TASK OR AC	TIVITY: Shrub Layer Manageme	nt Operations	
Business Name:		ABN:	SWMS#
Business Address:			
Contact Person:	Phone:	E ail:	
THIS SAFE WORK METHOD	STATEMENT IS APPROV D BY	THE PC. OF THE ROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or und thing (Pc V) is	required to elect that a safe work method	statement (SWMS) is prepared before
Full Name:			
Signature:	NY	Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring	compliant e of the SWIL as well as re	eviews and modifications of the SWMS.	
Full Name:	111.	Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS VMS HAVE THE FOLLOWING COMMUNICATED	NA. 2 OF ALL RELEVANT PERSONN EVELOPMENT AND APPROVAL OF	EL WHO HAVE BEEN CONSULTED AND THIS SWMS	COMMUNICATED TO IN THE
Safety meetings or toolbox talks will be sched ed in accorde with regislative requirements to first identify any site hazards, to construct the those hazards and then to further take steps to either eliminate or conclude ach hazard.			
If an incident or a near miss occurs, all work must stead adately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Slips, trips and falls, Manual handling injuries	ЗН	 Ensure the work area is clear of debris are obstacles to minimise tripping hazards. Conduct a pre-start hazard assessment to tentify a potential risks in the work area. Wear appropriate non-slip footwear to reduce the risk of slips, trips, and falls. Use well-maintained tools and equipment that a suital moor the job to prevent manual handling injuries. Implement protoculting schniques by keeping the back straight and bending at the knees when handling materials. Provide train on manual handling scattes to all personnel involved in shrub layer management operates. Ensure acquate whiting in the work area to improve visibility and highlight potential hazards. Mark to ever surface and other trip hazards with high-visibility tape or signs. Schedue regular breaks to prevent fatigue and maintain focus on safe work practices. Assent assappropriately based on individual capabilities to prevent overexertion and strain. Geep frequently used tools and equipment within easy reach to reduce the need for bending and suching. Use mechanical aids or team lifting techniques when moving heavy or awkward items to avoid manual handling injuries. 	2M
2. Equipments Checking	Incorrect use of tools/equipment, Electrical hazards	ЗН	 Conduct pre-operational checks on all tools and equipment to ensure they are in safe working condition. Ensure that all electrical equipment is tested and tagged by a qualified electrician as per regulatory requirements. Provide adequate training for correct use and handling of tools and equipment specific to shrub layer management operations. Use only equipment that complies with Australian Standards and is suitable for the tasks being performed. Implement a lockout/tagout procedure when servicing or maintaining electrical equipment. Ensure that all power tools have appropriate safety guards and functioning safety devices. Maintain a clean and organised work area to prevent accidental damage to equipment and reduce tripping hazards. Wear appropriate personal protective equipment such as gloves, eye protection, and hearing protection when necessary. Regularly inspect electrical cords and plugs for any signs of wear or damage before use. 	2M

POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
		- Store tools and equipment safely and securely when not in use to prevent misuse and unauthorised access.	
		- Have accessible emergency procedures and er the workers know how to respond to equipment malfunctions or electrical hazards.	
		- Assign only trained and competent personal to operate pecific tools and equipment, reinforcing regular refreshers on operational protocols.	
		- Conduct a thorough site in section to identify tential bounds such as loose branches or unstable ground before commencing with.	
		- Establish exclusion around the work area using barriers or caution tape to prevent unauthorised access.	
		- Ensure all waters are waying apply the personal protective equipment, including hard hats, safety glass and be visibility vest.	
Falling objects, Exposure to harmful substances	3Fr	- Use the trist of the public about ongoing shrub management operators.	
		- Implement see many chandling practices to reduce the risk of injury when moving or managing upper t and caterials.	
		- Sch. 'up operations during favourable weather conditions to minimise risks from slippery surfaces or educed bility.	
		- in all workers on proper techniques for using tools and equipment to ensure they are competent and aware of potential hazards.	2M
		- Utilise tools with extension handles to minimise physical reach and reduce exposure to falling objects from higher levels.	
		- Designate a clear drop zone for any removed debris and ensure this area is free from people and hazards.	
		- Regularly inspect and maintain equipment to ensure it is in good working condition to prevent malfunctions that could lead to accidents.	
		- Limit exposure to harmful substances by using non-toxic chemicals when possible, and ensure proper ventilation in areas where chemicals are used.	
		- Provide first aid training and have kits readily accessible on-site to address any incidents involving hazardous substances or injuries.	
		- Develop an emergency response plan specific to shrub layer management, detailing procedures for dealing with incidents like falls, chemical exposure, or sudden weather changes.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

SAFE WORK IN 'THIS 'S' ITEM ON MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remain effect, and must be reviewed (and revised if necessary) if relevant control measures are revised. The view as should be carried out in consultation with workers (including contractors as unputractors of the SWMS and their health and safety registeratives who represented that work group at the workplace.

When the SWMS has been revised the PCBD mest ensure the advised that a revision has been made and how they can accept the revised SWMS, including all persons who will need to change a work procedure or system as a remotified the review are advised of the changes in a way that will enable them to implement their duties the thing with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- Spot Checks.
- Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.
