety inspections to identify and rectify any potential slipping or tripping hazards 	1L
3. Sheep Herding	Risks of animal-related injuries	4A	<ul style="list-style-type: none"> - Ensure all workers are trained in safe animal handling techniques. - Use well-maintained, sturdy yard and pen infrastructure to prevent escapes and secure animals. 	3H

- Implement a buddy system where workers help each other manage stress
- Use calm and quiet methods to move sheep to reduce stress
- Maintain clear communication among team members using agreed signals
- Regularly inspect and repair all gates, latches and fencing to ensure safety
- Assign experienced handlers for larger or more aggressive sheep
- Plan and rehearse emergency procedures for dealing with injured sheep
- Provide rest periods to avoid worker fatigue which can lead to mistakes
- Keep pathways clear of obstacles to ensure smooth movement of sheep

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

SAFE WORK METHOD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remains effective and must be reviewed (and revised if necessary) if relevant control measures are revised. The review must be carried out in consultation with workers (including contractors and sub-contractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

1. Spot Checks.
2. Consultation with workers, contractors and sub-contractors.
3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.	<input checked="" type="checkbox"/>	
All relevant personnel consulted during the development of the SWMS.	<input checked="" type="checkbox"/>	
Name, signature, position and date signed of the person approving the SWMS.	<input type="checkbox"/>	
Specific personnel and qualifications, experience is noted in the SWMS.	<input checked="" type="checkbox"/>	
Provides a step-by-step process of tasks required to carry out the activity or task.	<input checked="" type="checkbox"/>	
Adequate risk assessment of any identified hazards has been completed.	<input checked="" type="checkbox"/>	
Foreseeable hazards are identified and documented for each step.	<input checked="" type="checkbox"/>	
Any hazards listed in any site risk assessments have been added to the SWMS.	<input checked="" type="checkbox"/>	
SWMS initial risk (IR) column as well as residual risk (RR) column completed.	<input checked="" type="checkbox"/>	
Check control measures added to the SWMS are the most effective solutions.	<input checked="" type="checkbox"/>	
Responsible person is assigned and listed on the SWMS for the implementation of control measures.	<input checked="" type="checkbox"/>	
Permit or licenses requirements specified, such as Hot Work, Electrical Work, Work at Heights etc.	<input checked="" type="checkbox"/>	
SWMS identifies plant and equipment to be used.	<input checked="" type="checkbox"/>	
Details of inspection checks required for any equipment listed are noted on the SWMS.	<input checked="" type="checkbox"/>	
Describes any mandatory qualifications, experience, training or skills required to perform the work.	<input checked="" type="checkbox"/>	
Applicable personal protective equipment is selected on the SWMS.	<input checked="" type="checkbox"/>	
Reflects and documents any legislative references and/or Australian Standards.	<input checked="" type="checkbox"/>	
Identifies any hazardous substances used with specific control measures in line with any SDS.	<input checked="" type="checkbox"/>
