THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE PL OF THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	ting a business or undertaking (K 3U) is	required to thurs at a safe work method s	statement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring a the	ompliance of the SWMS, well as review	vs and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A CO. MUNICATED TO IN THE DEVELO	LL RELEVANT PERSONNEL WHO HAVE B OPMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be scheeted in accordance with egislative requirements to first identify any site hazards, conditioned unical those hazards and then to further take steps to either the scheet or conditional each hazard.	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must study unately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Conduct a thorough risk assessment of the worksite to identify potential fall hazards. This should include evaluating ground conditions and identifying changes in levels or unstable surfaces.		
			- Set up marked safety barriers around any partified fall hazards to ensure workers maintain a safe distance from these high-rise reas.		
			- Provide comprehensive training to all person, and now to operate the turf cutter properly, focusing particularly on procedures for a venting fall and managing risks.		
			- Regularly inspect and maintage the turf cutter to entreme in good working order and safe to use.		
1. Preparation	Accidental falls, Inadequate training	3H	- Have designing a person who a strained in set aid techniques available at the site during a sork hours.	2M	
			- Der a write Safe , ork Method statement (SWMS) for the activity of turf cuttine sclear, somes the step-by-step processes and safety controls in place.		
			- Adopt p. sty that shuires the use of personal protective equipment (PPE) which may inc. detur mets, to ves, high visibility vests, steel-toed boots, and safety roggles		
	7		- b slop in emergency response procedure in case of an accident involving a fall or other by, including immediate medical assistance.		
			aplement a regular break schedule to help prevent worker fatigue, which can consider to accidents.		
	C		Encourage a culture of safety where workers feel comfortable highlighting potential safety issues and contributing to ongoing hazard identification and control.		
			- Ensure that all personnel involved are adequately trained in the correct handling procedures for unloading and moving equipment.		
			- Use mechanical aids like cranes or fork lifts to unload heavy equipment instead of manually lifting them.		
			- Ensure that safety attire is worn at all times during the unloading procedure. This includes safety helmets, high visibility vests, proper work boots, gloves, etc.		
2. Unloading Equipment	Back injury, Damage to equipment	2M	- The area where the equipment is being unloaded should be clear with no loose gravel, uneven terrain or obstructions that can cause slips or trips.	1L	
			- Using a spotter to assist in backing up vehicles and preventing collisions with other objects during the unloading process.		
			- After the equipment is unloaded, ensure that it is immediately moved to its designated location to prevent any damage or obstacles in the work area.		
			- Make sure that each piece of equipment's brakes are engaged once they're in place, this prevents unexpected movements.		

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Conduct regular inspections and maintenance of material handling equipment used in the unloading process.		
			- Compliance with local safe work legislation requirements and company's workplace safety policies should be ensured.		
			- Avoid rushing during unloading to minimis risk of accidents due to hurried actions or shortcuts.		
			- Always keep the required First Aid kit nearby, have employees trained in first aid protocols in case of an a rent.		
			- Regularly inspective sutter chany signs of weak or damage. Ensure that all safety guards chreatures is in proceand functioning as intended.		
			- Always unployer shut down the machine fore performing maintenance or inspection, to explore cential electric anhazards.		
			- Use opportate, sonal protective equipment (PPE) - gloves, sturdy footwear, safety as - when andling or maintaining the turf cutter to prevent cuts or pinches rom, oving a s.		
			Sonduc regula safety training for staff on how to handle and maintain the turf cur, pare erly. This should include training in emergency procedures related to the equipt.		
3. Inspection and Maintenance	Electrical hazards, Improper handling	ЗН	usure that work areas around the turf cutter are well lit to reduce the risk of injury dubg inspection and maintenance tasks.	2M	
			Keep the user manual handy and consult it before undertaking any kind of repair or maintenance activity on the turf cutter.		
			- Practice safe lifting techniques when handling heavy parts of the turf cutter. Where necessary, use adequate lifting aids to prevent strain injuries.		
			 Routinely check and maintain the electrical cords, plugs and outlets associated with the turf cutter to ensure they are not worn out or exposed, reducing the risk of electrical hazards. 		
			- Follow manufacturers' guidelines for service intervals and types of maintenance required to keep the turf cutter in good, safe working condition.		
			- If a part is damaged and requires replacement, only use parts specified by the manufacturer to maintain the performance and safety of the turf cutter.		
4. Start-Up Procedure	Sudden machine start, Loose clothing caught in machine	ЗH		2M

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAF WO A STHUD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to revised if necessary) if relevant control measure are revised if necessary) if relevant control measure are revised if necessary if relevant control measure are revised of the SWMS and their health and safety representatives who reworkplace.

ke sure it remains effective and must be reviewed (and are a reverse v process should be carried out in s an subcontract s) who may be affected by the operation sentatives who recessented that work group at the

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- 1. Spot Checks.
- Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.			
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWh			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effectines.			
Responsible person is assigned and listed on the SWMS for the impement of cont, measures.			
Permit requirements specified, such as Hot Wrap Electrical Work, Variat Heights etc.			
SWMS identifies plant and equipment to be upd.			
Details of inspection checks required for any equipment listed ar noted on the SWMS.			
Describes any mandatory qualifications, experience reining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
