

## Temporary Fencing Setup | SAFE WORK METHOD STATEMENT (SWMS)

### TASK OR ACTIVITY: Temporary Fencing Setup

Business Name:	ABN:	SWMS#
Business Address:		
Contact Person:	Phone:	Email:

### THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE PCBU OF THE PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a safe work method statement (SWMS) is prepared before the proposed work starts.

Full Name:		
Signature:	Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS as well as reviews and modifications of the SWMS.		
Full Name:	Title:	Phone:

### ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS SWMS MUST HAVE THE FOLLOWING COMMUNICATED

Safety meetings or toolbox talks will be scheduled in accordance with legislative requirements to first identify any site hazards, then to communicate those hazards and then to further take steps to either eliminate or control each hazard.

If an incident or a near miss occurs, all work must stop immediately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.

Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.

The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

### NAME OF ALL RELEVANT PERSONNEL WHO HAVE BEEN CONSULTED AND COMMUNICATED TO IN THE DEVELOPMENT AND APPROVAL OF THIS SWMS

## CLIENT OR PRINCIPAL CONTRACTOR DETAILS

Client:

Project Name:

Project Address:

SCOPE OF WORKS

## ANY HIGH-RISK CONSTRUCTION WORK BEING CARRIED OUT

☐ involves a risk of a person falling more than 2 meters

☐ is carried out on or near pressurised gas mains or piping

☐ is carried out on a telecommunication tower

☐ is carried out on or near chemical, fuel or refrigerant lines

☐ involves demolition of an element of a structure that is load-bearing

☐ is carried out on or near energised electrical installations or services

☐ involves demolition of an element related to the physical integrity of a structure

☐ is carried out in an area that may have a contaminated or flammable atmosphere

☐ involves, or is likely to involve, disturbing asbestos

☐ involves tilt-up or precast concrete

☐ involves structural alteration or repair that requires temporary support to prevent collapse

☐ is carried out on, in or adjacent to a road, railway, shipping lane or other traffic corridor

☐ is carried out in or near a confined space

☐ is carried out in an area of a workplace where there is any movement of powered mobile plant

☐ is carried out in/near a shaft or trench deeper than 2m or tunnel involving use of explosives

☐ is carried out in areas with artificial extremes of temperature.

☐ is carried out in or near water or other liquid that involves a risk of drowning.

☐ involves diving work.

## ANY HIGH-RISK MACHINERY OR EQUIPMENT NEARBY

RISK MATRIX									
LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HEIRARCHY OF CONTROLS	
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE			<p><b>Elimination</b> Remove the hazard.</p> <p><b>Substitution</b> Replace the hazard.</p> <p><b>Isolation</b> Isolate People from the hazard</p> <p><b>Engineering</b> Isolate the hazard.</p> <p><b>Administrative</b> Change the work.</p> <p><b>PPE</b></p>	
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED		
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review before work starts.		
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	2M MODERATE	Ensure control measures in place.		
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH	1L LOW	Monitor and keep records		

**Notes on Hierarchy of Controls:** Elimination methods are the most effective and preferred when controlling a hazard. Substitution is the second most effective method of controlling a hazard. Engineering by isolation is the third most effective, while Administrative Controls by changing the work is the fourth most effective method. PPE (Personal Protective Equipment) is the least effective method.

PERSONAL PROTECTIVE EQUIPMENT (PPE)											
Select the appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Uneven ground, weather conditions	3H	<ul style="list-style-type: none"> <li>- Conduct a pre-start inspection of the work area to identify uneven ground and mitigate potential slip, trip, or fall hazards.</li> <li>- Use proper personal protective equipment, including non-slip safety boots, to reduce the risk of slipping on uneven surfaces.</li> <li>- Clearly mark any areas with uneven ground using caution tape to alert workers of potential hazards.</li> <li>- Incorporate site-specific weather forecasts into planning to anticipate extreme conditions such as high winds or rain.</li> <li>- Schedule temporary fencing setup during favourable weather conditions whenever possible.</li> <li>- Provide appropriate training and guidance for workers on how to navigate uneven terrains safely.</li> <li>- Utilize ground leveling tools or machinery to even out significant inconsistencies in the terrain prior to setting up fencing.</li> <li>- Secure all materials and tools when not in use to prevent them from becoming hazards in windy conditions.</li> <li>- Ensure temporary fencing materials are suitable for the expected weather conditions, including using weighted bases or additional stabilisers as required.</li> <li>- Conduct regular site inspections throughout the setup process to monitor changes in environmental conditions that might affect safety.</li> <li>- Develop and communicate an emergency plan tailored to severe weather events, ensuring all team members are aware of procedures.</li> <li>- Have access to adequate lighting and reflective vests if poor visibility due to weather poses additional risks.</li> <li>- Maintain a first aid kit on-site equipped to handle injuries that might occur from slips, trips, or falls.</li> <li>- Encourage frequent short breaks for workers to adapt to environmental conditions, reducing fatigue and increasing alertness.</li> </ul>	2M
2. Material Handling	Lifting injuries, falling materials	4A	<ul style="list-style-type: none"> <li>- Conduct a site-specific risk assessment to identify potential hazards beforehand.</li> <li>- Provide manual handling training for all workers involved in setting up temporary fencing.</li> <li>- Use mechanical aids, such as trolleys or forklifts, to transport heavy materials whenever possible.</li> <li>- Ensure that all employees wear appropriate personal protective equipment (PPE) like gloves and steel-toed boots.</li> <li>- Implement a buddy system for lifting heavy or awkward fencing panels to reduce strain on individuals.</li> </ul>	2M

