| SPECIFIC WORK STEPS | HAZARDS THAT MAY ARISE | INITIAL RISK | SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS | RESIDUAL RISK |
| 1. Preparation | Tripping over toys, children agitated due to lack of structure | 2M | Conduct a thorough inspection of the activate area to identify and remove any potential trip hazards such as toys, cords, or debris. Ensure that toys and equipment are stored and agnated areas and are not left scattered around the floor. Establish clear activity zone with appropriate by indicative or minimise clutter and chaos. Use non-slip mate to the indicate the tripping burnore likely. Set up a streamed schedule that utilines stream activities and their timings to provide children with a sense of rough. Ensure there are sufficient staff members on hand to supervise children and intervene if they become agitat by supset. Provide the finistructures and rules to children about safe play and the importance of keeping the area tidy. In a quilar through children's behaviour and step in early if a child shows signs of agitation or distress. Have using resources available for children, such as soft cushions, quiet corners, or sensory toys, to alp manage emotions. In an for regular breaks and snack times to maintain energy levels and reduce restlessness among children. Encourage collaborative play and peer assistance to promote cooperation and reduce the likelihood of chaotic behaviour. Maintain open communication with parents or guardians about the daily schedule and any notable behaviours or incidents. | 1L |
| 2. Child handover | Missing child, communication breakdown with parents | ЗН | Conduct a thorough headcount of children before and after handover. Implement a sign-in/sign-out register that requires the signature of parents or guardians. Establish a clear, designated area for child handover to minimise confusion. Communicate handover procedures clearly to both staff and parents/guardians. Require identification from new or unfamiliar persons attempting to collect a child. Ensure staff undergo training in communication protocols and safety procedures. Use identification badges or wristbands for children for easy recognition. Maintain up-to-date contact information for all parents and authorised guardians. Have an emergency plan in place in case a child goes missing during handover. Designate specific staff members responsible for overseeing the handover process. | 2M |

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK IN 'THIS 'S' ITEM AND MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remain effect, and must be reviewed (and revised if necessary) if relevant control measures are revised. The view as should be carried out in consultation with workers (including contractors as unputractors of the SWMS and their health and safety registeratives who represented that work group at the workplace.

When the SWMS has been revised the PCBD mest ensure the advised that a revision has been made and how they can accept the revised SWMS, including all persons who will need to change a work procedure or system as a rest of the review are advised of the changes in a way that will enable them to implement their duties the theoretical with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- Spot Checks.
- Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

| ITEMS WHICH MUST BE INCLUDED IN THE SWMS | COMPLETED | COMMENTS |
|---------------------------------------------------------------------------------------------------|---------------|----------|
| | | |
| The company details have been entered, including the project name and address. | | |
| All relevant personnel consulted during the development of the SWMS. | | |
| Name, signature, position and date signed of the person approving the SWMS. | | |
| Specific personnel and qualifications, experience is noted in the SWMS. | Y | |
| Provides a step-by-step process of tasks required to carry out the activity or task. | | |
| Adequate risk assessment of any identified hazards has been completed. | \boxtimes | |
| Foreseeable hazards are identified and documented for each step. | \boxtimes | |
| Any hazards listed in any site risk assessments have been added to the SV. S. | | |
| SWMS initial risk (IR) column as well as residual risk (RR) column ampleted. | | |
| Check control measures added to the SWMS are the most effer ve secutions. | | |
| Responsible person is assigned and listed on the splene of control measures. | | |
| Permit or licenses requirements specified, so in as Hot Work, Electral Work, Work at Heights etc. | | |
| SWMS identifies plant and equipment to be | | |
| Details of inspection checks required for any equipment lister are noted on the SWMS. | | |
| Describes any mandatory qualifications, experience, and or skills required to perform the work. | | |
| Applicable personal protective equipment is selected on the SWMS. | | |
| Reflects and documents any legislative references and/or Australian Standards. | \boxtimes | |
| Identifies any hazardous substances used with specific control measures in line with any SDS. | \boxtimes | |
