

Tree Care Handler	SAFE WORK METHOD ST	ATEMENT (SWMS)	
TA	SK OR ACTIVITY: Tree Care Hand	dler	
Business Name: [Company Name]		ABN: [ABN]	SWMS#
Business Address: [Company Address]			
Contact Person:	Phone: [Phone]	E vil:	
THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY 1	THE PL OF THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	eting a business or undertaking (N 3U) is	required to ture at a safe work method s	tatement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring a	ompliance of the SWMS well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WAS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A COMUNICATED TO IN THE DEVELO	LL RELEVANT PERSONNEL WHO HAVE BI PMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched ed in accordance with egislative requirements to first identify any site hazards, conditions unical those hazards and then to further take steps to either the conditions of the conditions are or conditions.	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must standardly. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

			A								

Select me appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Poor work area setup, incorrect PPE	2M	 Properly assess and inspect the work area before commencing tree care activities to identify any potential hazards, such as trip hazards or overhead power lines, and take appropriate steps to address them. Establish a designated and well-organises ourkspace with a clear access path for workers, equipment, and vehicles to minimum confusion and potential mishaps. Implement a site-specific safety plan detailing a course and protocols to follow in case of an emergency, including clear instruction on evacuation outes, assembly points, and communication chanels. Ensure all tree care and lers an properly trained an unave received up-to-date Workplace Health and San or (Who information objects to their tasks, including correct use on quipment as safe to king process. Supply adequate Person Protective unpment (PPE) to all tree care handlers base to specify is to sessments, including gloves, high-visibility clothing, hard hats, it andher use to PPE use through regular monitoring and supervision, providir propulariants are to PPE use through regular monitoring and supervision, providir propulariants and maintain all tools, equipment, and machinery to ensure they are most of working condition, eliminating risks associated with malfunctioning or nulty equation. Interpretation of the propular toolbox talks and safety briefings to reinforce the importance of following safe work practices and using appropriate PPE, allowing for open discussions and questions regarding any uncertainties or concerns. Provide ongoing education, training, and support to tree care handlers to keep them informed of the latest industry standards and best practices, ensuring compliance with relevant WHS legislation and regulations. 	1L	
2. Machine inspection	Undetected defects, loose components	2M	 Conduct a pre-operational inspection before each shift or daily to identify any issues with the machinery, ensuring that all components are in good working condition. Develop and implement a regular maintenance schedule for the tree care machine, including inspections by qualified technicians to ensure all parts are functioning correctly and securely fastened. Train all machine operators in proper inspection procedures, emphasising the importance of identifying potential hazards associated with undetected defects and loose components. 	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			 Keep up-to-date records of all inspections and maintenance activities, providing documentation of control measures taken to prevent hazards related to machine defects and loose components. 		
			- Install visual and audible warning systems on a machinery to alert operators and nearby workers in case of any detected ab a malities, such as unusual vibration or noise levels.		
			- Design and provide comprehensive inspection in their identification of potential risks linked to undetect defects and lose components.		
			- Regularly update the tree can perator's training sector new best practices, equipment upgrades lesson bearned from previous incidents involving machine malfunctions.		
			- Establish a picess for regirting an oddrawing identified issues promptly, such as tagging out analfung and machine and the necessary repairs have been made		
			- Implement a system for conducting random spot checks on machines during operation to point or perence to inspection and maintenance protocols.		
		det	Utilise erson protective equipment (PPE) for operators and nearby workers, cing to import of any sudden hazardous events resulting from undetected detection loss components.		
			Fincourage open communication and collaboration among team members when it collaboration to identifying, assessing, and controlling machine-related hazards. This can be achieved through regular toolbox talks, planning sessions, and debriefings after incidents.		
			- Continuously review and improve current processes surrounding machine inspection and hazard control, using both internal and external sources like industry guidelines, research, and incident reports to ensure the optimisation of available prevention strategies.		
			- Clear communication: Ensure that all workers on site are informed about the tree care handling operation and the potential hazards associated with unauthorised access and accidental activation of machinery.		
Machine startup	Unauthorised access, accidental	- C	- Training and competency: All machine operators must be properly trained, competent, and certified to use the specific tree care handling equipment to minimise unauthorised access, misuse, and potential accidents.	1L	
	activation		- Lockout/tagout procedures: Before starting the machine, implement lockout/tagout procedures to isolate the equipment from energy sources, preventing equipment startup during maintenance or inspection tasks.		
			- Key control system: Establish a key control system for the access and distribution of machine keys to authorised personnel only, reducing the risk of unauthorised access or accidental machine startup.		

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			Machine guarding: Install and maintain effective guards on operating parts and control switches of machinery to reduce the risk of accidental contact and unintended machine activation.		
			- Signage and barrier installation: Place visible uning signs indicating hazardous areas around the workplace, and install physical barriers to restrict access to the machines, reducing the likelihood of unauth, sed access and accidental activation.		
		- Emergency stop mechanisms: Equip tree can paining machinery with clearly marked emergency stop buttons or switches. Training machinery with clearly marked emergency all personne on how to use these in case of an emergency			
			- Pre-start checks: let a control a time pre-start check of occurrence of all tree care handling equipment of entire a fits a sty before us. Operators should visually inspect the prevalency and control remove of debris or obstructions, and verify the functional of safety for ures such as akes, guards, and emergency stops.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS	
The company details have been entered, including the project name and address.				
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P		
Name, signature, position and date signed of the person approving the SWMS.				
Specific personnel and qualifications, experience is noted in the SWMS.				
Provides a step-by-step process of tasks required to carry out the activity or task.				
Adequate risk assessment of any identified hazards has been completed.				
Foreseeable hazards are identified and documented for each step.				
Any hazards listed in any site risk assessments have been added to the SWI				
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.				
Check control measures added to the SWMS are the most effections.				
Responsible person is assigned and listed on the SWMS for the impement of contameasures.				
Permit requirements specified, such as Hot Work, Verat Heights etc.				
SWMS identifies plant and equipment to be u d.				
Details of inspection checks required for any equipment listed at noted on the SWMS.				
Describes any mandatory qualifications, experience raining skills required to perform the work.				
Applicable personal protective equipment is selected on the SWMS.				
Lists any required permits or licenses.				
Reflects and documents any legislative references and/or Australian Standards.				
Identifies any hazardous substances used with specific control measures in line with any SDS.