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			<ul style="list-style-type: none"> <li>- Clearly demarcate areas where materials are being transported or handled to keep unauthorized personnel away.</li> <li>- Store fencing materials securely on level ground to prevent movement and falling objects.</li> <li>- Schedule regular breaks for workers engaged in repetitive lifting tasks to minimize fatigue.</li> <li>- Train workers on proper lifting techniques, including bending the knees and keeping the load close to the body.</li> <li>- Monitor weather conditions and cease material handling during high winds or adverse weather to prevent accidents.</li> <li>- Keep walkways clear of obstructions to ensure a clear path for moving fencing materials.</li> <li>- Use straps or ropes to secure stacked materials, preventing them from toppling over during setup.</li> <li>- Assign a supervisor to oversee heavy lifting operations and ensure compliance with safety procedures.</li> </ul>	
3. Site Inspection	Trip hazards, sharp objects	3H	<ul style="list-style-type: none"> <li>- Conduct a thorough inspection of the ground where the temporary fencing will be installed to identify any visible trip hazards such as debris, uneven surfaces, or loose materials.</li> <li>- Use appropriate signage and barriers to clearly mark and cordon off areas with potential trip hazards until they can be adequately addressed or removed.</li> <li>- Ensure that all workers are equipped with suitable personal protective equipment (PPE), including gloves and sturdy footwear, to protect against sharp objects during inspection and setup.</li> <li>- Remove or secure any sharp objects found on site, including glass, metal shards, and protruding nails, to prevent injuries.</li> <li>- Implement a housekeeping protocol to regularly clear and check the site for new hazards that may have emerged prior to beginning work each day.</li> <li>- Provide adequate lighting in and around the work area to improve visibility, especially in low light conditions, helping to identify potential trip hazards and sharp objects more efficiently.</li> <li>- Train workers on hazard identification techniques so they can recognise and report potential risks effectively while conducting the site inspection.</li> <li>- Engage a designated safety officer or team lead to oversee the site inspection process, ensuring adherence to safety protocols and immediate action on identified hazards.</li> <li>- Utilise tools designed for safe removal or manipulation of sharp objects, such as pincers or metal detectors, to minimize direct hand contact with potentially dangerous materials.</li> <li>- Establish an emergency response plan specific to injury from sharp objects or trips, ensuring first aid supplies and trained personnel are readily available on site during the setup process.</li> </ul>	1L

## EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.

## SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

## SAFE WORK METHOD STATEMENT MONITORING AND REVIEW

**The SWMS must be reviewed regularly** to make sure it remains effective and must be reviewed (and revised if necessary) if relevant control measures are revised. The review must be carried out in consultation with workers (including contractors and sub-contractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

**The SWMS must be monitored regularly** for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

1. Spot Checks.
2. Consultation with workers, contractors and sub-contractors.
3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

## SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.	<input checked="" type="checkbox"/>	
All relevant personnel consulted during the development of the SWMS.	<input checked="" type="checkbox"/>	
Name, signature, position and date signed of the person approving the SWMS.	<input type="checkbox"/>	
Specific personnel and qualifications, experience is noted in the SWMS.	<input checked="" type="checkbox"/>	
Provides a step-by-step process of tasks required to carry out the activity or task.	<input checked="" type="checkbox"/>	
Adequate risk assessment of any identified hazards has been completed.	<input checked="" type="checkbox"/>	
Foreseeable hazards are identified and documented for each step.	<input checked="" type="checkbox"/>	
Any hazards listed in any site risk assessments have been added to the SWMS.	<input checked="" type="checkbox"/>	
SWMS initial risk (IR) column as well as residual risk (RR) column completed.	<input checked="" type="checkbox"/>	
Check control measures added to the SWMS are the most effective solutions.	<input checked="" type="checkbox"/>	
Responsible person is assigned and listed on the SWMS for the implementation of control measures.	<input checked="" type="checkbox"/>	
Permit or licenses requirements specified, such as Hot Work, Electrical Work, Work at Heights etc.	<input checked="" type="checkbox"/>	
SWMS identifies plant and equipment to be used.	<input checked="" type="checkbox"/>	
Details of inspection checks required for any equipment listed are noted on the SWMS.	<input checked="" type="checkbox"/>	
Describes any mandatory qualifications, experience, training or skills required to perform the work.	<input checked="" type="checkbox"/>	
Applicable personal protective equipment is selected on the SWMS.	<input checked="" type="checkbox"/>	
Reflects and documents any legislative references and/or Australian Standards.	<input checked="" type="checkbox"/>	
Identifies any hazardous substances used with specific control measures in line with any SDS.	<input checked="" type="checkbox"/>
