

Storage and Stacking of Ma	aterials SAFE WORK MET	HOD STATEMENT (SWMS)	
TASK OR A	ACTIVITY: Storage and Stacking	of Materials	
Business Name: [Company Name]		ABN: [ABN]	SWMS#
Business Address: [Company Address]			
Contact Person:	Phone: [Phone]	E fil:	
THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE POST THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or undertaking (N 3U) is	required to ture at a safe work method s	tatement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring a	ompliance of the SWMS well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS VMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A CO. MUNICATED TO IN THE DEVELO	LL RELEVANT PERSONNEL WHO HAVE BI PMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched ed in accordance with egislative requirements to first identify any site hazards, conditions those hazards and then to further take steps to either the conditions of the conditions are or conditional talks.	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must standardly. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Slips, trips and falls, Manual handling injuries	2M	 Regular inspection and maintenance of the work area to ensure it is clean, free from debris, and an even surface to prevent slips, triction and falls. Adequate lighting should be provided in storator areas and paths where materials are carried to minimise the risk of accident or be to low visibility. Clearly marking designated areas for stack at materials to ensure safe walkways and reduce clutter, thus preventing slips, trips, trips, trips. Implementing a training programme for employe con propositing techniques and manual handling procedures to telep prevent injuries come correct handling. Provision of approximate arsonic rotective equipment (PPE), such as gloves, safety shoes, a back supports to duce the trip of manual handling injuries. Trolleys, hair trucks, or a schanical of the trip of manual handling injuries. Trolleys, hair trucks, or a schanical of the trip of manual handling injuries. Proportable clear anage, such as "keep clear" or "stacking area," should be placed for at the way area to remind workers of potential hazards. Stacks of materials should be limited to a safe and manageable height to avoid aboling and require manual handling stress. Imports a system where heavier items are stored closer to the ground level, while light materials are higher up, to minimise manual handling risks. Courage workers to ask for assistance when lifting or moving heavy objects that may exceed their physical capabilities. Develop and enforce standardised procedures regarding the safe storage and stacking of materials to ensure consistency and adherence to best practices across the workplace. Encourage workers to report any hazards, such as spills or uneven surfaces, so that they can be addressed and resolved promptly to maintain safety in material handling and storage areas. 	1L	
2. Delivery of Materials	Forklift accidents, Falling objects	ЗН	 Provide comprehensive forklift operation training and ensure the operators possess the necessary certification. Establish well-defined routes and traffic control plans for forklifts, ensuring clear signage and avoiding pedestrian pathways. Ensure proper use of Personal Protective Equipment (PPE) such as hi-vis vests, safety boots, and hard hats for all personnel involved in the delivery, handling, and stacking of materials. Maintain regular inspection and maintenance of forklifts to prevent any malfunctions and accidents. Implement a protocol for communication between forklift operators and site personnel, such as the use of visual signals or two-way radio devices. 	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Establish designated unloading zones that are clear of obstacles and have controlled access to prevent unauthorised entry during the delivery process.		
			- Ensure that the materials being delivered are add ately packaged and secured to prevent falling objects from causing injury.		
			- Enforce strict adherence to safe load limit, or both forth and storage racks, with thorough inspections carried out before stack matches.		
			- Implement a monitoring system to track the incorp, movement, and stacking of materials, ensuring that stack have evenly distributed and with the safe working weight capacity.		
			- Ensure appropriately ent, whas harnesses or all arrest systems, is provided for waters involved in stationary material at height.		
	- Encourage a ulture of proporting include ear mater a lelively and beauting, providing mequent proto				
			- Cond of hoular access and risk assessments for material handling procedures, reviewing the fective as of implemented control measures and making improve ents are necessary.		
	1		Ensure that workers have undergone appropriate manual handling training on the rect linung and carrying techniques to prevent musculoskeletal injuries.		
			- coise mechanical aids such as forklifts, pallet jacks, or trolleys whenever possible to minimise the risk of injury during manual handling tasks.		
			- Establish a system for regular inspection of materials for any signs of damage, wear, or improper packaging that may cause a hazard during stacking and storage.		
			- Place damaged materials in a designated quarantine area until they can be safely disposed of or repaired, ensuring they won't pose a hazard to workers.		
3. Inspection of Materials	Manual handling injuries, a materials causing injury	2M	- Implement a clear labeling system to easily identify fragile, heavy, or hazardous items so that workers are aware of any additional precautions they should take during handling.	1L	
			- Encourage workers to use appropriate personal protective equipment (PPE) such as gloves, safety boots, or back support belts during manual handling tasks to reduce the risk of injury.		
			- Regularly inspect forklifts, pallet jacks, and other mechanical aids to ensure they are in good working order and fit for purpose, reducing the risk of malfunction or accidents caused by faulty equipment.		
			- Store materials using appropriate methods, such as on specially designed racking systems or secure shelves, to reduce the chance of damaged materials causing injury.		

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

		SAF WC A	STATEMENT	MONITORING AND	REVIEW			
The SWMS must be reviewed regularly to noke sure it remains effortive and must be reviewed (and revised if necessary) if relevant control measure are review by process should be carried out in consultation with workers (including contractors and subcontract is) who may be affected by the operation of the SWMS and their health and safety representatives who revesented that work group at the workplace. When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.				The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to: 1. Spot Checks. 2. Consultation with workers, contractors and sub-contractors. 3. Internal audits on a continual basis. An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	P		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWh			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting so tions.			
Responsible person is assigned and listed on the SWMS for the imperent of continue assures.			
Permit requirements specified, such as Hot Work, Veralt Heights etc.			
SWMS identifies plant and equipment to be u d.			
Details of inspection checks required for any equipment listed are noted on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
dentifies any hazardous substances used with specific control measures in line with any SDS.
