THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY 1	THE P. OF THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	eting a business or undertaking (N=3U) is	required to ure at a safe work method s	tatement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring a	ompliance of the SWMS well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A CO. MUNICATED TO IN THE DEVELO	LL RELEVANT PERSONNEL WHO HAVE BI PMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched ed in accordance with egislative requirements to first identify any site hazards, conditions those hazards and then to further take steps to either the conditions of the conditions are or conditional talks.	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must standardly. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

			A								

Select me appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

**Note:** A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Incorrect equipment, Improper training	ЗН	<ul> <li>Ensure that all workers handling tyre changing equipment have received proper training and hold relevant certifications.</li> <li>Provide thorough instruction, including hands a demonstrations, for the correct usage of tyre-changing equipment.</li> <li>Inspect tyre changer machines and associant equipment on a regular basis to ensure they are functioning correctly and are a contact for the task at hand.</li> <li>Maintain a comprehensive the entory list for all typic changing a quipment and ensure that only approved equipment resed during operators.</li> <li>Post clear signal and word the work area outlining the correct procedures for using tyre-changing comprehensive and notific otential broads.</li> <li>Encourage to no communication amount of workers and supervisors to share condour and or provide about equipment safety or worker competence.</li> <li>Provide a cess to be to-date instructional materials, such as user manuals or video tutorials for each pix of tyre changing equipment.</li> <li>Implement a presher anining programme for all tyre changing personnel to mintain heir of opetency levels and stay updated on new equipment or other safety oncerns a managers or supervisors.</li> <li>Each site of the content of the personal protective equipment (PPE) while operating tyre changing equipment, such as safety goggles, gloves, and steel-toed boots.</li> <li>Conduct pre-operation inspections of the worksite, verifying that adequate space and resources are available for each workstation.</li> <li>Allocate adequate time for tyre changing tasks, taking into account the workers' abilities and need for breaks in order to minimise rushed or careless actions.</li> <li>Review and update the SWMS regularly based on industry advancements and new insights from the workers to continuously improve workplace safety practices.</li> </ul>	2M	
2. Vehicle Positioning	Vehicle instability, Collision with workshop objects	2M	<ul> <li>Ensure the workshop area is clean, well-organised, and free of any clutter or obstructions that could cause an accident during vehicle positioning.</li> <li>Implement a traffic management system to control the movement of vehicles within the workshop, such as designated lanes, signs, and floor markings.</li> <li>Train staff in correct methods for moving and positioning vehicles, including proper use of equipment like jacks, stands, and wheel chocks to prevent instability or unintended motion.</li> <li>Establish a thorough inspection process for each vehicle before and after the tyre changing operation, checking for potential issues with suspension, brakes, or wheels that may increase risks associated with vehicle positioning.</li> </ul>	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul> <li>Provide adequate personal protective equipment (PPE) for staff members involved in vehicle positioning, such as high-visibility clothing, steel-toed boots, and safety gloves.</li> <li>Install safety barriers or designated walking and to separate workers from the path of moving vehicles and reduce risk of this ion with workshop objects.</li> <li>Ensure all staff members follow a strict containication protocol when operating vehicles in the workshop, using clear signals of the devices to relay instructions.</li> <li>Require staff members to the appropriate lifting of thoisting quipment when necessary, such as engine how and trolley jacks, appropriate safe vehicle positioning without physical strain misk of oury.</li> <li>Set standard containing produce on the products of equipment like wheel alignment mist lines and his audic lift containing a routine maintenance checks are conducted to notimise more anical faile and risk of accidents.</li> <li>Device on the containing properties of the product of dealing with potential hazardous situations, such as whicle instability or collisions, and equip staff with the knowledge and too intended to be bond quickly and effectively.</li> <li>Establic regular training workshops for staff members, reinforcing safe work protects brope a tuipment usage, and emergency response protocols specific to vehicle of tioning and tyre changing tasks in the workshop.</li> </ul>		
3. Wheel Removal	Manual handling injuries, Slips and falls	2M	<ul> <li>- pvide thorough training to workers, focusing on manual handling techniques, such as using appropriate posture and lifting in teams if necessary.</li> <li>- Ensure that workers have access to material handling equipment, such as hand trucks and mechanical lifts, in order to minimise the risk of injuries associated with manual handling tasks.</li> <li>- Regularly inspect and maintain the tyre changing workspace, removing any potential slip or trip hazards that may be present.</li> <li>- Ensure that all tools and equipment used during the wheel removal process are well-maintained and functioning properly, as damaged or faulty tools could contribute to slips and falls.</li> <li>- Require that workers wear appropriate footwear with slip-resistant soles to reduce the risk of slips and falls.</li> <li>- Establish and enforce guidelines for proper storage and organisation of tools and equipment, minimising clutter and reducing the risk of tripping hazards in the workspace.</li> <li>- Encourage workers to take regular breaks to avoid muscle strain and fatigue, which can contribute to a higher risk of injury during manual handling tasks.</li> <li>- Clearly mark any areas where there is an increased risk of slipping, such as areas where grease and oil may accumulate.</li> </ul>	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Implement a detailed cleaning schedule to prevent the buildup of spills, dust or debris that could lead to potential slip hazards.		
			- Encourage workers to communicate with one appear during the wheel removal process, providing assistance and support if proced.		
			- Have emergency response plans in place, a suring works are aware of them, and provide first aid equipment, including ice, locks a sundages, to address any potential injuries that may occur during wheel the surface of them.		
			- Regularly review and assess the effectiveness of applement control measures through workplace inspections, scussions with wo are the monitoring of incident reports. This can elp to entify any areas we additional controls may be required, ensuring the conclued sorty of workers during the wheel removal process.

#### SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

	Date:							
		SAF WC A	STATEMENT	MONITORING AND	REVIEW			
The SWMS must be reviewed regularly to refer the sure it remains effective and must be reviewed (and revised if necessary) if relevant control measure are a constant of the symbol process should be carried out in consultation with workers (including contractors and subcontract is) who may be affected by the operation of the SWMS and their health and safety representatives who reduces essented that work group at the workplace.  When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.				The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:  1. Spot Checks. 2. Consultation with workers, contractors and sub-contractors. 3. Internal audits on a continual basis.  An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

### SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	P		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWh			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting so tions.			
Responsible person is assigned and listed on the SWMS for the imperent of continue assures.			
Permit requirements specified, such as Hot Work, Veralt Heights etc.			
SWMS identifies plant and equipment to be u d.			
Details of inspection checks required for any equipment listed are noted on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
dentifies any hazardous substances used with specific control measures in line with any SDS.
