

Testing Emergency Lighting	Systems SAFE WORK MI	ETHOD STATEMENT (SWMS)	
TASK OR AC	TIVITY: Testing Emergency Ligh	ting Systems	
Business Name: [Company Name]		ABN: [ABN]	SWMS#
Business Address: [Company Address]			
Contact Person:	Phone: [Phone]	E fil:	
THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE POST THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or undertaking (N 3U) is	required to ture at a safe work method s	tatement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring a	ompliance of the SWMS well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS VMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A CO. MUNICATED TO IN THE DEVELO	LL RELEVANT PERSONNEL WHO HAVE BI PMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched ed in accordance with egislative requirements to first identify any site hazards, conditions those hazards and then to further take steps to either the conditions of the conditions are or conditional talks.	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must steam ately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

Select me appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Electrical hazards, Trip hazards from cables	ЗН	 Ensure that all personnel involved are properly trained in procedures for testing emergency lighting systems. Use caution tape or barriers to mark off the are where work is being done to prevent accidental trips over cables. Keep the work area clean, clear, and organized to provide the risk of tripping hazards. Equip all workers with approxiate personal protetive equire ant (PPE) including insulated gloves and safety eye ear to protect again the foundal shocks. Check the conditionary is annuables before starting the job, looking for any signs of dama for irregulatives. Implement a skout-tage protocol are are that no unauthorised or accidental re-error sing once swell occurs during testing. Make see there are adequate first aid kit readily available on-site, complete with instructions in hand or electrical injuries. Plan the work cheduce such that it minimises the need for long cable runs across in traffic area. Use only covers or cable management systems to safely organise cables and revent or nazards. unduct regular tool-box talks to remind crew members of standard safety protocols and highlight any specific concerns related to the day's activities. 	2M	
2. Equipment Check	Electrical fault, Injury from faulty equipment	ЗН	 Ensure that all equipment is checked and maintained regularly to prevent electrical faults. Regular maintenance schedules should be followed with proper documentation of each maintenance activity. Use of properly insulated tools and personal protective equipment (PPE) - gloves, boots, safety glasses – to protect against shocks or injuries from faulty equipment. Conduct pre-use checks before equipment use to identify any abnormal conditions indicative of a potential fault. Test emergency lighting systems during times when the building or area is least occupied to avoid causing inconvenience or potential harm to others in case of a failure. Utilise lockout/tag out procedures whilst working on equipment to ensure no accidental turning on of power. Provision of adequate training for workers involved which covers the correct operating procedure along with identification and management of potential risks. Immediate reporting and fixing of any identified issues, especially those pertaining to electrical safety. 	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			 Create an emergency plan to manage situations effectively if there happens to be an unexpected eventuality, like sudden malfunctioning of equipment during testing. 		
			- Ensure only competent professionals are involved the process who can proficiently handle emergencies and understant the gravity of risks involved.		
			Keep first aid kits and fire extinguishers in a by in case an accident or emergency situation.		
			- Use appropriate test instruments specified for sing emergency lighting systems. Do not improvise or use tool a instruments unsurely ble for the ask.		
			- Perform regular audits of work actices to ensure ety measures are being adhered to consist any.		
			- Conduct thou agh risk are assment by a utiliating any work to identify potential haza		
			- Ensure the actis properly isolated before beginning work to prevent possible accide is a hishap.		
			- Display suita work progress' signage promptly for public awareness and take os to language edestrian traffic if required.		
	1		Only, in pyees who have received adequate training should be permitted to test mergen, eighting systems to ensure their understanding of the risks associated to the work.		
			- Keep an updated record of all personnel authorised to carry out system testing to maintain compliance.		
3. Area Isolation	Risk of non-isolat , unexpected startup	4A	- Implement a lockout/tagout mechanism ensuring only authorised personnel have access to the control panel, reducing the risk of non-isolation and unexpected startup.	2M	
			- Regularly inspect and maintain equipment used for testing to confirm they are in good working condition.		
			- All staff must wear appropriate personal protective equipment (e.g., safety glasses, gloves) according to the task specifications and statutory requirements.		
			- Always use the correct tools and procedures for disconnecting electrical connections to avoid accidental triggering of the lighting system.		
			- Equipment should be verified as de-energised before making connections to avoid electrical shocks.		
			- Have a first aid and emergency response plan prepared and rehearsed in case of any accidental injuries or unexpected occurrences.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	P		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWI			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effective secutions.			
Responsible person is assigned and listed on the SWMS for the imperent of contameasures.			
Permit requirements specified, such as Hot Work, Electrical Work, Vocat Heights etc.			
SWMS identifies plant and equipment to be u d.			
Details of inspection checks required for any equipment listed at noted on the SWMS.			
Describes any mandatory qualifications, experience paining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
